Hit Location & Wound Tables

Historically weighted d100 hit locations with system-agnostic wound effects. Roll d100; 00 = 100.

Procedure

1. Roll d100 on the **location table** for the fight, in the column for the attacking weapon. If a **situation** applies (shield side, target down, fleeing...), use that column on the weapon's situation page instead.

2. **Called shot:** Roll the location twice; keep whichever result lands in the called zone. If both or neither do, keep the first. Your system sets any to-hit penalty.

3. Roll d100 on the **mechanism table** for the weapon: cut, pierce or crush.

4. Set **severity** from your own system's damage (see guide), or roll d100 on the severity table (ballistic hits use their own table, by hit zone).

5. **Armour** (adjusted tables only): lower the severity by the armour's steps; see the Armour pages.

6. Find the wound on the **wound effects** page for that mechanism: location row, severity column.

7. Track it: Bleed drains Blood, Pain stacks as a penalty, the Lethal timer runs until treated.

Evidence vs adjusted tables

Evidence tables show where blows marked bone, so armour and soft-tissue blind spots are already baked in: don't subtract armour again. **Adjusted** tables show where blows land; resolve armour separately by the location's armour slot.

Confidence

Historical - taken directly from a source

Fitted - estimated to match published summary figures

Extrapolated - design estimate from analogous evidence

Crusades

Sidon, 1253 or 1260

From 1099 to 1291 Frankish crusader states held the coast of the Levant. Sidon, a walled port in today's Lebanon, was sacked twice in the 13th century: in 1253 by an army from Damascus while Louis IX of France was rebuilding its walls (Joinville describes the king helping to bury the rotting dead), and in 1260 by the Mongols under Kitbuqa. Two mass graves in the town ditch near St Louis' castle, dated to the mid-13th century, hold at least 25 men, Europeans and locals, killed in one of these attacks; their bones show sword, axe and mace wounds, many from behind.

Sides and armour

Side	Who fought	How they used armour
Defenders of Sidon	Frankish knights and sergeants, crossbowmen and townsmen of mixed European and Near Eastern descent.	Knights and many sergeants in mail hauberks with helmets and shields; others in padded coats or nothing.
Attackers	The army from Damascus that sacked the town in 1253, or the Mongols in 1260; which raid filled the graves is not known.	Horsemen in mail or lamellar with round shields, lance, sword, mace and bow; Mongol horse archers in lamellar or padded coats.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**Frankish knight** (picture)	Defenders of Sidon	Mail hauberk and helm (c.1100-1300)	Sword (arming sword)	Mail hauberk, great helm and shield.
	**Frankish sergeant** (picture)	Defenders of Sidon	Mail hauberk and helm (c.1100-1300)	Axe (hand or long-hafted)	Heavy blade wounds at Sidon point to swords and axes.
	**Crossbowman**	Defenders of Sidon	Gambeson and cap	Crossbow (bolts)	Padded coat; the town's walls were still being rebuilt in 1253.
	**Townsman**	Defenders of Sidon	Unarmoured	Spear / lance	Caught in the sack.
	**Syrian horseman** (picture)	Attackers	Mail hauberk and helm (c.1100-1300)	Spiked club / morning star (knout)	Mace blows from the saddle: the Sidon wounds fall on the head, neck and shoulders.
	**Mongol horse archer** (picture)	Attackers	Hardened leather	Bow (war arrows)	Kitbuqa's raid of 1260.

Sidon, mid-13th century - crusader mass graves (bone evidence)

Bones of at least 25 men killed when Mamluk (1253) or Mongol (1260) forces sacked crusader Sidon, later gathered into the town ditch. Killed only.

Confidence: **Historical - taken directly from a source**. Armour: **already reflected, do not apply**. Each weapon column is that weapon's own recorded wounds from the source.

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head (cranium and mandible) (17) = 17.0%; Neck (cervical vertebrae) (24) = 24.0%; Shoulders (clavicle, scapula) (9) = 9.0%; Upper limbs (arm bones) (9) = 9.0%; Hands (11) = 11.0%; Torso (ribs, spine) (10) = 10.0%; Hips (1) = 1.0%; Thighs (12) = 12.0%; Legs (below the thigh) (6) = 6.0%; Feet (1) = 1.0% (n = 100). From the study's table of bones with definite battle injuries (100 bones; 62 sharp, 35 blunt and 5 penetrating injuries) by body region. Sides are not recorded, and each region is shared among its locations by body exposure. Swords and axes roll on the sharp-force bones, the mace (spiked club) on the blunt-force ones and the spear on the penetrating ones (spiked mace, arrow, lance or javelin, the authors suggest); other weapons use all bones together.

Reading it. Armour is already in these numbers. This is bone evidence: chest and belly wounds that missed bone left no mark. 24 of the 100 bones are blade cuts across the back of the neck, found on nearly every man; the authors think some may be executions of captives, so the neck is much higher here than in battle. For play, use the gameplay table, which leaves them out.

Status. Historical, from about 25 men killed in a sack, their remains left exposed for weeks before burial and partly disarticulated, so wounds cannot be matched to individuals or sides. A picture of a massacre after a city fell, not of a pitched battle.

Sources. Mikulski R.N.R., Schutkowski H., Smith M.J., Doumet-Serhal C. and Mitchell P.D., 'Weapon injuries in the crusader mass graves from a 13th century attack on the port city of Sidon (Lebanon)', PLoS ONE 16(8): e0256517 (2021), open access: S1 Table (elements with definite peri-mortem trauma by region). | Same study: more wounds on the back of the body than the front (men attacked as they fled); blows concentrated on the head, neck and shoulders, compatible with mounted attackers striking down at men on foot; one man had at least 12 injuries on 16 bones. | Tally: data/sources/sidon-1253-mass-graves.csv.

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Reading it. These weights are where blows LAND. Resolve armour separately with the target's kit (a mail hauberk for knights and many sergeants, padded coats for others).

Status. Corrections to the bone evidence: (1) The 24 blade cuts across the back of the neck are left out as probable executions of captives; the neck keeps a small share for battle blows. (2) Trunk raised to 30%: chest and belly wounds mostly miss bone (the evidence has 10 torso bones in 100). (3) Head kept near its share of the remaining bones (22%). (4) Arms lowered from 38% to 24% and legs and hips from 26% to 24% to make room for the trunk. Sides are not recorded, so left and right are near even.

Sources. Derived from sidon-1253-mass-graves (Mikulski et al. 2021, S1 Table).

Visby 1361

27 July 1361

King Valdemar IV Atterdag of Denmark invaded Gotland, then a rich trading island, and met its rural defenders outside the walls of Visby. The Gotlanders were a peasant levy facing professional troops, and the fight became a slaughter. The dead were buried quickly in mass graves, many still in their armour, which is why Visby gives the best picture of medieval battle wounds: 1,185 skeletons were recovered from three graves.

Sides and armour

Side	Who fought	How they used armour
Danish army	Professional soldiers of Valdemar IV.	Mail, coats of plates and plate helmets; the best-equipped wore gauntlets and leg harness. Few of their dead are in the graves.
Gotlandic levy	Farmers and freeholders of rural Gotland, called out to defend the island.	Uneven. Many wore mail coifs and padded coats; some had coats of plates and gauntlets; many had little or nothing on the legs, which took most of the blade wounds.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**Gotland levy** (picture)	Gotlandic levy	Gotland levy: mail coif, padded coat	Spear / lance	Coif and padded coat; legs bare.
	**Gotland freeholder** (picture)	Gotlandic levy	Gotland, better equipped: coif, coat of plates	Axe (hand or long-hafted)	Wealthier farmer in a coat of plates.
	**Danish man-at-arms** (picture)	Danish army	Danish man-at-arms (1361)	Sword (arming sword)	Fully harnessed professional.
	**Danish sergeant**	Danish army	Coat of plates and mail (c.1350)	Spiked club / morning star (knout)	Coat of plates and mail; the spiked club matches square holes in Visby skulls.
	**Danish crossbowman** (picture)	Danish army	Coat of plates and mail (c.1350)	Crossbow (bolts)	126 arrow and bolt wounds were found among the Gotland dead.

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Reading it. These weights are where blows left marks on bone, so the defenders' armour is already baked in (mail and shields kept blades off the torso). When using this table, do not also subtract torso armour - or use the adjusted table instead.

Status. PLACEHOLDER. Weights fitted to published summaries: lower legs (left heaviest) dominate, then skull, then arms; almost no blade marks on ribs. Replace with Ingelmark's per-bone counts when the chapter is available.

Sources. Thordeman, B. (ed.), Armour from the Battle of Wisby 1361, vol. I, 1939 - ch. IV, Ingelmark, B. E., 'The Skeletons', p. 149ff. (NOT YET READ - counts pending) | Summary figures: 1,185 individuals; 456 cut wounds; head wounds in 42.3% / 52.3% / 5.4% of graves 1-3 (Ingelmark, via Medievalists.net 2024). | Swedish History Museum: visible wounds concentrate on arms, legs and skulls; torso protected by mail and shields.

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Reading it. These weights are where blows LAND. Resolve armour separately using the location's armour slot (body.yaml). Use this table when your system tracks armour coverage.

Status. Corrections applied to the bone evidence: (1) Torso raised to ~27%: blows that mail stopped, and soft-tissue belly and chest wounds, leave no bone marks. (2) Thighs raised: deep muscle wounds often miss the femur. (3) Lower-leg dominance kept but reduced; the shield-side (left) bias kept. (4) Head lowered slightly: some skull wounds are blows struck after a man fell.

Sources. Derived from visby-1361-evidence.

Wars of the Roses

Towton, 29 March 1461

The Wars of the Roses (1455-1485) were fought between the houses of York and Lancaster for the English crown. At Towton in Yorkshire on Palm Sunday 1461, the Yorkist army of Edward IV defeated Henry VI's Lancastrians in a snowstorm, after an archery exchange and hours of fighting on foot; the Lancastrian army broke and was cut down in the rout. Contemporary claims of 28,000 dead are thought exaggerated, but it is often called the bloodiest battle fought in England. In 1996 building work at Towton Hall uncovered a mass grave of about 38 men, which gives the most detailed picture of medieval battle wounds yet recorded.

Sides and armour

Side	Who fought	How they used armour
Yorkists	Edward IV's army: his retinue and those of Warwick, Fauconberg and (late in the day) Norfolk.	Nobles and men-at-arms in full plate, fighting on foot; retainers in brigandines and sallets; archers and billmen in padded jacks and sallets.
Lancastrians	Henry VI's army under the Duke of Somerset, raised largely from the north.	The same mix as the Yorkists. The head wounds in the Towton grave suggest many of the dead had lost or taken off their helmets in the rout.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**Yorkist man-at-arms** (picture)	Yorkists	Full plate harness (c.1450)	Poleaxe (axe, hammer and spike)	Full harness, fighting on foot with the poleaxe.
	**Yorkist archer** (picture)	Yorkists	Jack and sallet (archer or billman, c.1460)	Longbow (English war bow, bodkin and broadhead arrows)	By the traditional account, shot with the wind and snow at his back.
	**Yorkist billman**	Yorkists	Jack and sallet (archer or billman, c.1460)	Bill (English bill, hooked polearm)	Jack, sallet and bill: the common infantryman.
	**Lancastrian man-at-arms** (picture)	Lancastrians	Full plate harness (c.1450)	Sword (arming sword)	Full harness; sword and dagger in the press.
	**Lancastrian retainer** (picture)	Lancastrians	Brigandine, sallet and arm splints (c.1460)	Bill (English bill, hooked polearm)	A lord's better-equipped retainer.
	**Lancastrian archer** (picture)	Lancastrians	Jack and sallet (archer or billman, c.1460)	Longbow (English war bow, bodkin and broadhead arrows)	By the traditional account, shot into the wind and fell short.

Foot (left)	legs	99-00	99-00	-	-	99-00	99-00

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Face and jaw (26) = 14.4%; Skull, left (48) = 26.7%; Skull, midline or both sides (21) = 11.7%; Skull, right (29) = 16.1%; Foot, left (3) = 1.7%; Forearm, left (4) = 2.2%; Forearm, right (5) = 2.8%; Pelvis (1) = 0.6%; Hand, left (8) = 4.4%; Hand, side not recorded (1) = 0.6%; Hand, right (13) = 7.2%; Knee, right (1) = 0.6%; Lower leg, left (2) = 1.1%; Neck (cervical vertebrae) (9) = 5.0%; Shoulder, left (2) = 1.1%; Shoulder, right (1) = 0.6%; Thigh, left (1) = 0.6%; Thigh, right (2) = 1.1%; Upper arm, left (2) = 1.1%; Upper arm, right (1) = 0.6% (n = 180). Counted wound by wound from the study's tables: 124 head wounds (79 blade, 32 blunt, 13 penetrating) on 31 skulls and 56 injured bones below the head (52 blade, 4 blunt). Head wounds are counted per wound and body injuries per bone, as published, so the body is slightly under-counted. Blade weapons roll on the blade wounds, the poleaxe on the blunt ones and the dagger on the penetrating ones (arrow, bolt, dagger and poleaxe-spike wounds to the skull). Bows use all the wounds together. Unsided skull wounds (frontal, occipital, both parietals) are shared between left and right.

Reading it. Armour is already in these numbers: the head wounds suggest many men had lost or taken off their helmets in the rout, and the wounds fall where they were unprotected. Do not also subtract armour on this table; use the all-hits table for play. This is bone evidence, so wounds to the chest and belly that touched no bone left no mark, and arrows (which mostly wounded soft tissue) are under-counted.

Status. Historical, from one grave of about 38 men killed in the rout after the battle. Their wounds are extreme: one man (skeleton 32) had 14 head wounds, many blows fell on the back of the skull and the neck, and the forearms and hands show defence wounds. It is a picture of men cut down while fleeing or after they fell, not of the fighting in the line.

Sources. Holst M. and Sutherland T., 'Towton Revisited - Analysis of the Human Remains from the Battle of Towton 1461', in Eickhoff S. and Schopper F. (eds), Schlachtfeld und Massengrab: Spektren interdisziplinärer Auswertung von Orten der Gewalt (Zossen 2014), pp. 97-129: Tab. 9 (post-cranial injuries) and Tab. 12 (peri-mortem cranial weapon trauma). | Same chapter: 36% of the skeletons had peri-mortem injuries below the head (56 in all), mostly to the hands and forearms; the back of the skull, left parietal and left frontal took the most blade wounds. Its text gives 33 blunt (25%) and 13 penetrating (10%) head wounds; its table lists 124 head wounds, which this table follows. | Fiorato V., Boylston A. and Knüsel C. (eds), Blood Red Roses: the archaeology of a mass grave from the Battle of Towton AD 1461 (Oxbow, 2000; 2nd ed. 2007): the original excavation and analysis (Novak, 'Battle-related trauma'). | Wound-by-wound tally: data/sources/towton-1461-mass-grave.csv.

Foot (right)	legs	00	00	00	00	-	00	00	00	00

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Spiked club: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Reading it. These weights are where blows LAND. Resolve armour separately with the target's kit: a man-at-arms in full harness, a retainer in brigandine and sallet, or an archer or billman in a jack.

Status. The bone evidence is 74% head and neck, 21% arms, 5% legs and almost no trunk. Corrections: (1) Trunk raised to 30%: blade, spike and arrow wounds to the chest and belly mostly miss bone, and the evidence shows almost none. (2) Head and neck lowered to 31%: many Towton skull wounds were struck after a man fell or lost his helmet in the rout (14 on one skull). (3) Arms kept at about a fifth, hands and forearms highest (defence wounds). (4) Legs raised to 18%: deep thigh wounds often miss the femur. The left-over-right skull bias (48 against 29 wounds) is kept.

Sources. Derived from towton-1461-mass-grave (Holst and Sutherland 2014, Tab. 9 and 12).

Thirty Years' War

1618-1648

A war of religion and power across the Holy Roman Empire: the Catholic Emperor and the Catholic League against Protestant princes, joined by Denmark, then Sweden under Gustavus Adolphus, and finally France. It was the age of pike and shot: squares of pikemen with musketeers on their flanks, and cavalry that fought with pistols and carbines as much as swords. At Lützen, near Leipzig, on 16 November 1632 the Swedes beat Wallenstein's imperial army but Gustavus Adolphus was killed. A mass grave of 47 men found there in 2011 is most likely part of the Swedish 'Blue Brigade', surprised in the flank by imperial cavalry; it is the source of this group's table.

Sides and armour

Side	Who fought	How they used armour
Sweden and Protestant allies	Swedish and Finnish troops and many German and Scottish mercenaries in Swedish pay, with Saxony and other Protestant states.	Pikemen wore helmets and corslets when they kept them; musketeers wore none; cavalry rode in buff coats with helmets and breastplates.
Imperial army and Catholic League	The Emperor's army under Wallenstein and Pappenheim, Bavaria and the Catholic League, and Croat light horse.	Cuirassiers in three-quarter plate, harquebusiers in buff coat and breastplate, pikemen in corslets; Croats and musketeers unarmoured.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**Blue Brigade musketeer** (picture)	Sweden and Protestant allies	Unarmoured	Matchlock musket	Matchlock and bandolier; clubs the musket in the press.
	**Swedish pikeman** (picture)	Sweden and Protestant allies	Pikeman: morion and corslet	Spear / lance	Pike about 5 m long.
	**Finnish hakkapeliitta**	Sweden and Protestant allies	Harquebusier: buff coat, breastplate, pot helmet	Sabre or broadsword	Light cavalry: pistols, then swords at the gallop.
	**Imperial cuirassier** (picture)	Imperial army and Catholic League	Cuirassier, three-quarter armour (1630s)	Wheellock pistol or carbine (cavalry)	Pappenheim's heavy horse; pistols at close range, aimed at the head.
	**Imperial harquebusier** (picture)	Imperial army and Catholic League	Harquebusier: buff coat, breastplate, pot helmet	Wheellock pistol or carbine (cavalry)	Carbine and pistols; most of the balls in the Lützen grave are carbine shot.
	**Croat light horseman**	Imperial army and Catholic League	Unarmoured	Sabre or broadsword	Raiders and skirmishers.

Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. frontal R; parietal R; occipital R (11) = 15.9%; frontal L; parietal L; occipital L (13) = 18.8%; facial L; facial centre; facial R (12) = 17.4%; cranial base; parietal centre; occipital centre (4) = 5.8%; lower limb R (4) = 5.8%; lower limb R (3) = 4.3%; lower limb L (2) = 2.9%; torso (1) = 1.4%; torso (1) = 1.4%; torso (1) = 1.4%; torso (2) = 2.9%; upper limb R (2) = 2.9%; upper limb L (3) = 4.3%; upper limb L (1) = 1.4%; lower limb R (1) = 1.4%; lower limb L (2) = 2.9%; torso (1) = 1.4%; upper limb L (1) = 1.4%; torso (4) = 5.8% (n = 69). Counted from the study's tables of reliable battle injuries (69: 32 projectile, 21 blunt, 16 sharp), each weapon rolling on its own mechanism's injuries. Sides are as recorded; injuries the authors only call probable are left out. Where a bone could belong to more than one location (vertebra, ribcage, cranial base), it is shared by body exposure.

What hit them? (d100)

d100	Cause
01-47	Lead ball (pistol, carbine, musket)
48-77	Blunt force (musket butt, hilt, horse)
78-00	Sharp force (sword, rapier, halberd)

Reading it. The men wore little or no armour ('insufficient head protection', the authors note), so armour can be applied. This is bone evidence: wounds to soft tissue, above all the belly and chest, left no mark, so the trunk is under-counted. Some blunt facial fractures may come from the burial rather than the battle. For play, use the all-hits table.

Status. Historical, from one small grave (47 men, 69 reliable injuries) and one moment of the battle: a cavalry charge with pistols and carbines aimed at the head, as contemporary instructions advised. Not a picture of the whole war.

Sources. Nicklisch N., Ramsthaler F., Meller H., Friederich S., Alt K.W., 'The face of war: Trauma analysis of a mass grave from the Battle of Lützen (1632)', PLoS ONE 12(5): e0178252 (2017), open access (PMC5439951): Tables 1, 3 and 4. | Same study: lead balls in the grave were mostly from carbines (12-14), then muskets (5) and pistols (1-3); 21 men had gunshot wounds to the head; the attack came mainly from the front and side. | Injury tally: data/sources/lutzen-1632-mass-grave.csv.

Close combat. Sabre, Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Musket butt, Pike, Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted* with Target has no shield applied. Artillery: roll location on *Napoleonic era - all hits (gameplay)*. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

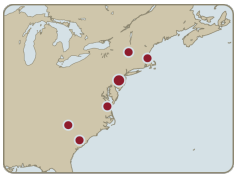

Reading it. Use this table for gunfire in play; armour applies (cuirassier, harquebusier and pikeman kits). Sabres and clubbed muskets roll on their own tables (the Peninsular records and the Visby melee table).

Status. Estimated. The killed part is real 1632 evidence but bone-only, so it under-counts trunk wounds; the wounded part is borrowed from a later war. Edit the share in tools/blend_tables.py if you prefer another.

Sources. Derived (tools/blend_tables.py): 74.5% peninsular-1808-14-officers (wounded) + 25.5% lutzen-1632-mass-grave (killed), location by location. | No wounded records survive for the Thirty Years' War; the Peninsular War officers' wounds (same smoothbore lead balls and swords, 180 years later) stand in. Killed share as for the Napoleonic blend (about 1 killed to 3 wounded).

American Revolution

1775-1783

The thirteen colonies, joined by France from 1778 and later Spain and the Dutch Republic, fought Britain for independence. Battles were fought with smoothbore muskets and bayonets at close range, with artillery firing round shot, grape and canister; riflemen picked off officers from cover; dragoons fought with the sabre. Bayonet charges decided many fights, and some ended in killings of men trying to surrender, such as Paoli (1777) and Waxhaws (1780). Peckham counted 7,174 Americans killed and 8,241 wounded in action. The tables here are tallied from the men disabled for life who claimed federal invalid pensions in 1792-95.

Sides and armour

Side	Who fought	How they used armour
Continental Army and militia	Continental regulars, state militia, riflemen, light dragoons, and the Continental Navy and privateers.	None. Officers wore a small gorget as a mark of rank; light dragoons wore leather helmets.
British Army and Loyalists	British regulars and marines, Loyalist provincial regiments and rangers, and the Royal Navy.	None. Grenadiers' bearskin caps and light infantry caps gave no protection; light dragoons wore crested leather helmets.
German auxiliaries	Regiments hired from Hesse-Kassel, Brunswick and other German states ('Hessians'), including Jäger riflemen.	None; grenadiers wore brass-fronted mitre caps, which were not armour.
French forces	Rochambeau's expeditionary army and the French navy, from 1778; decisive at Yorktown in 1781.	None.
Native nations	Warriors on both sides: most of the Mohawk, Seneca and Cherokee fought with Britain; the Oneida and Tuscarora with the Americans.	None. Musket, tomahawk and knife; raids and ambushes on the frontier.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**Continental infantryman** (picture)	Continental Army and militia	Unarmoured	Smoothbore musket (Brown Bess, Charleville)	Musket and bayonet.
	**Morgan's rifleman** (picture)	Continental Army and militia	Unarmoured	Flintlock rifle (Pennsylvania, Baker, Jäger)	Long rifle, slow to load, deadly at range; no bayonet.
	**Continental light dragoon**	Continental Army and militia	Dragoon or light dragoon helmet	Sabre or broadsword	Leather helmet and sabre.
	**British grenadier** (picture)	British Army and Loyalists	Unarmoured	Bayonet (musket or rifle)	The bayonet charge was the British infantry's favoured tactic.
	**Loyalist ranger**	British Army and Loyalists	Unarmoured	Smoothbore musket (Brown Bess, Charleville)	Frontier raids alongside Native allies.

Close combat. Bayonet, Sabre: roll location on *Peninsular War 1808-14 - French officers' wounds*. Musket butt, Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted* with Target has no shield applied. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head and scalp (24) = 6.3%; Face, eye, jaw (11) = 2.9%; Neck and throat (9) = 2.4%; Chest, breast and side (36) = 9.5%; Through the body (level not stated) (12) = 3.2%; Belly (8) = 2.1%; Hip, groin, testicles (18) = 4.7%; Back, shoulder blade (2) = 0.5%; Small of the back, loins (4) = 1.1%; Back, level not stated (9) = 2.4%; Shoulder and armpit (32) = 8.4%; Arm (not said which part) (49) = 12.9%; Upper arm and elbow (11) = 2.9%; Wrist and forearm (11) = 2.9%; Hand, fingers, thumb (32) = 8.4%; Thigh (40) = 10.6%; Knee (5) = 1.3%; Leg below the knee (55) = 14.5%; Foot, ankle, heel (11) = 2.9% (n = 379). Counted wound by wound from 344 men's entries (379 wounds whose site is named; 32 more not located). Sides are recorded for about half and were close to even (85 left, 99 right), so left and right are pooled and split by body exposure (design estimate). 'Arm' without more detail is shared between upper arm and forearm.

 © 2026 Scott Wares. All rights reserved.

What hit them? (d100)

d100	Cause
01-82	Musket or rifle ball, buck shot
83-90	Cannon ball, grape, shell
91-95	Bayonet
96-98	Sword, broadsword, horseman's sword
99-00	Musket butt or muzzle, blows

Reading it. Nobody wore armour, so these are hits before armour. But they are survivors with a lasting disability: wounds that killed (most head, chest and belly wounds) are missing, and limb wounds that left a man lame are over-represented. Use the all-hits table for play.

Status. Historical, from a pension roll rather than a battlefield count. Entries for sickness, ruptures, frostbite, falls, work accidents and accidental discharges were left out. The pattern (head and neck 12%, trunk 23%, arms 36%, legs 29%) is close to the Civil War wounded (11/18/36/35), which suggests the same survivor effect.

Sources. Federal Revolutionary War Invalid Pension Claims, 1792-1795 (573 veterans), Magazine of Early American Datasets, University of Pennsylvania, 2021; from the Secretary of War's lists printed in American State Papers, Claims, vol. 1. | Wound-by-wound tally: data/sources/revolution-invalid-pensions-1792-95.csv. The weapon mix counts the 251 wounds whose cause is stated.

Napoleonic Wars

1803-1815

France under Napoleon against shifting coalitions of Britain, Austria, Prussia, Russia, Spain and Portugal. In the Peninsular War (1808-1814) a British and Portuguese army under Wellington, with Spanish armies and guerrillas, drove the French out of Spain; the wound tables come from French officers' files of that war. The War of 1812 in North America, fought with the same weapons, has its own entry, which borrows these records.

Sides and armour

Side	Who fought	How they used armour
French Empire and allies	French line and light infantry, cavalry and artillery, with Polish, German and Italian allies.	Cuirassiers and carabiniers wore steel breastplates and backplates and helmets; dragoons wore brass helmets; infantry wore none.
Britain and Peninsular allies	Wellington's British and Portuguese army (including the 95th Rifles), Spanish regular armies and guerrillas.	None for infantry; heavy and light dragoons wore helmets. British Household Cavalry wore cuirasses only after 1815.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**French line infantryman** (picture)	French Empire and allies	Unarmoured	Smoothbore musket (Brown Bess, Charleville)	Charleville musket and bayonet.
	**French cuirassier** (picture)	French Empire and allies	Cuirassier: steel cuirass and helmet	Sabre or broadsword	Heavy cavalry: straight sword, breastplate and helmet.
	**Polish lancer** (picture)	French Empire and allies	Unarmoured	Cavalry lance	Vistula Legion lancers, feared at Albuera (1811).
	**British redcoat** (picture)	Britain and Peninsular allies	Unarmoured	Smoothbore musket (Brown Bess, Charleville)	Brown Bess and bayonet, firing in two-deep line.
	**95th rifleman** (picture)	Britain and Peninsular allies	Unarmoured	Flintlock rifle (Pennsylvania, Baker, Jäger)	Baker rifle; skirmisher and sniper.
	**British heavy dragoon** (picture)	Britain and Peninsular allies	Dragoon or light dragoon helmet	Sabre or broadsword	1796 heavy cavalry sword.
	**Spanish guerrilla** (picture)	Britain and Peninsular allies	Unarmoured	Smoothbore musket (Brown Bess, Charleville)	Ambushes of convoys and couriers.

Lower leg (left)	legs	79-86	79-86	79-86	75-83	97	95-97	97
Lower leg (right)	legs	87-94	87-94	87-94	84-92	98	98-00	98
Foot (left)	legs	95-97	95-97	95-97	93-96	99	-	99
Foot (right)	legs	98-00	98-00	98-00	97-00	00	-	00

Close combat. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Arm (bras) (678) = 17.0%; Hand (245) = 6.1%; Wrist (35) = 0.9%; Forearm (63) = 1.6%; Leg below the knee (621) = 15.5%; Thigh (687) = 17.2%; Hip (99) = 2.5%; Foot (201) = 5.0%; Knee (155) = 3.9%; Chest (169) = 4.2%; Head (390) = 9.8%; Eye (3) = 0.1%; Forehead (18) = 0.5%; Neck (46) = 1.2%; Cheek (42) = 1.1%; Jaw (41) = 1.0%; Abdomen (102) = 2.6%; Shoulder (341) = 8.5%; Buttock (16) = 0.4%; Back (10) = 0.3%; Loins (kidneys) (33) = 0.8% (n = 3,995). Location counts are from the source (3,995 wound events). Each weapon rolls on its own recorded distribution (musket 2,848, sword 284, bayonet 97, lance 43, ordnance 209 wounds). Left and right are not recorded and are split evenly; 'arm' (bras) is put on the upper arm because wrist and forearm are listed apart. Rifles and pistols use the musket data.

What hit them? (d100)

d100	Cause
01-77	Musket, rifle and pistol
78-85	Artillery (shell, round shot, canister, grape)
86-92	Sabre and sword
93-95	Bayonet
96	Lance
97-00	Contusion (spent ball, blow, fall)

Reading it. Almost no one wore body armour (cuirassiers and carabiniers had steel cuirasses, and dragoons and heavy cavalry helmets), so armour can be applied. The records are of men who survived far more often than of men killed (146 killed and 84 died of wounds against 4,129 wounded), so head and trunk hits from gunfire are under-counted: use the all-hits table for gunfire in play. Edged weapons rarely killed (8 deaths among 424 sword, bayonet and lance casualties), so their columns are close to every hit they made.

Status. Historical. French officers, so mounted officers and men in the front rank are over-represented; the rank-and-file sample was hit in the head more often (24%). Tables 7 and 8 were read from the article's table images.

Sources. Foot (right)	legs	99-00	99-00	99-00	99-00

Close combat. Sabre, Bayonet, Lance: roll location on *Peninsular War 1808-14 - French officers' wounds*. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Reading it. Use this table for play. Armour applies (cuirassiers' breastplates and cavalry helmets). Sabres, bayonets and lances roll on the Peninsular records, where edged weapons rarely killed, so those records already include nearly every edged hit.

Status. Estimated. The Peninsular records hold only 146 killed outright (head and chest most often), too few to use, so the Civil War killed-in-action table (also soft lead balls) stands in for the dead. Edit the share in tools/blend_tables.py if you prefer another.

Sources. Derived (tools/blend_tables.py): 74.5% peninsular-1808-14-officers + 25.5% acw-1861-killed, location by location. | Killed share: about one killed for every three wounded in the Anglo-allied army at Waterloo (about 3,500 killed and 10,200 wounded; approximate, commonly cited totals).

War of 1812

1812-1815

The United States fought Britain and its Canadian colonies, and Tecumseh's confederacy of Native nations, on the Great Lakes frontier, in the Chesapeake and at New Orleans. The weapons were those of the Napoleonic Wars: smoothbore muskets and bayonets, rifles, sabres and smoothbore artillery. Much of the fighting was in woods and from cover, riflemen were common on both sides, no one wore armour, and many British regulars of 1814-15 were Peninsular veterans. US forces lost about 2,260 killed in action and 4,505 wounded. No count of wounds by body region has been found for this war, so its table borrows the Peninsular War records; every place on the map is a hollow dot for that reason.

Sides and armour

Side	Who fought	How they used armour
United States (1812-15)	US regulars, state militia (including Kentucky riflemen), US Navy and Marines.	None; some light dragoons wore leather helmets.
British North America (1812-15)	British regulars, Canadian fencibles and militia, the Royal Navy, and the Provincial Marine.	None.
Tecumseh's confederacy	Shawnee, Potawatomi, Kickapoo and other nations under Tecumseh, allied with Britain until his death at the Thames (1813).	None. Musket, rifle, tomahawk and war club.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**US regular, 1814** (picture)	United States (1812-15)	Unarmoured	Smoothbore musket (Brown Bess, Charleville)	Chippawa and Lundy's Lane; Springfield musket.
	**Kentucky militia rifleman** (picture)	United States (1812-15)	Unarmoured	Flintlock rifle (Pennsylvania, Baker, Jäger)	River Raisin, the Thames, New Orleans.
	**British regular, 1814** (picture)	British North America (1812-15)	Unarmoured	Smoothbore musket (Brown Bess, Charleville)	Often a Peninsular veteran.
	**Canadian militiaman**	British North America (1812-15)	Unarmoured	Smoothbore musket (Brown Bess, Charleville)	Sedentary or embodied militia.
	**Shawnee warrior** (picture)	Tecumseh's confederacy	Unarmoured	Axe (hand or long-hafted)	Tomahawk and musket.

Sources. No wound-by-location record found for the War of 1812; the table borrows the Peninsular War data (Planas Campos and Grajal de Blas, British Journal for Military History 7(3), 2021). US losses of about 2,260 killed in action and 4,505 wounded: commonly cited totals (e.g. New World Encyclopedia, 'War of 1812'); British and Canadian losses are usually given only combined (about 4,400 killed or wounded). Sides, armour and dress: general historical knowledge, not from the wound data.

Knee (right)	legs	86	86	86	86
Lower leg (left)	legs	87-91	87-91	87-91	87-91
Lower leg (right)	legs	92-96	92-96	92-96	92-96
Foot (left)	legs	97-98	97-98	97-98	97-98
Foot (right)	legs	99-00	99-00	99-00	99-00

Close combat. Sabre, Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Reading it. Use this table for play. No armour was worn in North America (some light dragoons had leather helmets), so leave it off. For a tomahawk or war club use the axe or spiked club, which roll on the Visby close-combat data. Much woodland and skirmish fighting makes 'behind cover' common.

Status. Estimated and borrowed. No count of wounds by body region has been found for the War of 1812. The weapons and drill were those of the Napoleonic Wars and many British regulars were Peninsular veterans, so the French officers' records stand in for the wounded and the Civil War killed-in-action table (also soft lead balls) for the dead. Edit the share in tools/blend_tables.py if you prefer another.

Sources. Derived (tools/blend_tables.py): 66.6% peninsular-1808-14-officers + 33.4% acw-1861-killed, location by location. | Killed share: US forces lost about 2,260 killed in action and 4,505 wounded (commonly cited totals; British and Canadian losses are usually given only combined). | Peninsular War records: Planas Campos and Grajal de Blas, British Journal for Military History 7(3), 2021.

Crimean War

1854-1856

Britain, France, the Ottoman Empire and from 1855 Sardinia fought Russia, chiefly in the Crimea. After the Alma, Balaklava and Inkerman (1854) the war became the siege of Sevastopol, the Black Sea naval base: eleven months of trenches, batteries and assaults on the Mamelon, the Redan and the Malakoff, until the Russians left the town in September 1855. The allied infantry carried percussion rifle-muskets firing the Minié bullet, most Russians still smoothbore muskets; smoothbore guns and mortars threw round shot, shell and grape. No one wore armour. The table is the British surgeons' count of the wounded of the siege, from April 1855 to the end of the war; the British lost 2,598 rank and file killed in action in the whole war.

Sides and armour

Side	Who fought	How they used armour
British Army (1854-56)	Regular infantry of the line, Guards and Highlanders, rifle battalions, cavalry, Royal Artillery and Royal Engineers, and the Naval Brigade's guns.	None.
French Army (1854-56)	Line infantry, chasseurs a pied, Zouaves and Algerian tirailleurs, artillery and engineers; the largest allied army in the siege.	None (cuirassiers did not serve in the Crimea).
Russian Army (1854-56)	Line and Black Sea Fleet sailors manning the bastions of Sevastopol, field armies, Cossacks.	None.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**British infantryman, 1855**	British Army (1854-56)	Unarmoured	Rifle-musket (Minie ball)	Minie or Enfield rifle-musket; a winter in the trenches before Sevastopol.
	**Royal Artillery gunner**	British Army (1854-56)	Unarmoured	Smoothbore artillery (round shot, canister, grape, shell)	Siege batteries and the Naval Brigade's guns.
	**Light cavalryman**	British Army (1854-56)	Unarmoured	Sabre or broadsword	Balaklava, 1854.
	**Zouave**	French Army (1854-56)	Unarmoured	Rifle-musket (Minie ball)	Stormed the Mamelon and the Malakoff.
	**Russian infantryman**	Russian Army (1854-56)	Unarmoured	Smoothbore musket (Brown Bess, Charleville)	Most still had smoothbore percussion muskets.

 © 2026 Scott Wares. All rights reserved.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**Black Sea Fleet sailor on the bastions**	Russian Army (1854-56)	Unarmoured	Bayonet (musket or rifle)	Sailors manned much of Sevastopol's defences.

Where British rank and file were hit by gunfire (% of known regions)

	1854-55	Siege	Ratio
Head	8.2	12.2	1.49
Face	5.0	7.6	1.54
Neck	2.5	1.8	0.72
Chest	6.3	6.0	0.96
Abdomen	4.0	3.4	0.85
Perineum	0.6	0.8	1.32
Back and spine	3.3	4.7	1.40
Limbs	70.1	63.5	0.91

1854-55: 14 September 1854 to 31 March 1855 (the Alma, Balaklava, Inkerman and the first winter); siege: 1 April 1855 to the end of the war; ratio: siege share over the earlier one. 2,515 and 6,984 gunshot wounds of known region (Returns Nos. 1 and 3). The earlier period also holds the first winter in the trenches, so the contrast between siege and open-field fighting is if anything understated; 1,815 of its wounded have no record of region. Men firing over parapets and lying flat under shellfire were hit more often in the head, face and back.

Close combat. Sabre, Bayonet, Lance: roll location on *Peninsular War 1808-14 - French officers' wounds*. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head (851) = 12.2%; Face (533) = 7.6%; Neck (128) = 1.8%; Chest (420) = 6.0%; Abdomen and pelvis (235) = 3.4%; Perineum and genito-urinary organs (55) = 0.8%; Back and spine (326) = 4.7%; Upper extremities (2,083, and 75 of the 155 arteries, nerves and joints) = 30.9%; Lower extremities (2,198, and 80 of the 155 arteries, nerves and joints) = 32.6% (n = 6,984). Region totals are from the source: 6,984 gunshot wounds of known region (with 167 sword, bayonet and miscellaneous wounds left out). The split inside each region uses body exposure (design estimate). The 155 wounds of the larger arteries, nerves and joints of the limbs are shared between arms and legs as the other limb wounds are.

Reading it. Records of the wounded. Many men hit in the trenches who would have died on an open field reached the hospitals alive and died there, so head and chest wounds are better counted than in most wounded tables (a fifth of the head wounds and over a quarter of the chest wounds died), but the instantly killed are still missing: use the all-hits table in play. No armour was worn. These are men in a siege: more often hit in the head and face, and in the back (lying flat under shellfire), less often in the limbs, than in field battles.

Status. Historical at region level, from a public-domain official report (1858; scanned by the US National Library of Medicine, on the Internet Archive). The joints' count is the extremities' total less the four other lines, as the scan of that line is unreadable.

Close combat. Sabre, Bayonet, Lance: roll location on *Peninsular War 1808-14 - French officers' wounds*. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

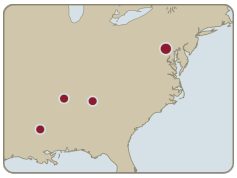

Reading it. Use this table for play. No armour was worn, so leave it off. The wounded it is built on were mostly hit in the siege works, so it already leans to the head and face; for an open field fight (the Alma, Inkerman) it overstates them a little.

Status. Estimated. No count of the killed by region survives for the Crimea, so the Civil War killed-in-action table (also soft lead bullets from rifle-muskets) stands in for the dead. Edit the share in tools/blend_tables.py if you prefer another.

Sources. Derived (tools/blend_tables.py): 81.7% crimea-1855-56-siege + 18.3% acw-1861-killed, location by location. | Killed share: 2,598 British rank and file killed in action in the whole war (Medical and Surgical History of the British Army ... in the Crimea, 1858, vol. 2, Concluding Observations) against 11,595 treated for wounds received in action (Returns Nos. 1 and 3: 4,434 and 7,161).

American Civil War

1861-1865

The United States (Union) against the seceded Confederate States. Most wounds came from the rifle-musket firing soft lead conoidal balls, which shattered bone and led to the war's many amputations. Artillery, especially canister at close range, did the rest; sabre and bayonet wounds were rare.

Sides and armour

Side	Who fought	How they used armour
Union	US Regular Army and state volunteer regiments.	None issued. In 1862 private 'bullet-proof vests' (Atwater, G&D; Cook) sold by the thousand; at about 8 lb most were thrown away on the march, and wearing one was thought unmanly.
Confederacy	Confederate States Army and state troops.	None issued; private vests were rarer still.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**Union infantryman** (picture)	Union	Unarmoured	Rifle-musket (Minie ball)	Springfield rifle-musket, no armour.
	**Union volunteer with steel vest, 1862** (picture)	Union	Private steel vest (Civil War, 1862)	Rifle-musket (Minie ball)	One of the few who kept his vest.
	**Confederate cavalryman** (picture)	Confederacy	Unarmoured	Revolver	Revolver and sabre.
	**Confederate infantryman** (picture)	Confederacy	Unarmoured	Rifle-musket (Minie ball)	Enfield or Springfield rifle-musket, no armour.
	**Union cavalryman** (picture)	Union	Unarmoured	Sabre or broadsword	Sabre charge; carbine and revolver as well.

Sources. Antietam on the Web, 'Saved by his steel vest' (2018): Atwater and G&D; Cook vests, sales and use.

Quick-play: men down per 100 tries

Men down per 100 tries, at attack 30 / 45 / 60 / 75 against regular men with no parry; green men x1.25, veterans x0.77; against a parry, x(1 - parry% x 0.9).

Weapon	Unarmoured	Private steel vest (Civil War, 1862)
Rifle-musket (Minie ball)	5 / 11 / 21 / 31	4 / 12 / 21 / 31
Revolver	5 / 12 / 21 / 31	4 / 10 / 18 / 27
Sabre or broadsword	6 / 13 / 21 / 30	6 / 13 / 20 / 29

American Indian Wars

1862-1871 (arrow reports)

After the Civil War the US Army garrisoned the Plains and the Southwest and fought a long series of campaigns against the nations whose land the railways and settlers were entering: on the Plains the Lakota (Sioux), Cheyenne, Arapaho, Kiowa and Comanche; in Arizona, New Mexico and Texas the Apache, Navajo and Lipan. Most fights were raids, ambushes of herders, mail escorts and wagon trains, and skirmishes between small parties. Warriors used firearms when they could get them; younger and poorer men still fought with the bow, which in skilled hands loosed several arrows in the time a soldier reloaded. The Army's surgeons wrote up 83 arrow cases from 1865-71; the table here is tallied from them.

Sides and armour

Side	Who fought	How they used armour
US Army	Regular cavalry and infantry posted to frontier forts, with Indian scouts and civilian herders, teamsters and settlers.	None. Wool uniform; the cavalry fought mounted or dismounted with carbine, revolver and sabre.
Plains and Southwest nations	Lakota, Cheyenne, Arapaho, Kiowa, Comanche, Apache, Navajo and Lipan warriors, in raiding and war parties.	None worn. Many warriors carried a round shield of thick rawhide (buffalo hide on the Plains), which could turn an arrow or a glancing ball.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**Plains warrior with bow** (picture)	Plains and Southwest nations	Rawhide shield, no armour (Plains warrior)	Bow (war arrows)	Iron trade-hoop or flint arrowheads; several arrows in quick succession.
	**Comanche lancer** (picture)	Plains and Southwest nations	Rawhide shield, no armour (Plains warrior)	Spear / lance	Mounted with lance and shield.
	**Apache raider**	Plains and Southwest nations	Unarmoured	Bow (war arrows)	Ambush from cover; hoop-iron arrowheads.
	**US cavalry trooper** (picture)	US Army	Unarmoured	Revolver	No arrow-era gunshot table exists; his revolver rolls on a Civil War table.
	**US infantryman**	US Army	Unarmoured	Rifle-musket (Minie ball)	Springfield rifle (rolls on a Civil War table).
	**Indian scout** (picture)	US Army	Unarmoured	Bow (war arrows)	Several scouts in the reports were themselves hit by arrows.

Sources. US Surgeon General's Office, Circular No. 3 (1871), 'Arrow-Wounds', pp. 144-161 (archive.org: reportofsurgical00unituoft). Places, tribes, units and the note on firearms and bows are from the case reports and Dr. Muller's note there. Rawhide shields: general ethnographic description, not from the report.

Indian Wars 1865-71 - arrow wounds (US Army surgeons)

Soldiers, scouts and civilians hit by arrows on the Plains and in the Southwest, mostly 1866-70. Killed and wounded together.

Confidence: **Historical - taken directly from a source**. Armour: **allowed**.

Location	Zone	Bow
Skull (left)	head	01-03
Skull (right)	head	04-06
Face	head	07-08
Neck	head	09-11
Chest (left)	torso	12-21
Chest (right)	torso	22-31
Abdomen	torso	32-37
Groin / pelvis	torso	38-44
Upper back	torso	45-56
Lower back	torso	57-62
Shoulder (left)	arms	63-65
Shoulder (right)	arms	66-68
Upper arm (left)	arms	69-75
Upper arm (right)	arms	76-82
Forearm (left)	arms	83-85
Forearm (right)	arms	86-88
Hand (left)	arms	89-90
Hand (right)	arms	91-92
Thigh (left)	legs	93-94
Thigh (right)	legs	95-96
Knee (left)	legs	97
Knee (right)	legs	98
Lower leg (left)	legs	99
Lower leg (right)	legs	00

Close combat. Rifle-musket, Breech-loader, Revolver, Artillery: roll location on *Civil War 1861-65 - all hits (gameplay)*. Sabre, Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Skull and scalp (8) = 6.6%; Face (3) = 2.5%; Neck (3) = 2.5%; Chest, front and sides (24) = 19.7%; Upper back (13) = 10.7%; Lower back, lumbar (6) = 4.9%; Back, level not stated (2) = 1.6%; Abdomen (7) = 5.7%; Groin, hip, buttock, pelvis (9) = 7.4%; Shoulders and armpit (7) = 5.7%; Upper arms and elbows (16) = 13.1%; Forearms (8) = 6.6%; Hands (5) = 4.1%; Thighs (6) = 4.9%; Knees (2) = 1.6%; Lower legs and feet (3) = 2.5% (n = 122). Counts are tallied wound by wound from the report's 83 cases (122 arrow wounds whose site is given; 12 more are not located). Left and right are pooled because the sample is small, then split by body exposure (design estimate).

Reading it. The men hit wore no armour, so these are hits before armour: armour can be applied. A mounted man's legs are partly covered by the horse, and many of these men were cavalry; that is one reason leg hits are rare here (9%) while Visby's arrow wounds were mostly in the legs.

Status. Historical, but a collection of case reports, not a census: striking trunk and skull cases were more likely to be written up. The 40 cases taken from routine casualty lists (none fatal) are less biased and still show 40% of wounds in the trunk. Several of the men had been hit by 3 to 9 arrows each.

Sources. US Surgeon General's Office, Circular No. 3: A Report of Surgical Cases Treated in the Army of the United States from 1865 to 1871 (Washington, 1871), 'Arrow-Wounds', pp. 144-161, cases 451-487. Full text: archive.org item reportofsurgical00unituoft. | Same report, p. 161: of 83 cases, 26 'proved fatal', including nearly all that entered the skull, chest or abdomen; 7 of 9 penetrating abdominal wounds were fatal. | Wound-by-wound tally: data/sources/indian-wars-arrows-1865-71.csv.

WWI

1914-1918

The Allied powers (France, the British Empire, Russia, Italy, and from 1917 the United States) against the Central Powers (Germany, Austria-Hungary, the Ottoman Empire and Bulgaria). Trench warfare made artillery the main killer and the head the most exposed target, which drove the return of the steel helmet.

Sides and armour

Side	Who fought	How they used armour
Allies	French, British Empire, Russian, Italian and American armies.	Cloth caps and kepis in 1914. Steel helmets from 1915-16: the French Adrian, then the British Brodie. A little private-purchase body armour; Italian assault engineers used heavy plate.
Central Powers	German, Austro-Hungarian, Ottoman and Bulgarian armies.	German Stahlhelm from 1916. Heavy Sappenpanzer breastplates for sentries and machine gunners in fixed positions.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**French poilu, 1914** (picture)	Allies	Unarmoured	Service rifle (bolt or semi-auto, 1914-53)	Kepi, no helmet yet.
	**British infantryman, 1916** (picture)	Allies	Steel helmet only (1915-1950s rifleman)	Service rifle (bolt or semi-auto, 1914-53)	Brodie helmet, Lee-Enfield.
	**German machine gunner** (picture)	Central Powers	Steel helmet and Sappenpanzer (WWI German sentry)	Machine gun	Stahlhelm and Sappenpanzer in a fixed position.
	**Trench raider, 1917** (picture)	Allies	Steel helmet only (1915-1950s rifleman)	Sharpened entrenching tool (spade)	Night raid: sharpened spade, revolver and grenades; no rifle in the trench.
	**Russian infantryman, 1915** (picture)	Allies	Unarmoured	Bayonet (musket or rifle)	Most Russian soldiers had no steel helmet; the army set great store by the bayonet.
	**Italian Ardito, 1918** (picture)	Allies	Steel helmet only (1915-1950s rifleman)	Hand grenade	Assault trooper: Adrian helmet, grenades and dagger.
	**American doughboy, 1918** (picture)	Allies	Steel helmet only (1915-1950s rifleman)	Service rifle (bolt or semi-auto, 1914-53)	M1917 (Brodie-pattern) helmet, Springfield rifle.

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Spade, Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted* with Target has no shield applied. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head, neck, face 17%; Thorax 4%; Abdomen 2%; Upper extremities (40% of extremity) 28%; Lower extremities (60% of extremity) 42%. Region totals are from the source. The split inside each region uses body exposure (design estimate). Extremities are split 40% arms / 60% legs, the average of the WWII, Korea and Vietnam hospital figures in Neel (1973) Table 7 (design estimate).

Reading it. Primary penetrating wound of casualties; mostly survivors who reached care, so instant kills are under-counted.

Status. Historical at region level (primary penetrating wounds). The source lists 7% 'other' (not located); it is left out and the rest normalised.

Sources. Borden Institute, Weapons Effects and War Wounds, ch. 1, Table 1-2: anatomical distribution of primary penetrating wounds (%): head/neck/face 17, thorax 4, abdomen 2, extremity 70, other 7.

WWII

1939-1945 (Bougainville 1943-45; Italy 1943-45)

The Allies against the Axis. This group's tables come from two theatres: the jungle campaign on Bougainville in the Solomon Islands (US Marines and Army against the Imperial Japanese Army) and the Italian campaign (US, British and Commonwealth forces against the German army). Mortars and artillery caused half of the Bougainville wounds.

Sides and armour

Side	Who fought	How they used armour
Allies	US Army and Marine Corps; British and Commonwealth armies in Italy; the Australian army, which took over Bougainville from late 1944.	Steel helmets (M1, Brodie) for all infantry, no body armour. Bomber crews wore steel-plate flak vests from 1943.
Axis	Imperial Japanese Army; German Wehrmacht.	Steel helmets (Japanese Type 90, German Stahlhelm); no infantry body armour.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**US Marine, Bougainville** (picture)	Allies	Steel helmet only (1915-1950s rifleman)	Service rifle (bolt or semi-auto, 1914-53)	M1 helmet, M1 Garand.
	**Japanese infantryman** (picture)	Axis	Steel helmet only (1915-1950s rifleman)	Hand grenade	Type 90 helmet; grenades and knee mortars at close range.
	**German MG gunner, Italy** (picture)	Axis	Steel helmet only (1915-1950s rifleman)	Machine gun	Stahlhelm, MG 42.
	**US bomber waist gunner** (picture)	Allies	Aircrew flak vest and helmet (WWII bomber crew)	Machine gun	Flak vest and helmet; not an infantry kit.
	**British infantryman, Italy** (picture)	Allies	Steel helmet only (1915-1950s rifleman)	Service rifle (bolt or semi-auto, 1914-53)	Brodie helmet, Lee-Enfield; Eighth Army.
	**Australian infantryman, Bougainville 1945** (picture)	Allies	Unarmoured	Pistol or submachine gun	Often a slouch hat rather than a helmet in the jungle; Owen submachine gun.
	**German paratrooper, Cassino** (picture)	Axis	Steel helmet only (1915-1950s rifleman)	Pistol or submachine gun	Rimless paratrooper helmet, MP 40; fought as infantry.

Reading it. Survivors only: head and trunk are under-counted because those hits killed. Pair with the killed table, or use the all-hits table. Steel helmets were worn.

Status. Historical at region level (counts quoted from the study via a secondary post; the NLM scan is the primary). Abdomen is taken to include the lower back and pelvis.

Sources. Oughterson et al., Wound Ballistics study of the Bougainville campaign (US Army Medical Department, 1944; NLM scan nlmuid-46921110R): living wounded by region - head, face, neck 240; chest 144; abdomen 66; upper extremities 319; lower extremities 393. Excludes 332 multi-region wounds and 547 minor wounds returned to duty.

Bougainville 1944 - killed

US soldiers killed by single-region missile wounds, Bougainville, 1944 (294 men).

Confidence: **Historical - taken directly from a source**. Armour: **already reflected, do not apply**. Weapon columns differ, but across the weapon mix below they average back to the source totals.

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Spade, Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted* with Target has no shield applied. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head, face, neck (144) = 49.0%; Chest (87) = 29.6%; Abdomen (48) = 16.3%; Upper extremities (1) = 0.3%; Lower extremities (14) = 4.8% (n = 294). Region counts are from the source. The split inside each region uses body exposure (design estimate).

What hit them? (d100)

d100	Cause
01-33	Service rifle (bolt or semi-auto, 1914-53)
34-83	Mortar, rocket or artillery
84-95	Hand grenade
96-97	Mine, booby trap or IED
98-00	Other

Borden Institute, Weapons Effects and War Wounds, Table 1-1: causes of battle injury, Bougainville

Reading it. Where the killing wound was. Use for fatal hits only.

Status. Historical at region level. Small sample (294).

Sources. Oughterson et al., Bougainville wound ballistics study (1944): killed by region - head, face, neck 144; chest 87; abdomen 48; upper extremities 1; lower extremities 14.

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Spade, Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted* with Target has no shield applied. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head, face, neck (384) = 26.4%; Chest (231) = 15.9%; Abdomen (114) = 7.8%; Upper extremities (320) = 22.0%; Lower extremities (407) = 28.0% (n = 1,456). Region counts are from the source (wounded + killed). The split inside each region uses body exposure (design estimate).

What hit them? (d100)

d100	Cause
01-33	Service rifle (bolt or semi-auto, 1914-53)
34-83	Mortar, rocket or artillery
84-95	Hand grenade
96-97	Mine, booby trap or IED
98-00	Other

Borden Institute, Weapons Effects and War Wounds, Table 1-1: causes of battle injury, Bougainville

 © 2026 Scott Wares. All rights reserved.

Reading it. The closest thing in the data set to 'where bullets and fragments land'. Unlike the Civil War blend, this needs no assumed ratio: the study counted both groups. Share of hits that killed: head/face/neck 37.5%, chest 37.7%, abdomen 42.1%, arms 0.3%, legs 3.4%.

Status. Historical at region level. Still excludes multi-region and minor wounds.

Sources. Oughterson et al., Bougainville wound ballistics study (1944): totals by region - head, face, neck 384; chest 231; abdomen 114; upper extremities 320; lower extremities 407 (20.2% killed overall).

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Spade, Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted* with Target has no shield applied. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head and neck 21%; Thorax 14%; Abdomen 8%; Upper extremities (40% of 58) 23.2%; Lower extremities (60% of 58) 34.8%. Region totals are from the source. Extremities split 40% arms / 60% legs, the average of the WWII, Korea and Vietnam hospital figures in Neel (1973) Table 7 (design estimate), the same rule for every table in this set. The split inside each region uses body exposure (design estimate).

What hit them? (d100)

d100	Cause
01-27	Service rifle (bolt or semi-auto, 1914-53)
28-00	Fragments, unspecified (shell, grenade, mine)

Owens et al. 2008 (National Academies 2014, Table 3-4): share of injuries from gunshot vs explosion

Reading it. Hospitalized casualties including those who later died of wounds; men killed outright are not counted, so head and trunk are still under-counted.

Status. Historical at region level. One of four tables from the same source with the same counting rule (see the comparison on the Reference page) (hospitalizations, including men who later died of wounds), same extremity split.

Korea

1950-1953

The United Nations Command, led by the United States with South Korea, the British Commonwealth and others, against North Korea and, from late 1950, the Chinese People's Volunteer Army. Fighting swung from mobile war to static trench lines, where body armour first came into general use.

Sides and armour

Side	Who fought	How they used armour
UN Command	US, South Korean, British Commonwealth and other UN forces.	Steel helmets. The US Marines fielded the M1951 vest with Doron plates; the Army's nylon M-1952 reached front-line troops in late 1952, in small numbers.
North Korea and China	Korean People's Army; Chinese People's Volunteer Army.	No body armour; many Chinese soldiers had no steel helmet.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**US Army rifleman, 1950** (picture)	UN Command	Steel helmet only (1915-1950s rifleman)	Service rifle (bolt or semi-auto, 1914-53)	M1 helmet, no vest.
	**US Marine, 1952** (picture)	UN Command	M1 helmet, Doron vest (USMC M1951/M1955, 1951-75)	Service rifle (bolt or semi-auto, 1914-53)	M1951 Doron vest.
	**South Korean infantryman** (picture)	UN Command	Steel helmet only (1915-1950s rifleman)	Service rifle (bolt or semi-auto, 1914-53)	ROK Army: M1 helmet, M1 Garand.
	**British infantryman, Imjin 1951** (picture)	UN Command	Steel helmet only (1915-1950s rifleman)	Service rifle (bolt or semi-auto, 1914-53)	Commonwealth brigade: steel helmet, Lee-Enfield.
	**North Korean infantryman, 1950**	North Korea and China	Unarmoured	Service rifle (bolt or semi-auto, 1914-53)	Korean People's Army: Soviet-pattern kit, often no steel helmet; Mosin rifle or PPSh.
	**Chinese infantryman** (picture)	North Korea and China	Unarmoured	Pistol or submachine gun	Quilted uniform, PPSh submachine gun, grenades.

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Spade, Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted* with Target has no shield applied. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head and neck 17%; Thorax 7%; Abdomen 7%; Upper extremities 30%; Lower extremities 37%. Region totals are from the source. The split inside each region uses body exposure (design estimate).

What hit them? (d100)

d100	Cause
01-27	Service rifle (bolt or semi-auto, 1914-53)
28-88	Fragments, unspecified (shell, grenade, mine)
89-92	Mine, booby trap or IED
93-00	Other

Neel (1973) Table 6: wounds by agent, Korea

Reading it. Hospitalized casualties: men killed outright are missing, so head and trunk are under-counted.

Status. Historical at region level. 2% other/multiple left out and the rest normalised.

 © 2026 Scott Wares. All rights reserved.

Sources. Neel, S., Medical Support of the U.S. Army in Vietnam 1965-1970 (Dept of the Army, 1973), ch. 3, Table 7: location of wounds in hospitalized casualties (%): Korea - head and neck 17, thorax 7, abdomen 7, upper extremities 30, lower extremities 37, other/multiple 2. | Neel (1973) Table 6, Korea: deaths 33% small arms, 59% fragments, 4% mines; wounds 27% small arms, 61% fragments, 4% mines.

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Spade, Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted* with Target has no shield applied. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head and neck 21%; Thorax 10%; Abdomen 9%; Upper extremities (40% of 60) 24%; Lower extremities (60% of 60) 36%. Region totals are from the source. Extremities split 40% arms / 60% legs, the average of the WWII, Korea and Vietnam hospital figures in Neel (1973) Table 7 (design estimate), the same rule for every table in this set. The split inside each region uses body exposure (design estimate).

What hit them? (d100)

d100	Cause
01-31	Service rifle (bolt or semi-auto, 1914-53)
32-00	Fragments, unspecified (shell, grenade, mine)

Owens et al. 2008 (National Academies 2014, Table 3-4): share of injuries from gunshot vs explosion

Reading it. Hospitalized casualties including those who later died of wounds; men killed outright are not counted, so head and trunk are still under-counted.

Status. Historical at region level. One of four tables from the same source with the same counting rule (see the comparison on the Reference page) (hospitalizations, including men who later died of wounds), same extremity split.

Vietnam

1965-1973 (major US involvement)

South Vietnam, the United States and allies (Australia, New Zealand, South Korea, Thailand) against North Vietnam's army (PAVN) and the southern Viet Cong. Most wounds came from fragments; mines and booby traps caused 15% of wounds and punji stakes 2%, while bullets killed far more often than they wounded.

Sides and armour

Side	Who fought	How they used armour
US and allies	South Vietnamese army (ARVN), US Army and Marine Corps, and Australian, New Zealand, South Korean and Thai contingents.	M1 steel helmet; Army M69 nylon vest, Marine M1955 vest with Doron plates. Both stopped fragments, not AK rounds, and in the heat they were often left behind on patrol.
PAVN and Viet Cong	People's Army of Vietnam regulars; Viet Cong guerrillas.	None. The PAVN pith helmet gave no ballistic protection. They relied on concealment, mines and booby traps.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**US Army infantryman, 1968** (picture)	US and allies	M1 helmet, nylon flak vest (US Army M1952/M69, 1952-75)	Assault rifle (M16, AK)	M1 helmet, M69 vest, M16.
	**US Marine, Hue 1968** (picture)	US and allies	M1 helmet, Doron vest (USMC M1951/M1955, 1951-75)	Assault rifle (M16, AK)	M1955 vest, urban fighting.
	**ARVN infantryman** (picture)	US and allies	Steel helmet only (1915-1950s rifleman)	Assault rifle (M16, AK)	South Vietnamese army: M1 helmet, usually no vest; M16 from 1968, carbines before.
	**Australian infantryman, 1968** (picture)	US and allies	Unarmoured	Assault rifle (M16, AK)	Bush hat, no body armour; L1A1 SLR.
	**South Korean marine** (picture)	US and allies	Steel helmet only (1915-1950s rifleman)	Assault rifle (M16, AK)	ROK Marine Corps: M1 helmet.
	**PAVN regular**	PAVN and Viet Cong	Unarmoured	Assault rifle (M16, AK)	Pith helmet, AK-47.
	**Viet Cong guerrilla**	PAVN and Viet Cong	Unarmoured	Mine, booby trap or IED	Booby traps, mines and punji pits.

82-96	Mine, booby trap or IED
97-98	Punji stake
99-00	Other

Neel (1973) Table 6: wounds by agent, Vietnam (the hospitalized population this table counts)

 © 2026 Scott Wares. All rights reserved.

Reading it. Hospitalized casualties: men killed outright are missing. Bullets killed (51% of deaths) far more than they wounded (16%), so for fatal shots lean on the head and thorax.

Status. Historical at region level. The source puts 22% of casualties under 'other/multiple sites' (several wounds); those are left out and the single-region rest normalised. The source's column sums to 102% (rounding).

Sources. Neel, S., Medical Support of the U.S. Army in Vietnam 1965-1970 (Dept of the Army, 1973), ch. 3, Table 7: location of wounds in hospitalized casualties (%): Vietnam - head and neck 14, thorax 7, abdomen 5, upper extremities 18, lower extremities 36, other/multiple 22. | Neel (1973) Table 6, Vietnam: deaths 51% small arms, 36% fragments, 11% booby traps/mines; wounds 16% small arms, 65% fragments, 15% booby traps/mines, 2% punji stakes. | Borden Institute, Weapons Effects and War Wounds, Table 1-1 (WDMET): causes of battle injury - bullet 30, mortar/rocket/artillery 22, grenade 11, RPG 12, booby trap 17, other 8.

Vietnam 1965-73 - hospitalized (Owens comparison set)

US casualties hospitalized in the Vietnam War.

Confidence: **Historical - taken directly from a source**. Armour: **already reflected, do not apply**. Weapon columns differ, but across the weapon mix below they average back to the source totals.

Location	Zone	Assault rifle	MG	AA gun	Pistol/ SMG	Grenade	Mortar	RPG	Recoilless	Mine/IED	Punji	Frags

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Spade, Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted* with Target has no shield applied. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head and neck 16%; Thorax 13%; Abdomen 10%; Upper extremities (40% of 61) 24.4%; Lower extremities (60% of 61) 36.6%. Region totals are from the source. Extremities split 40% arms / 60% legs, the average of the WWII, Korea and Vietnam hospital figures in Neel (1973) Table 7 (design estimate), the same rule for every table in this set. The split inside each region uses body exposure (design estimate).

What hit them? (d100)

d100	Cause
01-35	Assault rifle (M16, AK)
36-00	Fragments, unspecified (shell, grenade, mine)

Owens et al. 2008 (National Academies 2014, Table 3-4): share of injuries from gunshot vs explosion

Reading it. Hospitalized casualties including those who later died of wounds; men killed outright are not counted, so head and trunk are still under-counted.

Status. Historical at region level. One of four tables from the same source with the same counting rule (see the comparison on the Reference page) (hospitalizations, including men who later died of wounds), same extremity split.

Late 20th century

1969-1996

Six smaller wars with very different fighting. Northern Ireland (1969-98): the British Army and police against the Provisional IRA, mostly sniping and bombs. The Falklands (1982): Britain against Argentina, infantry fighting over open hills. The Gulf War (1991): a US-led coalition against Iraq. Somalia (1993): US Rangers and special forces against Somali militia in Mogadishu. Chechnya (1994-96 and later): Russia against Chechen separatists, with urban battles in Grozny.

Sides and armour

Side	Who fought	How they used armour
Northern Ireland	British Army and RUC; Provisional IRA and other paramilitaries.	British patrols wore helmets and soft body armour; the IRA wore none and used rifles, snipers and bombs.
Falklands 1982	British paratroopers, Royal Marines and infantry; Argentine conscripts and marines.	Steel helmets on both sides; little body armour.
Gulf War 1991	US-led coalition; Iraqi army.	US troops in PASGT Kevlar helmets and vests (fragments and pistol rounds); Iraqi troops in steel helmets.
Somalia 1993	US Task Force Ranger; Somali National Alliance militia.	Rangers wore IIIA soft vests with a single ceramic front plate and no back plate; militia were unarmoured, with AKs and RPGs.
Chechnya	Russian army and interior troops; Chechen separatist fighters.	Russian helmets and body armour, unevenly issued; Chechen fighters largely unarmoured.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**British soldier, Belfast**	Northern Ireland	PASGT vest and helmet (1980s-90s)	Assault rifle (M16, AK)	Soft body armour and helmet (PASGT used as the nearest kit).
	**IRA sniper**	Northern Ireland	Unarmoured	Assault rifle (M16, AK)	Armalite, no armour.
	**British Guardsman, Tumbledown**	Falklands 1982	Steel helmet only (1915-1950s rifleman)	Bayonet (musket or rifle)	Steel helmet; the final assaults on the mountains ended with the bayonet.
	**Argentine conscript** (picture)	Falklands 1982	Steel helmet only (1915-1950s rifleman)	Assault rifle (M16, AK)	Steel helmet, FN FAL.
	**US soldier, Desert Storm** (picture)	Gulf War 1991	PASGT vest and helmet (1980s-90s)	Assault rifle (M16, AK)	PASGT helmet and vest, M16.
	**British soldier, Desert Storm** (picture)	Gulf War 1991	PASGT vest and helmet (1980s-90s)	Assault rifle (M16, AK)	Soft body armour and helmet (PASGT used as the nearest kit).

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head, neck, face 11%; Thorax 8%; Abdomen 7%; Upper extremities (40% of extremity) 22.4%; Lower extremities (60% of extremity) 33.6%. Region totals are from the source. The split inside each region uses body exposure (design estimate). Extremities are split 40% arms / 60% legs, the average of the WWII, Korea and Vietnam hospital figures in Neel (1973) Table 7 (design estimate).

Reading it. Primary penetrating wound of casualties; mostly survivors who reached care, so instant kills are under-counted.

Status. Historical at region level (primary penetrating wounds). The source lists 18% 'other' (not located); it is left out and the rest normalised.

Sources. Borden Institute, Weapons Effects and War Wounds, ch. 1, Table 1-2: anatomical distribution of primary penetrating wounds (%): head/neck/face 11, thorax 8, abdomen 7, extremity 56, other 18.

Iraq & Afghanistan

2001-2021

US-led coalitions in Afghanistan from 2001 (against the Taliban and al-Qaeda) and in Iraq from 2003 (against the Iraqi army, then insurgents and militias). Roadside bombs became the main weapon against coalition troops, and modern body armour moved wounds from the torso to the head, face and limbs.

Sides and armour

Side	Who fought	How they used armour
Coalition	US, British and other allied forces; the Afghan and new Iraqi security forces they trained.	Interceptor vests with SAPI rifle plates and Kevlar helmets from the start of the Iraq war; ESAPI plates against armour-piercing rounds by the mid-2000s; lighter plate carriers later, especially in Afghanistan.
Iraqi army, 2003	Iraqi regular army and Republican Guard during the invasion.	Steel helmets for some; little body armour.
Insurgents and Taliban	Iraqi insurgents and militias; Taliban fighters.	Largely unarmoured. IEDs, RPGs, rifles and mortars.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**US soldier, Iraq 2004** (picture)	Coalition	Interceptor vest, SAPI plates, ACH (2000s)	Assault rifle (M16, AK)	Interceptor vest, SAPI plates, ACH.
	**US soldier, Afghanistan 2011** (picture)	Coalition	Plate carrier, ESAPI plates, helmet (2010s-)	Assault rifle (M16, AK)	Plate carrier with ESAPI.
	**British soldier, Helmand 2009** (picture)	Coalition	Interceptor vest, SAPI plates, ACH (2000s)	Assault rifle (M16, AK)	Osprey vest with plates (Interceptor used as the nearest kit).
	**Afghan National Army soldier** (picture)	Coalition	PASGT vest and helmet (1980s-90s)	Assault rifle (M16, AK)	Helmet and vest when issued (PASGT used as the nearest kit).
	**Iraqi soldier, 2003**	Iraqi army, 2003	Steel helmet only (1915-1950s rifleman)	Assault rifle (M16, AK)	Steel helmet, AK-47.
	**Insurgent, Iraq**	Insurgents and Taliban	Unarmoured	Mine, booby trap or IED	Roadside bombs.
	**Taliban fighter**	Insurgents and Taliban	Unarmoured	Assault rifle (M16, AK)	AK-47, no armour.

Iraq & Afghanistan 2001-05 - combat wounds

6,609 combat wounds on 1,566 US soldiers, Operations Iraqi Freedom and Enduring Freedom, Oct 2001 - Jan 2005.

Confidence: **Historical - taken directly from a source**. Armour: **already reflected, do not apply**. Weapon columns differ, but across the weapon mix below they average back to the source totals.

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head and ears (8 + 3) 11%; Face and eyes (10 + 6) 16%; Neck 3%; Thorax 6%; Abdomen 11%; Upper extremity (half of 54) 27%; Lower extremity (half of 54) 27%. Region totals are from the source. Extremities are split evenly between arms and legs (the companion study found fractures 50/50); the split inside each region uses body exposure (design estimate).

What hit them? (d100)

d100	Cause
01-18	Assault rifle (M16, AK)
19-79	Mine, booby trap or IED
80-87	Mortar, rocket or artillery
88-92	Hand grenade
93-96	RPG (rocket-propelled grenade)
97-00	Other

Owens et al. 2008: gunshot 18%, explosion 78%; explosions split by the DoD Trauma Registry 2007-17 shares (Borden Table 1-1: IED 60.4, mortar/rocket/artillery 7.8, grenade 4.6, RPG 4.5)

 © 2026 Scott Wares. All rights reserved.

Reading it. Soldiers wore helmets and plate body armour, so the torso is already protected in these numbers (thorax only 6%). Don't apply armour again. Counts all wounds, wounded and killed, several per soldier.

Status. Historical at region level. Eyes are folded into face and ears into the skull. Abdomen is taken to include the lower back and pelvis.

Sources. Owens BD et al., 'Combat wounds in Operation Iraqi Freedom and Operation Enduring Freedom', J Trauma 2008: head 8%, eyes 6%, ears 3%, face 10%, neck 3%, thorax 6%, abdomen 11%, extremity 54%; explosions 78%, gunshot 18%. | Owens BD et al., 'Characterization of extremity wounds in OIF and OEF', J Orthop Trauma 2007: 915 extremity fractures, 461 upper (50%) and 454 lower (50%).

Close combat. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head and neck 30%; Thorax 6%; Abdomen 9%; Upper extremities (40% of 55) 22%; Lower extremities (60% of 55) 33%. Region totals are from the source. Extremities split 40% arms / 60% legs, the average of the WWII, Korea and Vietnam hospital figures in Neel (1973) Table 7 (design estimate), the same rule for every table in this set. The split inside each region uses body exposure (design estimate).

What hit them? (d100)

d100	Cause
01-19	Assault rifle (M16, AK)
20-00	Fragments, unspecified (shell, grenade, mine)

Owens et al. 2008 (National Academies 2014, Table 3-4): share of injuries from gunshot vs explosion

Reading it. Hospitalized casualties including those who later died of wounds; men killed outright are not counted, so head and trunk are still under-counted. Helmets and plate body armour were worn: don't apply armour again.

 © 2026 Scott Wares. All rights reserved.

Status. Historical at region level. One of four tables from the same source with the same counting rule (see the comparison on the Reference page) (hospitalizations, including men who later died of wounds), same extremity split.

Sources. Owens BD et al., 'Combat wounds in Operation Iraqi Freedom and Operation Enduring Freedom', J Trauma 2008, comparison table (reproduced in National Academies, Review of DoD Test Protocols for Combat Helmets, 2014, Table 3-2): head and neck 30, thorax 6, abdomen 9, extremities 55.

 © 2026 Scott Wares. All rights reserved.

Reference

Not a war. The random-hit table shows where hits would land if every square inch of the body were equally likely: use it as a neutral table with any armour, or to see how far a real war's pattern moves away from chance. Below it, the four-war comparison shows how American wound patterns changed from WWII to Iraq and Afghanistan, counted the same way each time; each of those four tables is listed under its own war as the Owens comparison set.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**Modern soldier**	-	Plate carrier, ESAPI plates, helmet (2010s-)	Assault rifle (M16, AK)	Plate carrier and helmet.
	**Police officer**	-	Concealable soft vest (police IIIA)	Pistol or submachine gun	Concealable IIIA vest.
	**Civilian**	-	Unarmoured	Pistol or submachine gun	No armour.

US wars compared: where hospitalized wounded were hit

	Head & neck	Thorax	Abdomen	Extremities	Gunshot / explosion
Body surface area (chance)	12%	16%	11%	61%	-
WWII	21%	14%	8%	58%	27 / 73
Korea	21%	10%	9%	60%	31 / 69
Vietnam	16%	13%	10%	61%	35 / 65
Iraq & Afghanistan	30%	6%	9%	55%	19 / 81

Same source and counting rule for every row: hospitalized casualties, including men who later died of wounds. With modern body armour the thorax share fell to 6% and the head and neck rose to 30%, because plates cover the chest and nothing covers the face and neck. Gunshot vs explosion shows how the weapon mix shifted.

Source. Owens et al., 'Combat wounds in Operation Iraqi Freedom and Operation Enduring Freedom', J Trauma 2008 (National Academies 2014, Tables 3-2 and 3-4).

Quick-play: men down per 100 tries

Men down per 100 tries, at attack 30 / 45 / 60 / 75 against regular men with no parry; green men x1.09, veterans x0.94; against a parry, x(1 - parry% x 0.9).

Weapon	Plate carrier, ESAPI plates, helmet (2010s-)	Concealable soft vest (police IIIA)	Unarmoured
Assault rifle (M16, AK)	15 / 29 / 42 / 58	19 / 33 / 47 / 61	18 / 32 / 47 / 62
Pistol or submachine gun	15 / 26 / 40 / 51	13 / 24 / 39 / 52	18 / 33 / 47 / 60

Close combat. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head and neck 12%; Thorax 16%; Abdomen 11%; Upper extremities (1/3 of 61) 20.33%; Lower extremities (2/3 of 61) 40.67%. Region totals are from the source. Extremities split 1/3 arms, 2/3 legs by surface (rule of nines: arms 18%, legs 36%). The split inside each region uses body exposure (design estimate).

Reading it. Use to compare a war's table against pure chance (a head share above 12% means heads were exposed or aimed at), or as a neutral table when nothing else fits.

Status. Body surface area from the same source table. Not wound data: a neutral reference.

Sources. Owens BD et al., 'Combat wounds in Operation Iraqi Freedom and Operation Enduring Freedom', J Trauma 2008, comparison table (reproduced in National Academies, Review of DoD Test Protocols for Combat Helmets, 2014, Table 3-2): body surface area - head and neck 12, thorax 16, abdomen 11, extremities 61.

Close combat

Stockholm, 1983-1993

Knife killings recorded by forensic pathologists: usually one attacker against an unarmoured, often surprised victim, with several wounds each. The table stands in for knives and bayonets on every non-medieval table.

Sides and armour

Side	Who fought	How they used armour
Attacker	Single assailant with a knife.	None.
Victim	Usually unarmoured civilians; 41% had defensive wounds on the hands and arms.	None. Soft ballistic vests give little protection against a stab; plates stop one.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**Knife attacker**	Attacker	Unarmoured	Dagger / knife	Single assailant.
	**Police officer**	Victim	Concealable soft vest (police IIIA)	Dagger / knife	IIIA vest: stops bullets, not knives.
	**Soldier in plates**	Victim	Plate carrier, ESAPI plates, helmet (2010s-)	Bayonet (musket or rifle)	Plates stop most stabs to the chest.
	**Civilian**	Victim	Unarmoured	Dagger / knife	No armour.

Sources. Karlsson 1998, via forensicmed.co.uk.

Quick-play: men down per 100 tries

Men down per 100 tries, at attack 30 / 45 / 60 / 75 against regular men with no parry; green men x1.23, veterans x0.75; against a parry, x(1 - parry% x 0.9).

Weapon	Unarmoured	Concealable soft vest (police IIIA)	Plate carrier, ESAPI plates, helmet (2010s-)
Dagger / knife	6 / 14 / 24 / 34	6 / 12 / 22 / 32	4 / 10 / 17 / 26
Bayonet (musket or rifle)	6 / 14 / 23 / 34	6 / 13 / 22 / 34	4 / 11 / 17 / 26

Knife assault - stab wounds (forensic)

Where stab and cut wounds were found on homicide victims, Stockholm 1983-1993. Used for knives and bayonets on any non-medieval table.

Confidence: **Historical - taken directly from a source**. Armour: **allowed**. Weapons share the source's pooled odds (no weapon mix to separate them).

Location	Zone	Dagger	Bayonet
Skull (left)	head	01-04	01-04
Skull (right)	head	05-08	05-08
Face	head	09-13	09-13
Neck	head	14-28	14-28
Chest (left)	torso	29-36	29-36
Chest (right)	torso	37-44	37-44
Abdomen	torso	45-52	45-52
Groin / pelvis	torso	53-56	53-56
Upper back	torso	57-64	57-64
Lower back	torso	65-71	65-71
Shoulder (left)	arms	72	72
Shoulder (right)	arms	73	73
Upper arm (left)	arms	74-76	74-76
Upper arm (right)	arms	77-79	77-79
Forearm (left)	arms	80-83	80-83
Forearm (right)	arms	84-87	84-87
Hand (left)	arms	88-90	88-90
Hand (right)	arms	91-93	91-93
Thigh (left)	legs	94-95	94-95
Thigh (right)	legs	96-97	96-97
Lower leg (left)	legs	98	98
Lower leg (right)	legs	99	99
Foot (left)	legs	00	00

Close combat. Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*. Punch, Kick, Elbow/knee: roll location on *Unarmed - landed strikes (MMA)*.

Source totals. Head (27% of victims) = 12.3%; Neck (33%) = 15.1%; Upper extremity (46%) = 21.0%; Chest (34%) = 15.5%; Back (34%) = 15.5%; Abdomen (26%) = 11.9%; Lower extremity (19%) = 8.7% (n = 219). Region figures are from the source (share of victims wounded in each region; victims usually had several wounds, so they sum to more than 100 and are normalised). Arm wounds favour forearms and hands (defensive wounds); other splits use body exposure (design estimate).

Reading it. Victims were mostly unarmoured civilians, so these are hits before armour: armour can be applied. 41% of victims had defensive wounds to the hands and forearms, already included here, so 'warding' doubles up. Soft ballistic vests give little protection against a stab (pierce 0); plates stop it.

Status. Historical at region level. Homicide, not battle: single attacker, unarmoured victim, often surprised.

Sources. Karlsson T., 'Sharp force homicides in the Stockholm area, 1983-1992', Forensic Sci Int 1998, via forensicmed.co.uk 'Patterns of sharp force trauma': share of homicide victims with wounds by region - head 27%, neck 33%, upper extremity 46%, chest 34%, back 34%, abdomen 26%, lower extremity 19%; defensive injuries in 41% of victims.

Unarmed

UFC, 2005-2026

Professional mixed martial arts under the Unified Rules: four-ounce gloves, no strikes to the groin, spine or back of the head. The table also stands in for punches, kicks, elbows and knees on every other table.

Sides and armour

Side	Who fought	How they used armour
Fighters	Professional MMA fighters.	Gloves, mouthguard and groin cup only.

Example combatants

The kit is what they wear when hit (use it on a table that allows armour); the weapon is what they fight with. 'Picture' links to a period image of such a combatant on Wikimedia Commons.

	Example	Side	Wears (armour kit)	Fights with	Notes
	**Striker**	Fighters	Unarmoured	Punch	Boxer-style; head hunter.
	**Kickboxer**	Fighters	Unarmoured	Kick	Low kicks to the lead leg.

Sources. Fightshow, UFC Strike Map.

Quick-play: men down per 100 tries

Men down per 100 tries, at attack 30 / 45 / 60 / 75 against regular men with no parry; green men x1.24, veterans x0.71; against a parry, x(1 - parry% x 0.9).

Weapon	Unarmoured
Punch	5 / 13 / 21 / 29
Kick	5 / 13 / 22 / 30

 © 2026 Scott Wares. All rights reserved.

Unarmed - landed strikes (MMA)

Where landed significant strikes go in professional MMA: all UFC divisions, 2005-2026, 648,783 strikes.

Confidence: **Historical - taken directly from a source**. Armour: **allowed**.

Location	Zone	Punch	Kick	Elbow/knee
Skull (left)	head	01-17	01-05	01-14
Skull (right)	head	18-30	06-08	15-25
Face	head	31-81	09-22	26-68
Neck	head	82-83	23	69-70
Chest (left)	torso	84-87	24-31	71-77
Chest (right)	torso	88-92	32-41	78-85

Upper back	torso	00	54	96
Thigh (left)	legs	-	55-70	97
Thigh (right)	legs	-	71-83	98
Knee (left)	legs	-	84-85	-
Knee (right)	legs	-	86-87	-
Lower leg (left)	legs	-	88-95	99
Lower leg (right)	legs	-	96-00	00

Close combat. Dagger: roll location on *Knife assault - stab wounds (forensic)*. Bayonet: roll location on *Peninsular War 1808-14 - French officers' wounds*. Sword, Axe, Spiked club, Spear: roll location on *Visby 1361 - gameplay-adjusted*.

Source totals. Head 64%; Body 21%; Legs 15%. Head / body / legs totals are from the source. The split inside each region is a design estimate (orthodox stance, legal targets only).

Reading it. Sport rules: no strikes to the groin, spine or back of the head, and blocked strikes on the arms are not counted. A street fight would add groin, back and arm hits. Totals pool all strike types; the weapon columns are design estimates.

Status. Historical at head / body / legs level. Within-region split favours the face and the target's lead (left) side and liver (right) side.

Sources. Fightshow, UFC Strike Map (UFC round statistics 2005-2026, data through 3 Oct 2026): head 64%, body 21%, legs 15% of 648,783 landed significant strikes.

Situations

Each situation reshapes where blows land. The roller and CLI stack any number of them (one per group: facing, height, posture, cover). On paper, each column shows one situation alone. Each table offers only the situations that make sense for it.

Situation	Column	Effect on weights	Notes
Attacker on target's shield side *group: facing*	Shield side	left side x1.8, right side x0.5	Attacker works round to the target's left (shield) side.
Attacker on target's weapon side *group: facing*	Weapon side	left side x0.5, right side x1.8	Attacker is off the target's right (weapon-arm) side.
Attacker higher (mounted, uphill, on a wall) *group: height*	Higher	head x1.6, arms x1.2, legs x0.4, shoulder (left) x1.3, shoulder (right) x1.3	Blows come down onto the head and shoulders; legs out of reach.
Attacker lower (in a ditch, kneeling, vs. rider) *group: height*	Lower	head x0.5, legs x1.6, groin / pelvis x1.8, abdomen x1.3	Blows come up into the legs, groin and belly.
Target down (fallen, kneeling, helpless) *group: posture*	Down	head x2, torso x0.6, legs x0.6, upper back x3, lower back x2, forearm (left) x1.6, forearm (right) x1.6, hand (left) x1.6, hand (right) x1.6, face x0.7	Towton pattern: repeated blows to the head and back; arms raised to ward. Shaped on Towton (1461): 96% of crania with weapon wounds, far fewer below the skull.
Target fleeing (back turned) *group: posture*	Fleeing	head x1.2, arms x0.6, legs x1.3, upper back x4, lower back x3, face x0.1, chest (left) x0.15, chest (right) x0.15, abdomen x0.15, groin / pelvis x0.2	Rout: back, back of the head and legs exposed; front almost unreachable.
Target flanked (two or more attackers)	Flanked	legs x1.3, upper back x2.5, lower back x2.5, skull (left) x1.2, skull (right) x1.2	Visby team-fighting: one engages the front while others strike from behind and low. From the Visby reading of attackers working in teams (Randolph-Quinney et al., 2026).
Target has no shield	No shield	head x1.1, torso x1.4, forearm (left) x0.7, hand (left) x0.7	Tables assume a shield. Without one the body and head are more open.
Target warding with arms (unarmed or disarmed)	Warding	arms x1.5, forearm (left) x1.6, forearm (right) x1.6, hand (left) x1.6, hand (right) x1.6	Defensive wounds: forearms and hands raised to block. Defensive forearm and hand wounds are recorded at Towton and in modern sharp-force forensics.
Target behind cover (breastwork, wall, trench) *group: cover*	Cover	head x1.5, torso x0.3, legs x0.05, shoulder (left) x1.5, shoulder (right) x1.5, abdomen x0.3, groin / pelvis x0.2, lower back x0.3	Only head, shoulders and arms show over the parapet. For entrenched or firing-line fighting. Gunfire tables only by default. The Crimean siege returns (1855-56) back the head factor: British rank and file in the siege were hit in the head 1.49 times as often (as a share) as in the field battles and first winter before it, in the face 1.54 times and in the limbs 0.91 times. Those are whole-army totals mixing men under cover and in the open, so they cannot set the torso and leg factors for a man actually behind a parapet.

Called shot. Roll the location twice; keep whichever result lands in the called zone. If both or neither do, keep the first. Your system sets any to-hit penalty.

Wound Mechanism

Weapon	Cut	Pierce	Crush	Ballistic	Threat	Notes
Sword (arming sword)	01-70	71-00	-	-	melee	Baseline weapon; the Visby tables are applied unchanged.
Axe (hand or long-hafted)	01-85	-	86-00	-	melee	Visby work describes axes taking the legs out; leg bias reflects that. Heavy cuts bite through mail (ignores 1 step vs cut).
Spiked club / morning star (knout)	-	01-45	46-00	-	melee	Square skull perforations at Visby match a spiked club (Randolph-Quinney et al., 2026); head bias reflects that. Spikes punch through mail (ignores 1 step vs pierce).
Spear / lance	01-10	11-00	-	-	melee	Thrusting weapon aimed at the centre mass and face over the shield rim.
Pike (long infantry pike, 1450s-1700)	-	01-95	96-00	-	melee	The pike of the pike-and-shot armies, 15-18 feet (4.5-5.5 m) long, couched or levelled at chest and face height; no count of pike wounds was found, so it rolls on the Visby melee table as a spear, with no shield (pikemen carried none) and more thrusts to the face and chest. Offered on the tables of its era (a table's era_melee).
Bill (English bill, hooked polearm)	01-60	61-90	91-00	-	melee	The common infantry polearm of the Wars of the Roses: a cleaving blade with a hook and spike on a long haft. On the Towton evidence table it rolls on the blade wounds.
Poleaxe (axe, hammer and spike)	01-20	21-55	56-00	-	melee	The man-at-arms' weapon against plate: hammer and spike to crack or pierce armour (ignores 1 step vs crush and pierce: design estimate). On the Towton evidence table it rolls on the blunt-force wounds, which were mostly to the head and face.
Bow (war arrows)	01-05	06-00	-	-	-	Its own table is the US Army's 1865-71 arrow-wound reports (Plains and Apache bows, iron and flint heads). At Visby, 126 arrow and crossbow-bolt wounds fell much like the blade wounds, mostly on the lower body, so on the Visby tables it uses their weights unchanged. Arrows are pierce wounds, not gunfire: bleeding, deep tracks and infection; a barbed head left inside causes trouble for months.
Longbow (English war bow, bodkin and broadhead arrows)	01-05	06-00	-	-	-	Heavy war bow of the Hundred Years' War and the Wars of the Roses. Arrows mostly left soft-tissue wounds, so bone evidence under-counts them; at Towton a few head wounds are arrowheads. Heavy arrows punch through mail and jacks (ignores 1 step vs pierce): design estimate; against good plate they mostly glanced.
Crossbow (bolts)	-	01-00	-	-	-	Visby's arrow and bolt wounds are counted together (126), mostly on the lower body; the Visby weights are used with a small head bias for aimed shots at the face and helmet. Heavy bolts punch through mail (ignores 1 step vs pierce): design estimate.
Sling (stones, lead bullets)	-	-	01-00	-	-	No battlefield tally separates sling wounds. Andean skeletons from the Wari era show cranial trauma in about a quarter to a third of adults, much of it consistent with sling stones, but the cause is not counted apart. Head bias is a design estimate. Blunt: fractures and shock; a helmet takes the edge off (crush steps).
Dagger / knife	01-30	31-00	-	-	melee	Grappling and finishing weapon. On medieval tables it seeks gaps at neck, face and armpit; elsewhere it uses the forensic knife-assault table as recorded.
Bayonet (musket or rifle)	01-15	16-00	-	-	melee	Rolls on the Peninsular War table, which records where 97 bayonet wounds fell (thighs most, then arms and hands, then chest). Rare in every war with records: 3% of French officers' wounds in Spain, and under 1% of Civil War wounds (922 sabre and bayonet wounds together). The zone bias is used only on tables with raw weapon biases.
Sharpened entrenching tool (spade)	01-50	-	51-00	-	melee	Edges sharpened from 1915 for trench raids; used at Stalingrad and taught to Soviet Spetsnaz. Short overhead chops in a confined space: head, neck and collarbone. No wound data exists; shaped on the Visby axe and club evidence.
Sabre or broadsword	01-80	81-00	-	-	melee	Rolls on the Peninsular War table, which records where 284 sword wounds fell: a third on the head and face, then arms, hands and shoulders. Cuts from horseback. The zone bias is used only on tables with raw weapon biases.
Cavalry lance	01-10	11-00	-	-	melee	Polish and French lancers, British lancers after 1816. Rolls on the Peninsular War table (43 lance wounds: arms and hands, chest, head). Long reach against men on foot or fleeing.
Clubbed musket (butt stroke)	-	-	01-00	-	melee	Swung like a club when there was no time to reload or no bayonet. Revolutionary War pensioners lost eyes and had skulls broken by it. Rolls on the Visby melee table with no shield; head bias is a design estimate.
Punch	-	-	01-00	-	melee	Punches land head and body; leg strikes are kicks.

 © 2026 Scott Wares. All rights reserved.

Weapon	Cut	Pierce	Crush	Ballistic	Threat	Notes
Kick	-	-	01-00	-	melee	Most landed kicks are low kicks and body kicks.
Elbow or knee	01-25	-	26-00	-	melee	Clinch strikes; elbows split skin (cut).
Matchlock musket	-	-	-	01-00	rifle	Heavy infantry musket fired from a rest or the shoulder; a lead ball of about .70-.80 calibre. On the Lützen table it uses the 32 recorded gunshot injuries (mostly carbines and pistols; no source separates musket hits).
Wheellock pistol or carbine (cavalry)	-	-	-	01-00	pistol	Cuirassiers and harquebusiers fired pistols and carbines at close range, aimed at the head and the left side of the chest. On the Lützen table it uses the 32 recorded gunshot injuries, 22 of them to the skull.
Smoothbore musket (Brown Bess, Charleville)	-	-	-	01-00	rifle	Soft lead ball of about .69-.75 calibre. On the Peninsular table it uses the 3,331 recorded musket and rifle wounds; elsewhere the table's pooled odds.
Flintlock rifle (Pennsylvania, Baker, Jäger)	-	-	-	01-00	rifle	Riflemen and Jäger picked off officers and gunners at long range. No source records rifle wounds apart from musket wounds; the slight head bias is a design estimate and applies only on tables with raw weapon biases.
Flintlock pistol	-	-	-	01-00	pistol	Cavalry and officers' sidearm; one shot, then the sword.
Smoothbore artillery (round shot, canister, grape, shell)	-	-	01-30	31-00	fragment	Round shot took off limbs; canister and grape acted like giant shotgun loads; shells burst. On the Peninsular table it uses the 209 recorded ordnance wounds, which fell lower on the body than musket wounds (legs and feet). Three times as lethal as musketry there.
Rifle-musket (Minie ball)	-	-	-	01-00	rifle	Soft lead .58 ball; shatters rather than drills bone.
Breech-loading rifle or carbine (Sharps, Spencer, Springfield 1866)	-	-	-	01-00	rifle	Loaded at the breech with a metal or linen cartridge: the Sharps and Spencer carbines of the Civil War cavalry, and the Springfield of 1866 that the frontier infantry got in 1867 (a rifle-musket converted to a breech-loader, .50 calibre). No wound count sets it apart from the rifle-musket's: it rolls on the same tables, and fires faster.
Artillery (canister, shell fragments)	-	-	01-20	21-00	fragment	Canister balls and jagged fragments; heavy fragments crush.
Revolver	-	-	-	01-00	pistol	Cavalry and officers' sidearm.
Service rifle (bolt or semi-auto, 1914-53)	-	-	-	01-00	rifle	Lee-Enfield, Mauser, Springfield, Garand, Mosin. Aimed fire at whatever shows.
Assault rifle (M16, AK)	-	-	-	01-00	rifle	Intermediate cartridge. Common steel-core AK rounds count as rifle, not armour-piercing.
Rifle, armour-piercing ammunition	-	-	-	01-00	rifle_ap	Hardened-core rounds that defeat SAPI plates; ESAPI is rated against them.
Machine gun	-	-	-	01-00	rifle	Grazing fire sweeps low across the ground.
Pistol or submachine gun	-	-	-	01-00	pistol	Handgun cartridges; soft armour stops them.
Hand grenade	-	-	01-15	16-00	fragment	Bursts on or near the ground: legs and lower body take most fragments.
Mortar, rocket or artillery	-	-	01-15	16-00	fragment	Air and ground bursts; fragments come down onto the head, shoulders and back of prone men.
RPG (rocket-propelled grenade)	-	-	01-30	31-00	fragment	Blast plus fragments; often aimed at vehicles and bunkers.
Bazooka or Panzerschreck (rocket launcher)	-	-	01-30	31-00	fragment	Shoulder-fired anti-tank rocket (the 2.36 and 3.5 inch bazookas, the Panzerschreck and the Panzerfaust); blast and fragments as an RPG's.
Anti-aircraft gun (20 mm, 40 mm, ZPU, 37 mm, ZSU-23)	-	-	01-10	11-00	fragment	Light anti-aircraft guns and heavy machine-gun mounts, fought on the field map as a team: they shoot at aircraft attacking near them, and at men as a heavy machine gun.
Anti-tank gun (towed: 6-pounder, 57 mm, Pak 38 and 40, 45 mm, 47 mm)	-	-	01-15	16-00	fragment	A crew-served towed gun firing armour-piercing shot at vehicles and high explosive at men; its wounds to men are a shell's fragments. Fought on the field map as a unit, not aimed by one fighter.
Recoilless rifle	-	-	01-25	26-00	fragment	The 57, 75 and 106 mm recoilless rifles, the 90 mm M67 and the Soviet B-10: high explosive or anti-tank rounds; blast and fragments.
Anti-tank guided missile	-	-	01-30	31-00	fragment	Wire- or laser-guided missiles (Milan, TOW, Javelin, Konkurs) fired from a tripod, a vehicle or the shoulder; often used on bunkers and buildings as well as armour.
Mine, booby trap or IED	-	-	01-40	41-00	fragment	Buried and tripwire devices: feet, legs and groin. Crush covers blast and traumatic amputation.
Punji stake	-	01-00	-	-	-	Sharpened, often fouled bamboo in pits and trails; 2% of Vietnam wounds. Pierce wounds carry high infection risk.
Fragments, unspecified (shell, grenade, mine)	-	-	01-15	16-00	fragment	Used where a source only says 'fragments' or 'explosion'.

 © 2026 Scott Wares. All rights reserved.

Cut - Edge blow: opens soft tissue; can sever limbs.

Pierce - Point or spike: small entry, deep track; internal damage and infection.

Crush - Blunt impact: fractures and shock; less external bleeding.

Ballistic - Bullet, ball or shell fragment: shatters bone, carries cloth and dirt deep into the wound.

Severity

d100	Severity	Use when
01-55	Light	Damage well under what your system treats as a serious hit (e.g. < 1/3 of a wound level / HP threshold).
56-85	Serious	A solid hit: about 1/3 to 2/3 of a threshold, or a hit that beat armour by a clear margin.
86-00	Critical	A crippling or killing blow: over 2/3 of a threshold, or a critical success.

Severity for ballistic hits

Use instead of the table above. Used for every hit from a firearm or explosive (any weapon with a threat level), including a blast's crush wounds. Calibrated to Bougainville 1944, where 38-42% of head, chest and abdomen hits killed but only 0.3% of arm and 3.4% of leg hits did. If your own system sets severity, give gunshots to the head and trunk its harshest damage.

Hit zone	Light	Serious	Critical
head, torso	01-25	26-62	63-00
arms, legs	01-55	56-90	91-00

 © 2026 Scott Wares. All rights reserved.

Fighting While Wounded

Optional: resolve the attack here so that wounds count. Skip this page if your own system rolls the attack; you can still use the penalty table for it.

1. Pick the **attacker** and the **defender**. Add up each one's wound penalties (table below), capped at the limit shown.

2. Attacker rolls d100 against **attack % minus penalties** (on the battle map, also minus any range penalty and men in the way). Equal or under hits; the **margin** is the effective chance minus the roll. A roll at or under a tenth of the effective chance is a **critical**: it cannot be defended.

3. If the defender may parry or dodge, they roll d100 against **defence % minus penalties**; equal or under avoids the blow.

4. On a hit, roll location and mechanism as usual. **Severity comes from the margin** (bands below) instead of the severity table.

5. Wounds switch situations on by themselves: a defender who cannot stand is **Target down**, a defender whose shield arm is useless has **No shield**, and an attacker on the ground fights as **Attacker lower**.

Wound penalties (add up, each total capped at -60%)

Arm wounds count against the **weapon arm** (the side of the fighter's weapon hand, usually right) or the **shield arm**. Wounds elsewhere that impair an arm count against the weapon arm. Each impairment counts once however many wounds cause it. A fighter with neither hand usable cannot wield a weapon. With an arm, grip, hand useless or arm useless impairment on either arm he cannot attack with a two-handed weapon (pike, bill, poleaxe, bow, longbow, crossbow, bayonet, musket butt, matchlock, musket, rifle, rifle-musket, breech-loader, assault rifle, AP rifle, MG, RPG, bazooka, recoilless, ATGM): he only defends.

Cause	Attack	Defence	Also
Pain (per step, max 3 steps)	-10%	-10%	
Blood at 75% or less	-10%	-10%	
Blood at 50% or less	-20%	-20%	
Blood at 25% or less	-40%	-40%	on the ground
Blood at 0% or less	-	-	incapacitated
dazed	-20%	-20%	
vision	-30%	-30%	
breath	-10%	-10%	
collapse	-20%	-30%	on the ground
stand	-20%	-30%	on the ground
leg	-	-20%	
move	-	-10%	
unconscious	-	-	incapacitated
arm (weapon arm)	-20%	-	
arm (shield arm)	-	-10%	
grip (weapon arm)	-30%	-	fights off-hand
grip (shield arm)	-	-	no shield
hand useless (weapon arm)	-30%	-	fights off-hand
hand useless (shield arm)	-	-	no shield
arm useless (weapon arm)	-40%	-	fights off-hand
arm useless (shield arm)	-	-10%	no shield

Severity from the margin of success

Weapon / hit zone	Light	Serious	Critical
Default	margin 0-19	20-49	50+ or critical roll
Firearm or explosive: head, torso	margin 0-9	10-34	35+ or critical roll
Firearm or explosive: arms, legs	margin 0-29	30-59	60+ or critical roll

Automatic situations: defender cannot stand = Target down (fallen, kneeling, helpless); defender's shield arm useless = Target has no shield; attacker on the ground = Attacker lower (in a ditch, kneeling, vs. rider) (where the table offers them).

Graze, stop check and team morale

Graze: a hit by a margin of 2 or less (not a critical) only grazes: the wound's bleed and pain drop one step each and it calls for no stop check.

Stop check: a serious or critical wound marked for one (most are) calls for d100 against the fighter's **Nerve** (green 35, regular 50, veteran 65), minus pain and blood-loss penalties, and -10 more for a critical wound. Equal or under: he fights on. Failed by 1-20: **defend only** for 2 rounds; by 21-40: **stunned** for 2 rounds; by more than 40: **out of the fight** until helped or the fight ends. Defend only and stunned fighters cannot attack; stunned also -50% defence. Pain above 3 steps calls for a stop check every round.

Team morale: at the end of each round, a side with 25% or more of its fighters down rolls d100 against the best Nerve among those still up (its leader's, if he is up), +10 with a leader up, -20 if a leader is down, -20 once 50% are down. Over: the side breaks and runs or surrenders.

Characteristics: a team-builder character's sheet counts in the fight (anyone else counts 50 in each). Initiative: d10 + Agility / 10. Blood: 20 + (Endurance - 50) / 10. Toil: each hand-to-hand exchange he attacks or defends in counts, and every 30 (light kit), 20 (medium) or 12 (heavy), times Strength / 50, he is a fatigue step worse, to exhausted at most. A leader who is up adds (Presence - 50) / 5 to his side's morale. Rounded down throughout. First aid: on a side with any team-builder character, the best Leechcraft among those up rolls each treatment; success binds 2 bleed steps and cauterises without more pain, failure does nothing.

Battle Map

Scale: one hex is 2.2 yd (2 m) and a round is 6 seconds. The map has pointy-top hexes; the roller's default is 24 x 16.

A fighter's turn: stay in place, **advance** up to 4 hexes and still attack, or **run** up to 12 hexes and not attack. He may pass through friends but not stop on them, and cannot enter an enemy's hex.

Wounds and movement: the leg and move impairments halve both distances (round down); the collapse and stand impairments leave only a crawl of 1 hex; the breath impairment stops him running. A fighter who is stunned or out of the fight or surprised cannot move. Defend only: he may move but not attack.

Leaving contact: a fighter who moves more than 1 hex and ends no longer next to an enemy he started beside gives that enemy one free attack, if the enemy is up and able to attack. Stepping back 1 hex is a careful withdrawal and draws none.

Reach and range: a close-combat weapon strikes enemies within its reach (1 is the next hex). A missile weapon has short, medium and long range in hexes, with attack modifiers short +0, medium -20%, long -40%; no shot past long range. Weapons marked off-map (artillery, mines, stakes) are not aimed on the map: the GM decides whom they hit.

Weapon reach and range

Ranges are design estimates from each weapon's effective range in its period.

Weapon	Reach or range (short / medium / long)
Sword (arming sword)	reach 1
Axe (hand or long-hafted)	reach 1
Spiked club / morning star (knout)	reach 1
Spear / lance	reach 2
Pike (long infantry pike, 1450s-1700)	reach 3
Bill (English bill, hooked polearm)	reach 2
Poleaxe (axe, hammer and spike)	reach 1
Bow (war arrows)	15 / 40 / 90 hexes (33 / 87 / 197 yd; 30 / 80 / 180 m)
Longbow (English war bow, bodkin and broadhead arrows)	20 / 60 / 125 hexes (44 / 131 / 273 yd; 40 / 120 / 250 m)
Crossbow (bolts)	15 / 50 / 100 hexes (33 / 109 / 219 yd; 30 / 100 / 200 m)
Sling (stones, lead bullets)	10 / 30 / 60 hexes (22 / 66 / 131 yd; 20 / 60 / 120 m)
Dagger / knife	reach 1
Bayonet (musket or rifle)	reach 1
Sharpened entrenching tool (spade)	reach 1
Sabre or broadsword	reach 1
Cavalry lance	reach 2
Clubbed musket (butt stroke)	reach 1
Punch	reach 1
Kick	reach 1
Elbow or knee	reach 1
Matchlock musket	20 / 40 / 75 hexes (44 / 87 / 164 yd; 40 / 80 / 150 m)
Wheellock pistol or carbine (cavalry)	3 / 8 / 15 hexes (7 / 17 / 33 yd; 6 / 16 / 30 m)
Smoothbore musket (Brown Bess, Charleville)	25 / 50 / 100 hexes (55 / 109 / 219 yd; 50 / 100 / 200 m)
Flintlock rifle (Pennsylvania, Baker, Jäger)	50 / 100 / 150 hexes (109 / 219 / 328 yd; 100 / 200 / 300 m)
Flintlock pistol	3 / 8 / 15 hexes (7 / 17 / 33 yd; 6 / 16 / 30 m)
Smoothbore artillery (round shot, canister, grape, shell)	off-map (GM decides)
Rifle-musket (Minie ball)	50 / 150 / 250 hexes (109 / 328 / 547 yd; 100 / 300 / 500 m)
Breech-loading rifle or carbine (Sharps, Spencer, Springfield 1866)	50 / 150 / 250 hexes (109 / 328 / 547 yd; 100 / 300 / 500 m)
Artillery (canister, shell fragments)	off-map (GM decides)
Revolver	5 / 12 / 25 hexes (11 / 26 / 55 yd; 10 / 24 / 50 m)
Service rifle (bolt or semi-auto, 1914-53)	100 / 200 / 300 hexes (219 / 437 / 656 yd; 200 / 400 / 600 m)
Assault rifle (M16, AK)	50 / 150 / 250 hexes (109 / 328 / 547 yd; 100 / 300 / 500 m)
Rifle, armour-piercing ammunition	100 / 200 / 300 hexes (219 / 437 / 656 yd; 200 / 400 / 600 m)

Weapon	Reach or range (short / medium / long)
Machine gun	100 / 300 / 500 hexes (219 / 656 / 1094 yd; 200 / 600 / 1000 m)
Pistol or submachine gun	25 / 50 / 100 hexes (55 / 109 / 219 yd; 50 / 100 / 200 m)
Hand grenade	5 / 10 / 15 hexes (11 / 22 / 33 yd; 10 / 20 / 30 m)
Mortar, rocket or artillery	off-map (GM decides)
RPG (rocket-propelled grenade)	50 / 100 / 150 hexes (109 / 219 / 328 yd; 100 / 200 / 300 m)
Bazooka or Panzerschreck (rocket launcher)	30 / 60 / 100 hexes (66 / 131 / 219 yd; 60 / 120 / 200 m)
Anti-aircraft gun (20 mm, 40 mm, ZPU, 37 mm, ZSU-23)	150 / 400 / 750 hexes (328 / 875 / 1640 yd; 300 / 800 / 1500 m)
Anti-tank gun (towed: 6-pounder, 57 mm, Pak 38 and 40, 45 mm, 47 mm)	off-map (GM decides)
Recoilless rifle	100 / 200 / 400 hexes (219 / 437 / 875 yd; 200 / 400 / 800 m)
Anti-tank guided missile	250 / 750 / 1500 hexes (547 / 1640 / 3281 yd; 500 / 1500 / 3000 m)
Mine, booby trap or IED	off-map (GM decides)
Punji stake	off-map (GM decides)
Fragments, unspecified (shell, grenade, mine)	off-map (GM decides)

Camps and Works

Making camp: a camp's works are those the battle map lays out for it: a ring of hexes big enough for the force (about 20 m2 a man on foot, 40 with horses), with the bank and palisade on its edge and the ditch one ring out. 75% of the men work at once; the rest guard and cook. Work uses what is left of the day's marching hours and then 4 evening hours, so a camp made after the march costs no marching time; beyond that it runs on into the next day. Timber for palisades and stakes takes longer to fetch when no woods are within a hex. A fight can be set up only once an enemy force has marched to within 1 hex of the camp. If it arrives before the camp is finished, the GM chooses: attack the works built so far, or wait. Works go up in the order listed, each kind all round from the gate before the next.

Works on the battle map: ditches, banks, palisades, gates and walls lie along hex edges; stakes, abatis, pavises and wagons fill a hex. Crossing costs extra movement; a palisade, a barred gate or a wall stops movement until breached. Missile attacks on a man right behind a work lose its cover. In close combat only reach-2 weapons (spears, bills) strike over a palisade, gate or wall, and a man attacking up at a defender on the high side of a bank, ditch or wall takes its height penalty.

Breaching: a fighter next to a work can spend his attack on it: one man-round. When the man-rounds reach the work's breach number it is open. A gate is opened or barred from inside.

In the way: each fighter standing on the line between a shooter and his target costs the shot 10% (at most 30%). A miss goes into the first man in the way at 50%: roll the hit on him with no attack roll and the severity table. Bows and crossbows loose high over the men in the way: the penalty, but never a stray.

Surprise: when a fight is set up from the travel map, d100 against 30% + the camp's shift (no camp +10; bivouac +20, watched camp +0, staked camp -10, fortified camp -20, quartered +0) + 20 if it starts between sunset and sunrise + 20 in fog + the attackers' best Stealth / 5 - the defenders' best Watch / 5 (named characters with the forces), within 5-95%. Surprised: in the wound roller the defenders and their friends cannot act in round 1; on the field map their units start shaken.

Ground: the GM paints hexes as rocks and rubble, woods and brush, marsh, deep water, road or bridge (roads and bridges are open going). Entering rocks or woods costs +1 hex of movement, marsh +2; no one enters or stands in deep water, though shots cross it. A shot at a man in rocks loses 10% and the rocks hide his legs (the table's behind-cover situation); in woods it loses 20%. Cover from a work counts instead when it is better.

Height: hexes stand at level 0 to 3; each level climbed costs +1 hex of movement. A blow or shot from higher ground takes the attacker-higher situation (head and shoulders), and from lower ground attacker-lower. A man striking uphill in close combat loses 10% a level (two levels at most). A shot downhill reaches 10% further a level. Higher ground rising above the straight line between shooter and target blocks the shot; men in the way below that line are shot over.

Laying out ground: a fight sent from the travel map lays its ground out like the defenders' travel hex: clumps of woods, rocks and marsh and a rise or two, in the shares below; inside a camp's works the ground is cleared and level. The fight stands at a fixed spot in that hex: where the map reaches past a side of the hex, the ground beyond is laid out like the neighbouring hex, a lake as deep water and a river as a band of deep water 8 to 25 hexes wide, with a ford 3 to 6 hexes wide (marsh to wade) when a ford or bridge is next to the hex. A fight in a road, ford or bridge hex is on the road or at the crossing: the road (and at a ford or bridge the river) runs through the map's middle toward the neighbouring hexes it links to, crossing the river by a ford or a bridge; a camp with works there stands on the bank away from the attackers, moved back from the middle as far as the river needs (a camp too big for the map showing the stretch facing the river), the river passing it and the gate facing the crossing; a camp on a road has a gate wherever a road leaves it. Attackers come in on the map's edge facing the way they came (in the defenders' own hex, from the side of the hex they last left), on the dry hexes nearest it. Open ground: woods and brush 3%, rocks and rubble 2%, 1 rise to level 1; Road: woods and brush 2%, rocks and rubble 1%, 1 rise to level 1; Farmland: woods and brush 7%, rocks and rubble 1%, 1 rise to level 1; Heath: woods and brush 10%, rocks and rubble 6%, 1 rise to level 1; Forest: woods and brush 55%, rocks and rubble 4%, marsh or deep mud 2%, 1 rise to level 1; Hills: woods and brush 6%, rocks and rubble 10%, 2 rises to level 3; Mountains: woods and brush 4%, rocks and rubble 30%, 3 rises to level 3; Marsh: woods and brush 10%, marsh or deep mud 35%; Ford: woods and brush 4%, marsh or deep mud 12%; Bridge: woods and brush 3%, rocks and rubble 3%; Village: woods and brush 5%, rocks and rubble 10%; Town: rocks and rubble 20%.

Taking cover: on his turn a fighter may go to ground instead of moving or attacking. Until he moves or strikes in close combat, shots at him lose 20% (or the ground's cover if better) and hit as behind cover, and blows at him hit as at a man down. Getting up takes 2 hexes of his move, to move on or to strike in close combat; he may shoot from cover without getting up.

Camps (hours to make, on foot, timber hauled)

Weather

Calendar and daylight: each map has a start date (Julian or Gregorian), a latitude and a climate. The march starts 1 hour after sunrise and stops 1 before sunset, up to 8 hours.

Weather: each day is rolled from the climate's monthly normals, wet and dry spells tending to last (40% persistence). Wet days fall as snow when the high is 36 °F (2 °C) or less. The GM can change any day.

Ground: rain builds mud and snow lies, wearing off in dry or mild weather; heavy rain floods fords for two days. Mud and snow slow the march (see the table below); deep mud or snow costs +1 movement per hex in battle.

Rest and fatigue: the night's rest starts from the camp's and drops a step for each point of hardship (wet, cold) beyond its shelter. Fatigue changes each night: heat or cold on a march of 4 hours or more, 6 hours in deep mud or snow, and the night (bad +1, poor 0, fair -1, good -2).

Light on the field map: dusk or dawn: no aiming or calling fire beyond 20 hexes, 219 yd (200 m), aimed fire -5%; moonlit night: no aiming or calling fire beyond 10 hexes, 109 yd (100 m), aimed fire -10%; dark night: no aiming or calling fire beyond 5 hexes, 55 yd (50 m), aimed fire -20%. A hex lit by a flare or illumination is seen as by day for 2 exchanges; the GM's flare lights 10 hexes round it. A battle from the travel map takes the hour's light: dusk within 30 minutes of sunrise or sunset; at night moonlit when the moon is up, at least 50% lit and the sky clear, else dark.

Fighting in the dark: a unit that fired when sight is under 30 hexes is seen by its muzzle flashes out to 30 hexes through the next exchange. Night-vision devices (a unit's own, or its kit's: Ranger Body Armor, Interceptor vest, Plate carrier carry night-vision goggles): Starlight scope (1960s-70s) sees 20 hexes, aims -15% at worst; Night-vision goggles (1990s on) sees 30 hexes, aims -5% at worst; Thermal sight (tanks from the 1980s, teams from the 2000s) sees 60 hexes, aims as by day, and through smoke; Infrared searchlight and sights (tanks, 1950s-70s) sees 16 hexes, aims -20% at worst. Vehicles with none chosen carry their war's: Vietnam infrared searchlight and sights, Late 20th century thermal sight, Iraq & Afghanistan thermal sight. A machine gun laid on a fixed line by day or at dusk fires blind down it in the dark at the nearest enemy within 1 hex of it, -15%. Moving: moonlit night +1 a hex; dark night +1 a hex. A unit that moved may lose its way: moonlit night 10%; dark night 25%, plus half of (60 - its Nerve); it turns one point off its line and cannot move for 1 exchange.

Conditions

Weather	Missile sight	Bows, crossbows	Firearms	Night hardship
Fair	clear	-	-	0
Overcast	clear	-	-	0
Fog	25 hexes, 55 yd (50 m)	-	-	0
Rain	150 hexes, 328 yd (300 m)	-10%	may misfire	1
Heavy rain	75 hexes, 164 yd (150 m)	-20%	may misfire	2
Storm	50 hexes, 109 yd (100 m)	-20%	may misfire	2
Snow	75 hexes, 164 yd (150 m)	-10%	may misfire	1
Heavy snow	40 hexes, 87 yd (80 m)	-10%	may misfire	2
Blizzard	15 hexes, 33 yd (30 m)	-20%	may misfire	3
Sandstorm	200 hexes, 437 yd (400 m)	-	-	1

Misfires in the wet

Unit combat

Unit combat (the rank and file, on the field map): one exchange is about a minute. In melee the front rank of each hex touching the enemy strikes (10 men a hex face in close order; a rank more for each hex of reach past the first: two for spears and bills, three for pikes). 9% of them make a telling attempt each exchange; archers loose their rate a minute, 3.3% of the shots aimed at a man. Each attempt is an individual attack against the unit's attack %, parried on its defence % (not from flank or rear, nor against missiles), then location, severity from the margin, and armour, as for one fighter.

Light wounds and grazes fight on. Serious and critical wounds call for a stop check against the unit's Nerve; a failure is down. From breech-loaders (the 1860s on) and shell a serious or critical wound is always down and a light one calls for the stop check. A wound fatal within rounds kills. Flank +20, rear +30, a mounted charge +20 at x2 tempo (none onto a steady front of pikes in close order, whose men strike horse at +20), shaken -10. Men in an intact bunker can't be fought hand to hand; it is stormed with grenades, satchel charges or flamethrowers (10%, 25%, 40% an exchange to knock it out).

Unit morale: after an exchange a unit checks if it lost the exchange, has 25% of its men down, lost 10% in the exchange, or was struck in flank or rear: d100 against Nerve, +20 while steady, +10 with a leader, -20 if he is down, -20 at half strength, -20 if flanked, +10 dug in, -5 a man it lost more than it put down (at most -30). Steady fails: shaken; shaken fails: broken. A broken unit flees: every enemy in reach strikes it at +20, no parry, x2 tempo. On the field map it runs on through its own side's units to clear ground (up to 3 times its move); each it runs through moves 50% of its move that exchange.

Ground and works on the field map: open ground (move 1); rough ground (move 2); woods (move 2, cover -20%); scrub and orchard (move 2, cover -10%); marsh (move 3, no horses); slope (move 2, height 5: -5% striking up at it, +5% shooting down from it); high ground (move 1, height 10: -10% striking up at it, +10% shooting down from it); buildings (move 2, cover -30%, no horses, hides men); tall buildings (move 3, cover -40%, height 10: -10% striking up at it, +10% shooting down from it, no horses, hides men); rubble (move 3, cover -40%, no horses, hides men); water (move 1). Works are the battle map's, along the 11 yd (10 m) hex sides: only reach-2 weapons strike over a palisade, wall or barred gate, from the front rank; striking up a bank, ditch or wall costs its height; a volley takes the best cover where it lands. Each step costs the worst of all the unit's hexes, and a turn adds the worst extra going of the ground its ends sweep; woods and buildings between block aimed fire, direct gun fire and the sight for calling fire, except the 1 hex next to either end (a man sees out of a wood's edge and into it); scrub and orchards thin sight instead: each hex of them between costs aimed fire 10%, and more than 3 block it as woods do; rubble's low heaps give cover but do not block sight; from higher ground a man sees over lower woods and roofs and shoots over units below; ground between higher than both ends is dead ground and blocks sight, except within 1 hex of either end (hull-down); shell fire and a machine gun's fixed line need no sight. A unit ordered to breach puts half its front rank to hacking at the work in front (a field-map side takes 5 times a battle-map side's breach figure). Escalade: men on foot marked with ladders fight across a palisade, wall or barred gate, 25% of each front hex's front rank (at least one) at -20%, the defenders' front rank striking back, and climb over it for 4 hexes of movement. The battle map's weather applies.

Guns: a battery is a unit armed with guns, in battery order; its men are the crews, 10 to a gun, and as crews fall fewer guns are served. Each served gun fires 1 round an exchange at the nearest enemy in front within 1094 yd (1000 m): canister to 328 yd (300 m), round shot beyond. Round shot strikes the unit (60% to 547 yd (500 m), 40% to 820 yd (750 m), 25% to 1094 yd (1000 m)), then each man in its path (the ranks deep, at most 12) is hit at 40%, so columns suffer most. Canister throws 8 chances a round (50% to 109 yd (100 m), 30% to 219 yd (200 m), 15% to 328 yd (300 m)). Cover, the weather and open order cut both. Each man hit takes a wound roll at 80% with no parry.

Targets and line of fire: the GM can name a battery's target; it fires at it when it can, otherwise at the nearest. The GM can order its shot (canister only within canister range) and split off sections of its guns at other targets, each with its own shot and its share of the rounds left, by its guns (one gun stays with the battery). Gunners cut fuses: the air band of the fuse table grows by crew quality (green −10, regular 0, veteran +10), and 15 more on a target fired at last exchange at much the same range. A battery charged in front fires 1 round of canister a gun into the charge as it comes in, and the men it cuts down do not strike. No unit shoots through another unit, friend or enemy, except from high ground over a unit on lower ground (guns: round shot, never canister); bows and crossbows may loose high over units at 20% off. **Shell:** howitzers fire shell beyond canister range over anything between; a shell lands (45% to 547 yd (500 m), 30% to 820 yd (750 m), 20% to 1094 yd (1000 m)), then its fuse does, before the gunners' setting: 15% early, 25% air, 45% ground, 15% blind; a burst throws 12 chances at 35% in the air (cover counts half) or 25% on the ground. Canister gains 5% beyond 109 yd (100 m) on firm ground. **Rifled guns** reach 1750 yd (1600 m) and fire percussion shell beyond canister range on a flat path (a clear line of fire, no bounding): it falls on the target (60% to 547 yd (500 m), 45% to 1094 yd (1000 m), 30% to 1750 yd (1600 m)) and its fuse does, before the setting: 5% early, 5% air, 75% ground, 15% blind; their canister throws 5 balls a round. **Ricochet:** on firm ground round shot bounds on, striking the first other unit within 328 yd (300 m) past the target (30% to 109 yd (100 m), 20% to 219 yd (200 m), 10% to 328 yd (300 m) past it) and going through its ranks; rough ground, woods, marsh, mud or snow stop it. A round-shot strike on the battery it is fired at knocks out a gun at 10%. **Ammunition:** 50 rounds a gun; resupplying takes an exchange out of contact, without moving or firing.

 © 2026 Scott Wares. All rights reserved.

Limbering: a limbered battery moves but cannot fire; unlimbered it fires but can only be manhandled 2 hexes. Changing over takes an exchange, without moving or firing. Hand to hand the crews fight with sword (arming sword). A battery that breaks loses its guns.

Modern infantry: extended order is 3 men a hex (shots at it x0.5, 8 hexes a move). Magazine rifles fire 10 rounds a minute, self-loading and assault rifles 15, pistols and submachine guns 12. A unit can go to ground on its own move: shots at it -15%, and it cannot move until it gets up. Digging in: out of contact, 3 exchanges neither moving nor firing, and it counts as gone to ground while it stays in its holes (it may move, leaving them). Hidden men (gone to ground, in a bunker or in buildings): only 10% of the aimed shots at them find a man (5% of a machine gun's), and dug in they get +10 on morale.

Machine guns: a team is a gun and 5 crew a hex, the gun served while one of its crew is up. Each gun fires 300 rounds a minute, 10% of them rolled as aimed shots. Its beaten zone: the first other unit, friend or foe, within 20 hexes past the target on the line of fire takes 50% as many shots at that range (ground that stops shot stops it).

Ammunition: a unit with a missile weapon (not vehicles or guns) carries its load in exchanges of fire: its rounds or arrows a man (a gun's for machine guns) over its rate a minute times 0.3 (the share it really spends), so a longbowman's 48 arrows last 20 exchanges of shooting. Each exchange it shoots uses one; at 25% or less it shoots at half rate; with none it cannot shoot and has -10 on morale. Resupply: an exchange out of contact, neither moving nor firing, within 5 hexes of its side's edge, a lorry or carrier, or a supply dump (placed in set-up, or by air drop from the Second World War on).

Indirect fire: off-map batteries on call, on a hex one of the side's units can see (in the weather, no woods between). Each shell scatters (d6 direction, 0 to scatter hexes); every man within the radius is struck at the % for his distance (x0.35 gone to ground, less ground cover) and wounds as a shell fragment at 70%. mortars 3 a minute a tube, lands this exchange, scatter 2, struck % by distance 15/5/1; field guns 2 a minute a tube, lands next exchange, scatter 4, struck % by distance 20/8/3/1; heavy howitzers 1 a minute a tube, lands next exchange, scatter 5, struck % by distance 30/12/5/2/1/0.5; tanks (direct fire) 2 a minute a tube, lands this exchange, scatter 0, struck % by distance 25/5; autocannon (direct fire) 3 a minute a tube, lands this exchange, scatter 0, struck % by distance 20; fighter-bombers (bombs, napalm) 2 a minute an aircraft, lands in 2 exchanges, scatter 3, struck % by distance 45/25/12/5/2; helicopter gunships (rockets, guns) 4 a minute an aircraft, lands this exchange, scatter 1, struck % by distance 20/6.

Counter-battery and fire plans: crews a tube: mortars 4 (fires with 2), field guns 6 (fires with 3), heavy howitzers 8 (fires with 4). A located battery can be fired on with no one seeing it: each shell lands among the guns at the kind's counter %, knocking out a tube and striking 2 crewmen, or at 3 times that bursts close by, striking 1; struck crewmen roll wounds and those put down are lost (their wounds count with their side after the battle, as a unit's), and a tube without its men is silent. Displacing, a battery is silent for its exchanges (mortars 1, field guns 2, heavy howitzers 3) and then unlocated. Smoke drifts downwind each exchange, by hexes: calm 0, breeze 1, strong 2, gale 2. A creeping barrage keeps a fire plan: 1 to 3 hexes a lift, 1 to 4 exchanges on each line, a set number of lines, then up to eight more legs, each the same way or turned. A battery may be placed on the map: it then reaches only its range (mortars 360 hexes, field guns 1100 hexes, heavy howitzers 1450 hexes), counter-battery fire reaches it only from within range, an enemy within a hex of it overruns it, and displacing it moves it to a new place. Illumination (one round a tube, called on any hex) lights the hexes round it, out to 15 (mortars), 30 (field guns), 40 (heavy howitzers) hexes, for the light's exchanges after the one it is fired in. **Aircraft** are called like batteries (fighter-bombers (bombs, napalm): 2 sorties an aircraft, 2 exchanges later, not at night; helicopter gunships (rockets, guns): 6 sorties an aircraft, at once). They are never located, have no crews to lose, and do not fly in fog, storm, heavy snow, blizzard or sandstorm. **Ground fire:** each attack run, every aircraft attacking is brought down at 0.5% for each enemy machine gun served, 1% for each enemy unit with RPGs or recoilless rifles and 0.2% for every 100 enemy riflemen within 30 hexes of the aim (fighter-bombers x1; helicopter gunships x2), at most 12%; anti-aircraft guns within 100 hexes add 3% a gun served (times exposed), the whole at most 35%. Of the aircraft hit, 40% are brought down and the rest turn for home damaged; either way it takes its share of the flight's attacks with it. **Attack runs:** a strafing run strikes every man on a line of 5 hexes at 12% (less cover and going to ground), a napalm strip every man on 3 hexes at 45% (no cover helps; critical burns, 35% killed); vehicles on the line knocked out at 3% and 15% times their armour's shell. Napalm only from 1944. An aimed hex marked with smoke scatters an air attack half as far. **Forward air controllers:** with a unit marked as one seeing the aim, aircraft scatter 1/2 as far; without, they hold off any target within 10 hexes of their own men.

Landing by air: a field can mark landing zones. Each side has helicopters (by default 16 of 5 men each, back for the next load 30 exchanges after landing; at most 8 at a zone in an exchange). A unit can come on by air at a zone, its first men on the zone or the nearest spot within 4 hexes where they fit. None land while an enemy unit stands within 2 hexes of the zone. If an enemy unit could shoot at the zone it is hot: each man landing is struck at 10% and wounds as by shellfire, and each helicopter is hit at 10% (20% of those downed, a wreck on the zone; the rest damaged; either is lost for the battle). Helicopters also bring supply dumps to a zone (from Vietnam on) and lift units out. A downed helicopter's wreck is cover for the men in its hex.

Vehicles: one a hex (tanks: 4 crew, move 12, heavy armour, main gun to 100 hexes, 1 a vehicle an exchange, 6 men can ride on its hull; infantry fighting vehicles: 3 crew, move 14, light armour, main gun to 80 hexes, 2 a vehicle an exchange, carries 7 men a vehicle; armoured carriers: 3 crew, move 14, light armour, carries 10 men a vehicle; gun tractors and trucks: 2 crew, move 12, soft armour, tows 1 anti-tank gun; lorries: 2 crew, move 14, soft armour, carries 20 men a vehicle; ontos (106 mm recoilless rifles): 3 crew, move 14,

 © 2026 Scott Wares. All rights reserved.

light armour, main gun to 100 hexes, 1 a vehicle an exchange). Small arms cannot hurt armoured vehicles; no one fights them hand to hand. Soft-skinned vehicles (soft): small arms shoot at them too, 0.5 aimed shots a man (3 a machine gunner) an exchange, each hit knocking one out at 5%, no lesser damage. Anti-armour weapons fire RPG 0.25 a man, Bazooka 0.25 a man, Recoilless 0.25 a man, ATGM 0.1 a man an exchange, every round aimed; a hit knocks a vehicle out by its armour (composite: rocket 15%, guided missile 60%, gun 35%, shell x1; heavy: rocket 15%, guided missile 60%, gun 35%, shell x1; light: rocket 50%, guided missile 90%, gun 75%, shell x3; soft: rocket 80%, guided missile 95%, gun 90%, shell x6), x2 into the flank and x3 into the rear. A hit that does not knock it out strikes the turret at 35% (gun out 40%, immobilised 5%), else the hull (immobilised 35%, gun out 5%); a unit cannot move until it abandons its immobilised vehicles (their crews leave unhurt). A main gun hits a vehicle by range, or bursts on men as a tank's round on call; a shell or bomb in a vehicle's hex knocks it out at the kind's knock % times shell. A knocked-out vehicle's crew are out of the fight, each struck at 50%. Carriers take a foot unit aboard from beside them and set it down beside them; riders in a knocked-out carrier are each struck at 30%; a small-arms hit on a soft-skinned carrier (lorries) that does not knock it out strikes a rider, and small arms shoot at men riding on a tank's hull (rides), each hit striking one; shells near the tanks strike them as men in the open. Riders shoot from IFVs' firing ports (25% of them) and from tank hulls (50%); not from carriers or lorries. Going a hex: open ground 1, rough ground 2, woods 3, slope 2, high ground 1; nothing else.

Anti-tank guns (1939-53): a unit of towed guns, 5 men a gun, a gun a hex, manhandled 2 hexes. Each gun served fires 1 round an exchange to 100 hexes as a tank's main gun, vehicles first (hits 70/45/20% by range, knocking out by the armour's gun %), high explosive at men, 40 rounds a gun (resupply as a battery). Gun tractors tow one gun each: hooked up the guns move with them and do not fire; unhooked, they fire from the next exchange. Its crews are men: small arms and shells strike them. The enemy commander tows them forward and unhooks them in reach.

Gun shields and emplacements: shields (anti-tank guns, anti-aircraft guns; machine guns the GM marks shielded in set-up) take 30% off small arms from the gun's front only. In set-up the GM can emplace a gun unit (anti-tank, anti-aircraft, machine guns, batteries): while it stands it counts as gone to ground (-15%, hidden, steadier) and cannot move, though it may turn; a unit that breaks leaves its pits.

Minefields (1939 on): painted before the battle, marked or hidden (shown once set off). A unit that moved into minefield hexes (its footprint along the cheapest way within its move from where it began that crosses the fewest known minefield hexes, nearest the straight line of equals) sets them off before the shooting, a hex's worth of men a hex struck at the kind's % (anti-personnel mines: men 10%, vehicles 0%; anti-tank mines: men 0%, vehicles 30%; mixed minefield: men 8%, vehicles 25%), wounded as by a mine at 70%; a vehicle struck is knocked out at 25% (heavy) or 60% (light), else immobilised. Sappers (a foot unit so marked), standing out of contact and neither moving nor firing, lay a hidden field in the row ahead of their front in 3 exchanges, or lift the known mines there in 2; their own side knows their mines, which do not strike it.

Suppression: a unit shelled or under machine-gun fire checks Nerve at the end of the exchange (+10 gone to ground); a failure pins it for the next exchange: no move, 50% of its fire.

Heroes in units: a named fighter in the front rank makes 3 times a ranker's telling attempts with his own attack, and blows on the front fall on him 2 times as often as on a ranker there; a shooting hero looses 3 times a ranker's aimed shots. His wounds use the full rules and his own stop check (a failure: down for the battle); their pain, his Blood lost, their impairments (an arm, a leg, dazed), the ones he came with too, and his sickness come off his attack and defence as in the wound roller, and too sick to do more than defend, he only defends. In a quiet exchange (his unit not in contact, not under fire, no losses) his worst-bleeding wound, from this battle or one he came with, gets first aid: the best Leechcraft among his unit's heroes still up rolls, a success binding 2 steps of bleeding; with no one who has Leechcraft, his comrades bind one step at 60%. On a success an arm or leg bleeding 2 or more is tourniqueted instead: it stops. With an arm hurt (an arm wound, a lost grip, a useless hand or arm, either side) he cannot use a two-handed weapon (bows, crossbows, long guns, pole arms): he only defends, here and in the roller. Lamed (a leg wound, cannot stand, collapsed, slowed) or down and carried, he halves his unit's move (times 0.5, at least 1 hex) until 2 of its men carry him back or it leaves him behind, lying on its hex. With an aid post for his side (placed by the GM) they carry him there, 3 movement an exchange by the cheapest way (round water, walls and enemy units; to the map edge if no way leads to the post), shells striking the party as men in the open, and come back after as long; with none, he leaves the battle at once and they return after 3 exchanges unless the unit has broken. A wounded hero who can walk may go back alone the same way (to the post, or the map edge behind his unit). At the post he gets first aid every exchange at 75%, and his wounds go back to the roller treated; an enemy unit within 1 hex of it overruns it, taking or killing the men there by quarter. On its side's move the GM can move a post: the men there go with it, and it gives no first aid that exchange. A hero left lying is picked up by a unit of his side standing on his hex, or found by an enemy one (quarter). A unit's medics give first aid at green 30%, regular 45%, veteran 60%. In the wars before 1914 a heavy bleed a tourniquet cannot reach is cauterised (+1 pain unless a healer does it). A hero left on the field at the end (left behind, on his way back, or down with a unit that broke) is found if his side holds the field; else d100 against the war's quarter (default 50%) makes him a prisoner, over it he is killed. A leader adds his unit's leader modifier while he is up.

The enemy commander (field map, optional): it orders one side, attacking or holding, at the start of each of its moves; Undo puts the move back. It knows an enemy only if one of its units sees it (sight, light, woods, smoke, as calling fire), or saw it in the last 3 exchanges (where it was then); what a unit sees from where it has just moved, the units ordered after it know; with none known, a unit holds. Each unit's target, among those it knows: 10 points off a hex away, and times its quality's sense (green 0, regular 1, veteran 2): 1 a % of the enemy's men down, 20 if it is shaken, 20 if it is a danger to the unit (shooters, for men without missiles; men without missiles within a charge, for shooters). Shaken, it holds (and goes to ground under missile fire). Steady, it hesitates on d100 at or under green 30, regular 10, veteran 0%; otherwise it takes the best hex it can reach facing the target: 10 points a hex nearer, cover % times green 0, regular 1, veteran 2, less a point a hex moved; of equals, the hex nearest the straight line to it. Shooters stop where the target is in range, keep 2 hexes off, and never charge; with a modern weapon they go to ground under fire. Storming works: attacking, Smoothbore musket (Brown Bess, Charleville), Rifle-musket (Minie ball), Breech-loading rifle or carbine (Sharps, Spencer, Springfield 1866), Service rifle (bolt or semi-auto, 1914-53), Assault rifle (M16, AK), Pistol or submachine gun do not stop at range when the target is dug in, behind works giving it cover, or in buildings or rubble; they close (ignoring cover) and charge as men without missiles. A unit whose target is already in its front arc keeps its facing. Others charge only if their men × attack % (with those of steady friends touching them) is at least this % of the target's: attacking green 100, regular 80, veteran 60; holding green 150, regular 120, veteran 100. A steady unit charging may pass through its own side's units (not to move otherwise); those on its straight line are jostled, their move halved that exchange. Holding, a side leaves its ground only to charge, fall back to its objective, plug a gap or pull its guns back. Reserve: at its first move (unless the GM marks reserves) it holds back its rearmost units up to green 0, regular 25, veteran 33% of its men; they hold until it commits one a move, when a unit of its side breaks, an enemy it knows of comes within 12 hexes of one, or (veterans) an enemy breaks; committed because a unit broke, the reserve unit nearest where it stood goes there to plug the gap (as its own objective). Objective (a hex the GM marks, optional): attacking, a unit within 1 of it holds it (charging only with holding odds); one with no enemy to go for, or that would only stand or turn while its target is more than 4 from the objective, advances on it (nearest hex in its allowance). Holding, a unit more than 3 from it falls back to it unless it can charge. Enemies within 4 of it score 30 more as targets; the log names who holds it each exchange. A battlefield's objective has its own radius (the position as drawn), and the other distances widen by as much. A second objective (GM-marked): attacking, once its side holds the first, the units on the first stay and the rest go for the second, going back for the first if the enemy retakes it; holding, once the enemy holds the first, its units fall back to the second. Known minefields on the way cost green 5, regular 40, veteran 80 points a hex. Its batteries and anti-tank guns on the map, in action, turn to face the nearest enemy it knows of; its off-map batteries with no mission, and its aircraft that can fly, are called on the enemy it sees that scores best as a target (aircraft: one its air controllers see first), never where its own men are within the burst and scatter (cut where a controller sees the aim); aircraft fly a napalm strip (where the war used it) or a strafing run along an enemy front as wide as the run, if its own men are clear of the line by the scatter. Attacking, one battery puts a creeping barrage on an enemy within 20 hexes of a unit moving or charging on it, lifting 1 hex an exchange along the unit's facing for 3 lines. Attacking, one battery first lays smoke (the soonest to land) on the nearest enemy shooting at its men who cannot reply, unless it is dark, a gale blows or the hex is smoked. Its located batteries that an enemy counter-battery mission is aimed at displace first (a placed one moves its place 30 hexes along the nearest map edge, away from the battery firing). In the dark, one battery with illumination (the soonest to land) lights the enemy it has lost sight of nearest its men, where last seen, unless lit or a round is on its way. Then one battery, the one with the best counter % that reaches one, fires counter-battery on the located enemy battery with the most tubes served. Its sappers, attacking, lift the known enemy mines in the row ahead when the straight way to their target (or the objective) crosses known mines, first closing up along that way to the belt (as far as their move goes without entering known mines) and so working a lane through it row by row; holding, or at the objective, with no enemy it knows of within 8 hexes, they lay mines in the row ahead (mixed if the enemy it knows of has vehicles, else anti-personnel). Attacking, its guns with no known enemy in reach go forward: a battery limbers, moves and unlimbers once one is in reach; anti-tank guns hook up to an empty tractor beside them and are unhooked in reach (the tractor counting 4 hexes less; empty tractors fetch them); moving guns stop in reach, no nearer than 2 hexes. Holding, its guns unlimber or unhook where they stand. Attacking or holding, guns a known enemy could reach at a charge, with no steady unit of its side on the line between, limber (or hook up) and pull back to the hex in their allowance furthest from it. Attacking, an empty tractor drives beside the nearest guns that want a tow, to hook them up next move. Attacking, a foot unit beside empty carriers of its side (not tractors) with room for it gets aboard while no enemy it knows of is in reach of its weapon or the carriers'; its carriers set riders down once one is, or at the objective. Holding, by day or at dusk, its machine guns on foot with no fixed line are laid on the nearest enemy it knows of within their reach. It leaves works to the GM.

After the battle: a side with no unit standing has lost the field, and its men down there are left behind, dead. A wound fatal in minutes kills unless he is bound in time (10%); one fatal in hours kills unless his camp treats it (no camp 0%, a camp 40%, quarters 60%). The rest are carried to camp and heal on the wound track (Camp disease).

Medevac: a side's wounded carried off by ambulance wagons (the Civil War and the Indian Wars) are saved at 50% when a wound kills in hours, by motor ambulances (the world wars) at 65%, and by medevac helicopters (Korea on) at 85%, and a wound that kills in minutes at 20% (the better of these and the camp's). Helicopters need a landing zone on the field and a helicopter of the side not lost, else motor ambulances. The GM can untick a side that had none.

Unit quality

Quality	Attack	Defence	Nerve
Green	40%	25%	35
Regular	50%	35%	50
Veteran	60%	45%	65

Missile rates

Missile weapon	Shots a minute
Anti-aircraft gun (20 mm, 40 mm, ZPU, 37 mm, ZSU-23)	150
Longbow (English war bow, bodkin and broadhead arrows)	8
Bow (war arrows)	8
Crossbow (bolts)	2
Sling (stones, lead bullets)	6
Matchlock musket	1
Smoothbore musket (Brown Bess, Charleville)	2
Flintlock rifle (Pennsylvania, Baker, Jäger)	1
Rifle-musket (Minie ball)	2
Breech-loading rifle or carbine (Sharps, Spencer, Springfield 1866)	8
Service rifle (bolt or semi-auto, 1914-53)	10
Assault rifle (M16, AK)	15
Pistol or submachine gun	12
Machine gun	300

Quick-play blows and shellfire

Resolve a striking group's blows on the rankers in one roll instead of one at a time. 1) Count the tries as usual (strikers x tempo, or shooters x rate). 2) Find the men down per 100 tries in the conflict's chart for the weapon against the armour, at the attack % after all modifiers (read between the columns), times the quality factor, times (1 - parry% x 0.9) if the target can parry. 3) The average = tries x that / 100; roll d100 on the chart below, on the nearest average's row, for the men down. Blows that fall on a hero are still rolled one at a time. Shellfire the same way: for one battery's fire on one unit in an exchange, add up the men within reach of each burst times their struck % (as for each man), which is the average; roll d100 on the chart for the men struck. The field page rolls both so when quick-play is ticked, and prints the exact numbers for the battlefield in play (Quick-play sheet).

Team generation

Medieval (c.1250-1460)

Medieval (c.1250-1460): a team in twenty minutes. A player runs a team of four to six; the first member leads. Each character is made in five steps.

1. Characteristics: Strength, Agility, Endurance, Wits, Nerve, Presence: roll 3d6 x 5 for each in order (15-90), or take the array 70, 60, 55, 50, 45, 35 and place it, highest first, in the order his career prefers (the GM may let him swap two).

2. Origin: d100 on the origin table: a skill +15, a trait and its drawback (a characteristic +/-10 or a skill +/-15).

3. Career terms: leaders serve three terms, the rest one or two. Each term: his career's main skill +15 the first term and +10 after, its second skill +5, and d100 on the career's table: the skill named +15 and the event. An event he has already had moves to the next row down. Nobody dies in generation. He is 16 plus 4 a term.

4. Old wounds: a row marked * leaves an old wound, as does d100 at or under the career's old-wound %. Roll its location on the region's wound table for the weapon shown, then d100: 70 or less a healed scar; more, a lasting hurt: -5 to Wits (head), Presence (face), Strength (arms), Agility (legs) or Endurance (body).

5. Skills and kit: each skill starts at a characteristic divided as shown (rounded down), plus what he gained, at most 90. His attack is the skill his weapon is fought with; his defence the better of Parry and Dodge; his Nerve the characteristic. Kit and weapon come with his career and region (the table below). He starts with 30 Days' pay saved for each term (a Day is a common soldier's day's pay in his army's coin), and earns 1 Day for each day of rest spent earning money.

Followers: a big team's other men get one line each: a career (for kit and weapon), a name, and a quality on d100 (default: 01-30 green, 31-80 regular, 81-00 veteran; hardened: 01-15 green, 16-60 regular, 61-00 veteran; raw: 01-55 green, 56-90 regular, 91-00 veteran), which gives attack/defence/Nerve (green 40/25/35, regular 50/35/50, veteran 60/45/65). No characteristics or skills (50 in each in the roller). The team's followers are in the table below.

Skills

Skill	Starts at	Weapons
Blade	Agility / 2	sword, dagger
Axe and mace	Strength / 2	axe, spiked club
Polearm	Strength / 2	spear, bill, poleaxe
Bow	Agility / 2	bow, longbow
Crossbow	Agility / 2	crossbow
Sling	Agility / 3	sling
Brawl	Strength / 2	punch, kick, elbow/knee
Parry	Agility / 2	
Dodge	Agility / 3	
Ride	Agility / 3	
Fieldcraft	Wits / 3	
Watch	Wits / 2	
Stealth	Agility / 3	
Leechcraft	Wits / 4	
Seamanship	Wits / 4	
Craft	Wits / 3	
Letters	Wits / 5	
Persuade	Presence / 2	
Command	Presence / 3	

Origins

d100	Origin	Skill	Trait	Drawback
01-05	Ploughman's son	Fieldcraft	Strong back (Strength +10)	Cannot read a word (Letters -15)
06-10	Shepherd	Watch	Good with a sling (Sling +15)	Uneasy in crowds (Presence -10)

d100	Origin	Skill	Trait	Drawback
11-15	Fisherman's son	Seamanship	Swims like a seal (Endurance +10)	Smells of the catch (Persuade -15)
16-20	Smith's apprentice	Craft	Arms like hams (Strength +10)	Half deaf from the anvil (Watch -15)
21-25	Carter	Ride	Knows every road (Fieldcraft +15)	Bad back (Agility -10)
26-30	Townsman's apprentice	Craft	Quick tongue (Persuade +15)	Never slept under the sky (Fieldcraft -15)
31-35	Merchant's son	Persuade	Lettered (Letters +15)	Soft hands (Strength -10)
36-40	Huntsman's son	Bow	Moves quietly (Stealth +15)	Known as a poacher (Presence -10)
41-45	Miller's son	Craft	Good at sums (Wits +10)	Mistrusted, as millers are (Persuade -15)
46-50	Younger son of a knight	Ride	Raised to arms (Blade +15)	Proud and touchy (Persuade -15)
51-55	A squire's bastard	Blade	Hard to frighten (Nerve +10)	No inheritance and no patience (Presence -10)
56-60	Novice who left the cloister	Letters	Knows his herbs (Leechcraft +15)	Faints at the sight of blood (Nerve -10)
61-65	Barber's boy	Leechcraft	Steady hands (Agility +10)	Never stops talking (Stealth -15)
66-70	Groom in a great stable	Ride	Horse sense (Fieldcraft +15)	Kicked by a horse as a boy (Endurance -10)
71-75	Sailor's orphan	Seamanship	Climbs anything (Agility +10)	Cannot sit a horse (Ride -15)
76-80	Woodcutter	Axe and mace	Tireless (Endurance +10)	Slow of speech (Wits -10)
81-85	Raised on the pilgrim roads	Fieldcraft	Speaks three tongues (Persuade +15)	Belongs nowhere (Presence -10)
86-90	Street brawler	Brawl	Takes a punch (Endurance +10)	Known to the watch (Persuade -15)
91-95	Servant in a great house	Watch	Knows how to please his betters (Persuade +15)	Never held a weapon (Parry -15)
96-00	Herdsman of the border	Polearm	Grew up among raids (Nerve +10)	Hot-tempered (Wits -10)

Careers

Career	Main skill	Second	Old wound	Hurt by
Man-at-arms	Blade	Parry	25%	sword
Archer	Bow	Dodge	15%	sword
Crossbowman	Crossbow	Dodge	15%	crossbow
Spearman or billman	Polearm	Parry	20%	sword
Mounted sergeant	Ride	Parry	20%	sword
Mercenary	Axe and mace	Parry	25%	sword
Sailor	Seamanship	Dodge	10%	axe
Clerk or priest	Letters	Persuade	3%	dagger
Barber-surgeon	Leechcraft	Craft	5%	dagger
Forester or huntsman	Fieldcraft	Stealth	10%	bow
Servant or groom	Ride	Watch	5%	dagger
Merchant	Persuade	Letters	5%	dagger

Career terms (* leaves an old wound)

Career	d100	Skill	Event
Man-at-arms	01-20	Ride	Rode in a lord's household for a season.
Man-at-arms	21-40	Command	Led a handful of men on a raid.
Man-at-arms	41-60	Polearm	Fought on foot at a barrier.
Man-at-arms	61-75	Parry	Came through a tournament melee.
Man-at-arms	76-90	Watch	Held the gate of a besieged town. *
Man-at-arms	91-00	Persuade	Took a knight prisoner and haggled his ransom.
Archer	01-20	Watch	Stood sentry on a border tower.
Archer	21-40	Stealth	Scouted ahead of the army.
Archer	41-55	Fieldcraft	Foraged through a hungry winter.
Archer	56-70	Craft	Made arrows by the thousand in a long siege.
Archer	71-85	Blade	Fought hand to hand when the line broke. *
Archer	86-00	Dodge	Ran from a charge of horse and lived. *

Career	d100	Skill	Event
Crossbowman	01-20	Craft	Kept the windlasses and bolts of a garrison.
Crossbowman	21-40	Watch	Shot from the walls through a siege.
Crossbowman	41-55	Seamanship	Served aboard a galley.
Crossbowman	56-70	Persuade	Bargained over pay for a free company.
Crossbowman	71-85	Parry	Held a pavise in the front of the line. *
Crossbowman	86-00	Dodge	Crawled back from a sally that failed. *
Spearman or billman	01-20	Fieldcraft	Marched through a long campaign.
Spearman or billman	21-40	Parry	Held his place in the line. *
Spearman or billman	41-55	Craft	Dug ditches and threw up banks for a camp.
Spearman or billman	56-70	Brawl	Won a brawl in camp.
Spearman or billman	71-85	Watch	Guarded the baggage carts.
Spearman or billman	86-00	Dodge	Was caught in a rout and lived. *
Mounted sergeant	01-20	Polearm	Rode in a charge with couched spears.
Mounted sergeant	21-40	Fieldcraft	Carried messages across hostile country.
Mounted sergeant	41-55	Command	Kept order among the grooms and the baggage.
Mounted sergeant	56-70	Watch	Patrolled a frontier road.
Mounted sergeant	71-85	Blade	Fought in a skirmish at a ford. *
Mounted sergeant	86-00	Persuade	Bought remounts at a horse fair.
Mercenary	01-20	Persuade	Changed masters for better pay.
Mercenary	21-40	Stealth	Looted a town and kept his share hidden.
Mercenary	41-55	Blade	Fought a duel over a debt.
Mercenary	56-70	Fieldcraft	Lived off the land between contracts.
Mercenary	71-85	Parry	Stormed a breach. *
Mercenary	86-00	Command	Was made corporal of a lance.
Sailor	01-20	Watch	Kept the night watch on a cog.
Sailor	21-40	Craft	Mended sail and rigging.
Sailor	41-55	Persuade	Traded on his own account in a foreign port.
Sailor	56-70	Brawl	Fought in a dockside tavern.
Sailor	71-85	Axe and mace	Beat off pirates. *
Sailor	86-00	Fieldcraft	Was wrecked and walked home.
Clerk or priest	01-20	Persuade	Wrote letters for a lord's steward.
Clerk or priest	21-40	Leechcraft	Kept the infirmary of a religious house.
Clerk or priest	41-55	Command	Kept the accounts of a garrison.
Clerk or priest	56-70	Watch	Took down the testimony of witnesses.
Clerk or priest	71-85	Ride	Travelled as an envoy.
Clerk or priest	86-00	Fieldcraft	Went on pilgrimage on foot. *
Barber-surgeon	01-20	Craft	Pulled teeth and let blood in a market town.
Barber-surgeon	21-40	Letters	Studied an anatomy with a master.
Barber-surgeon	41-55	Watch	Worked through a pestilence.
Barber-surgeon	56-70	Persuade	Was paid by a captain to follow the army.
Barber-surgeon	71-85	Leechcraft	Cut arrows out of men after a battle.
Barber-surgeon	86-00	Dodge	Was caught when the camp was overrun. *
Forester or huntsman	01-20	Bow	Hunted deer for a lord's table.
Forester or huntsman	21-40	Stealth	Hunted poachers in the forest.
Forester or huntsman	41-55	Watch	Tracked a band of outlaws.
Forester or huntsman	56-70	Ride	Rode with a great hunt.
Forester or huntsman	71-85	Polearm	Killed a boar with a spear. *
Forester or huntsman	86-00	Leechcraft	Kept the hounds and doctored them.
Servant or groom	01-20	Craft	Kept a lord's harness and arms.
Servant or groom	21-40	Watch	Waited at table and heard everything.
Servant or groom	41-55	Fieldcraft	Pitched tents and made camp on campaign.
Servant or groom	56-70	Persuade	Bought provisions for the household.
Servant or groom	71-85	Leechcraft	Nursed his master through a fever.

 © 2026 Scott Wares. All rights reserved.

Career	d100	Skill	Event
Servant or groom	86-00	Blade	Fought beside his master when the camp was raided. *
Merchant	01-20	Letters	Kept the books of a trading house.
Merchant	21-40	Seamanship	Sailed with his goods to a far port.
Merchant	41-55	Ride	Travelled the fairs with a pack train.
Merchant	56-70	Command	Hired and paid guards for a caravan.
Merchant	71-85	Watch	Was cheated once and learned from it.
Merchant	86-00	Blade	Fought off robbers on the road. *

Kit and weapon by region

Career	Latin East	Gotland and the Baltic	England	France

Thirty Years' War (1618-1648)

Thirty Years' War (1618-1648): made exactly as the medieval era's, in the same five steps, from the tables below. Fighting skills: Musket, Pistol, Blade, Pike, Brawl, Parry, Dodge. Each region takes its war's wound table, for old wounds and for the roller.

Followers: a big team's other men get one line each: a career (for kit and weapon), a name, and a quality on d100 (default: 01-30 green, 31-80 regular, 81-00 veteran; hardened: 01-15 green, 16-60 regular, 61-00 veteran; raw: 01-55 green, 56-90 regular, 91-00 veteran), which gives attack/defence/Nerve (green 40/25/35, regular 50/35/50, veteran 60/45/65). No characteristics or skills (50 in each in the roller). The team's followers are in the table below.

Skills

Skill	Starts at	Weapons
Musket	Agility / 2	matchlock, musket butt
Pistol	Agility / 2	pistol/carbine
Blade	Agility / 2	sabre, dagger
Pike	Strength / 2	spear, pike
Brawl	Strength / 2	punch, kick, elbow/knee
Parry	Agility / 2	
Dodge	Agility / 3	
Ride	Agility / 3	
Fieldcraft	Wits / 3	
Watch	Wits / 2	
Stealth	Agility / 3	
Leechcraft	Wits / 4	
Craft	Wits / 3	
Letters	Wits / 5	
Persuade	Presence / 2	
Command	Presence / 3	

Origins

d100	Origin	Skill	Trait	Drawback
01-05	Peasant's son from a burned village	Fieldcraft	Hard to starve (Endurance +10)	Cannot read a word (Letters -15)
06-10	Weaver's apprentice	Craft	Nimble fingers (Agility +10)	Never slept rough (Fieldcraft -15)
11-15	Miner from the hills	Craft	Works by lamplight for hours (Endurance +10)	Coughs in the cold (Stealth -15)
16-20	Townsman's son	Persuade	Knows how to bargain (Persuade +15)	Soft hands (Strength -10)
21-25	Huntsman's son	Musket	A steady aim (Musket +15)	Known as a poacher (Presence -10)
26-30	Carter on the army roads	Ride	Knows every road (Fieldcraft +15)	Bad back (Agility -10)
31-35	Student who left the university	Letters	Reads Latin (Letters +15)	Faints at the sight of blood (Nerve -10)
36-40	Barber's boy	Leechcraft	Steady hands (Agility +10)	Never stops talking (Stealth -15)
41-45	Younger son of a minor noble	Ride	Raised to the sword (Blade +15)	Proud and touchy (Persuade -15)
46-50	Born in the baggage train	Fieldcraft	Hard to frighten (Nerve +10)	Belongs nowhere (Presence -10)
51-55	Smith's apprentice	Craft	Arms like hams (Strength +10)	Half deaf from the anvil (Watch -15)
56-60	Shepherd	Watch	Sees far (Watch +15)	Uneasy in crowds (Presence -10)
61-65	Fisherman's son from the coast	Craft	Swims like a seal (Endurance +10)	Cannot sit a horse (Ride -15)
66-70	Exile for his faith	Persuade	Stubborn as an oak (Nerve +10)	Trusts no one of the other faith (Persuade -15)
71-75	Groom in a great stable	Ride	Horse sense (Ride +15)	Kicked by a horse as a boy (Endurance -10)
76-80	Woodcutter	Craft	Tireless (Endurance +10)	Slow of speech (Wits -10)
81-85	Street brawler	Brawl	Takes a punch (Endurance +10)	Known to the watch (Persuade -15)
86-90	Servant in a great house	Watch	Knows how to please his betters (Persuade +15)	Never held a weapon (Parry -15)
91-95	Pressed from a debtors' prison	Brawl	Nothing left to lose (Nerve +10)	Sullen (Presence -10)
96-00	Pedlar's son	Persuade	Speaks three tongues (Persuade +15)	Light-fingered (Presence -10)

Careers

Career	Main skill	Second	Old wound	Hurt by
Musketeer	Musket	Dodge	20%	matchlock
Pikeman	Pike	Blade	20%	matchlock
Cuirassier	Pistol	Ride	25%	pistol/carbine
Harquebusier or light horseman	Pistol	Ride	20%	pistol/carbine
Dragoon	Musket	Ride	20%	sabre
Sergeant or corporal	Command	Blade	20%	matchlock
Field surgeon (feldscher)	Leechcraft	Craft	5%	matchlock
Sutler or camp follower	Persuade	Watch	5%	sabre
Chaplain or clerk	Letters	Persuade	3%	matchlock

Career terms (* leaves an old wound)

Career	d100	Skill	Event
Musketeer	01-20	Watch	Stood sentry in the trenches before a besieged town.
Musketeer	21-40	Craft	Cast bullets and twisted match through a wet winter.
Musketeer	41-55	Fieldcraft	Foraged through a stripped country.
Musketeer	56-70	Blade	Held a churchyard wall at close quarters. *
Musketeer	71-85	Stealth	Crept forward with a forlorn hope at night.
Musketeer	86-00	Dodge	Fired by salvo, rank on rank, in a pitched battle. *
Pikeman	01-20	Parry	Drilled the push of pike in a garrison town.
Pikeman	21-40	Watch	Guarded the colours on a long march.
Pikeman	41-55	Command	Kept a file in order under cannon fire.
Pikeman	56-70	Brawl	Brawled with the musketeers over billets.
Pikeman	71-85	Blade	Stood in the hedge of pikes against a charge of horse. *
Pikeman	86-00	Pike	Came to push of pike when two squares met. *
Cuirassier	01-20	Blade	Rode in a charge, sword in hand, after the pistols were empty. *
Cuirassier	21-40	Command	Led a troop on a raid for horses.
Cuirassier	41-55	Parry	Fought a duel over a woman in winter quarters.
Cuirassier	56-70	Persuade	Ransomed a captured officer.
Cuirassier	71-85	Ride	Covered a retreat across a river.
Cuirassier	86-00	Pistol	Rode up to fire at the enemy's horse, rank by rank. *
Harquebusier or light horseman	01-20	Fieldcraft	Scouted ahead of the army for a season.
Harquebusier or light horseman	21-40	Stealth	Raided an enemy supply train.
Harquebusier or light horseman	41-55	Watch	Patrolled the roads around a camp.
Harquebusier or light horseman	56-70	Blade	Fought in a running skirmish. *
Harquebusier or light horseman	71-85	Persuade	Levied contributions from a frightened town.
Harquebusier or light horseman	86-00	Ride	Outran a pursuit of enemy horse.
Dragoon	01-20	Ride	Rode hard to seize a bridge ahead of the army.
Dragoon	21-40	Watch	Held an outpost at a crossroads.
Dragoon	41-55	Fieldcraft	Foraged far from the camp.
Dragoon	56-70	Blade	Was caught mounted and fought with the sword. *
Dragoon	71-85	Stealth	Ambushed a convoy in a wood.
Dragoon	86-00	Musket	Fought dismounted behind a hedge.

Horse and musket (1775-1815)

Horse and musket (1775-1815): made exactly as the medieval era's, in the same five steps, from the tables below. Fighting skills: Musket, Rifle, Pistol, Blade, Bayonet, Gunnery, Brawl, Parry, Dodge. Each region takes its war's wound table, for old wounds and for the roller.

Followers: a big team's other men get one line each: a career (for kit and weapon), a name, and a quality on d100 (default: 01-30 green, 31-80 regular, 81-00 veteran; hardened: 01-15 green, 16-60 regular, 61-00 veteran; raw: 01-55 green, 56-90 regular, 91-00 veteran), which gives attack/defence/Nerve (green 40/25/35, regular 50/35/50, veteran 60/45/65). No characteristics or skills (50 in each in the roller). The team's followers are in the table below.

Skills

Skill	Starts at	Weapons
Musket	Agility / 2	musket, musket butt
Rifle	Wits / 2	rifle
Pistol	Agility / 2	pistol
Blade	Agility / 2	sabre, lance, dagger
Bayonet	Strength / 2	bayonet
Gunnery	Wits / 2	artillery
Brawl	Strength / 2	punch, kick, elbow/knee
Parry	Agility / 2	
Dodge	Agility / 3	
Ride	Agility / 3	
Fieldcraft	Wits / 3	
Watch	Wits / 2	
Stealth	Agility / 3	
Leechcraft	Wits / 4

Crimean War (1854-1856)

Crimean War (1854-1856): made exactly as the medieval era's, in the same five steps, from the tables below. Fighting skills: Musket, Pistol, Blade, Bayonet, Gunnery, Brawl, Parry, Dodge. Each region takes its war's wound table, for old wounds and for the roller.

Followers: a big team's other men get one line each: a career (for kit and weapon), a name, and a quality on d100 (default: 01-30 green, 31-80 regular, 81-00 veteran; hardened: 01-15 green, 16-60 regular, 61-00 veteran; raw: 01-55 green, 56-90 regular, 91-00 veteran), which gives attack/defence/Nerve (green 40/25/35, regular 50/35/50, veteran 60/45/65). No characteristics or skills (50 in each in the roller). The team's followers are in the table below.

Women under arms: a member may be a woman (her own name lists and origins, no beard; the texts say she and her), chosen or rolled d10000 at or under the army's share x 100 before the characteristics, for a career open to women: The French Army of the East (no reliable share: chosen, never rolled): cantinière or canteen-keeper. Elsewhere these careers were closed to them.

Skills

Civil War and frontier (1861-1876)

Civil War and frontier (1861-1876): made exactly as the medieval era's, in the same five steps, from the tables below. Fighting skills: Rifle, Pistol, Blade, Bayonet, Gunnery, Brawl, Parry, Dodge. Each region takes its war's wound table, for old wounds and for the roller.

Followers: a big team's other men get one line each: a career (for kit and weapon), a name, and a quality on d100 (default: 01-30 green, 31-80 regular, 81-00 veteran; hardened: 01-15 green, 16-60 regular, 61-00 veteran; raw: 01-55 green, 56-90 regular, 91-00 veteran), which gives attack/defence/Nerve (green 40/25/35, regular 50/35/50, veteran 60/45/65). No characteristics or skills (50 in each in the roller). The team's followers are in the table below.

Women under arms: a member may be a woman (her own name lists and origins, no beard; the texts say she and her), chosen or rolled d10000 at or under the army's share x 100 before the characteristics, for a career open to women: The Union (1861-1865) (0.02%, enlisted disguised as men): infantryman, sharpshooter or skirmisher, cavalry trooper, artilleryman, scout, teamster or packer; The Confederacy (1861-1865) (0.03%, enlisted disguised as men): infantryman, sharpshooter or skirmisher, cavalry trooper, artilleryman, scout, teamster or packer. Elsewhere these careers were closed to them.

Skills

Skill	Starts at	Weapons

Career terms (* leaves an old wound)

Career	d100	Skill	Event
Rifleman	01-20	Watch	Stood sentry on the fire step through a winter night.
Rifleman	21-40	Craft	Dug and revetted trenches in the rain.
Rifleman	41-55	Fieldcraft	Carried rations up the communication trench.
Rifleman	56-70	Dodge	Sat out a bombardment in a dugout.
Rifleman	71-85	Bayonet	Went over the top in an attack. *
Rifleman	86-00	Rifle	Held a shell hole against a counter-attack. *
Machine gunner	01-20	Craft	Stripped and cleaned the gun in the mud.
Machine gunner	21-40	Fieldcraft	Carried the gun and its tripod up the line.
Machine gunner	41-55	Watch	Laid the gun on a fixed line at night.
Machine gunner	56-70	Letters	Learned indirect fire from a range card.
Machine gunner	71-85	Dodge	Moved the gun under shellfire. *
Machine gunner	86-00	Machine gun	Broke up an attack across no man's land. *
Bomber	01-20	Craft	Primed bombs in a bombing store.
Bomber	21-40	Stealth	Crawled out to a listening post.
Bomber	41-55	Trench weapons	Cleared a trench bay with club and knife. *
Bomber	56-70	Dodge	Ducked an enemy bomb in a sap.
Bomber	71-85	Bombing	Bombed up an enemy trench traverse by traverse. *
Bomber	86-00	Watch	Held a block in a captured trench.
Sniper or observer	01-20	Watch	Watched the enemy line through a periscope for a week.
Sniper or observer	21-40	Craft	Built a hide in a ruined wall.
Sniper or observer	41-55	Stealth	Lay out in no man's land all day.
Sniper or observer	56-70	Letters	Kept the sniping log and drew the enemy's loopholes.
Sniper or observer	71-85	Fieldcraft	Moved his post before the enemy found it.
Sniper or observer	86-00	Rifle	Duelled with an enemy sniper across the wire. *
Sapper or tunneller	01-20	Craft	Put up wire in front of the line at night.
Sapper or tunneller	21-40	Watch	Listened for enemy miners underground.
Sapper or tunneller	41-55	Watch	Dug a gallery under no man's land by candlelight.
Sapper or tunneller	56-70	Letters	Surveyed a mine and laid its charge.
Sapper or tunneller	71-85	Trench weapons	Broke into an enemy gallery and fought in the dark. *
Sapper or tunneller	86-00	Bombing	Blew gaps in the wire before an attack. *

Career	d100	Skill	Event
Stretcher-bearer or orderly	01-20	Craft	Worked in a casualty clearing station.
Stretcher-bearer or orderly	21-40	Leechcraft	Dressed wounds at a regimental aid post.
Stretcher-bearer or orderly	41-55	Fieldcraft	Carried the wounded down a flooded trench.
Stretcher-bearer or orderly	56-70	Persuade	Calmed a gassed man until the ambulance came.
Stretcher-bearer or orderly	71-85	Dodge	Brought a man in from no man's land. *
Stretcher-bearer or orderly	86-00	Leechcraft	Kept men alive through a night under shellfire. *
Signaller or runner	01-20	Letters	Learned Morse and the lamp.
Signaller or runner	21-40	Craft	Mended a cut telephone line under fire. *
Signaller or runner	41-55	Fieldcraft	Ran messages back across the open.
Signaller or runner	56-70	Watch	Watched for the enemy's flares and rockets.
Signaller or runner	71-85	Dodge	Carried orders through a barrage. *
Signaller or runner	86-00	Signals	Kept the battalion in touch with the guns.
Corporal or sergeant	01-20	Letters	Kept the platoon's roll and its rum ration.
Corporal or sergeant	21-40	Persuade	Kept a frightened man at his post.
Corporal or sergeant	41-55	Bayonet	Drilled the new drafts behind the line.
Corporal or sergeant	56-70	Watch	Took out a wiring party.
Corporal or sergeant	71-85	Bombing	Led a bombing party into the enemy trench. *
Corporal or sergeant	86-00	Command	Took over the platoon when its officer fell. *
Junior officer	01-20	Letters	Censored his men's letters home.
Junior officer	21-40	Signals	Called down the guns on an enemy attack.
Junior officer	41-55	Stealth	Led a patrol into no man's land. *
Junior officer	56-70	Persuade	Wrote to the families of the dead.
Junior officer	71-85	Pistol	Led a trench raid. *
Junior officer	86-00	Command	Led the company over the top. *
Gunner or trench mortarman	01-20	Fieldcraft	Hauled shells up to the gun pits through the mud.
Gunner or trench mortarman	21-40	Craft	Set fuses through a long bombardment.
Gunner or trench mortarman	41-55	Letters	Worked out the firing data from a map.
Gunner or trench mortarman	56-70	Signals	Took fire orders by telephone from the front.
Gunner or trench mortarman	71-85	Dodge	Was shelled in return by the enemy's guns. *
Gunner or trench mortarman	86-00	Gunnery	Fired a box barrage round a raid.

Second World War (1939-1945)

Second World War (1939-1945): made exactly as the medieval era's, in the same five steps, from the tables below. Fighting skills: Rifle, SMG and pistol, Machine gun, Grenade, Gunnery, Bayonet, Close combat, Brawl, Parry, Dodge. Each region takes its war's wound table, for old wounds and for the roller.

Followers: a big team's other men get one line each: a career (for kit and weapon), a name, and a quality on d100 (default: 01-30 green, 31-80 regular, 81-00 veteran; hardened: 01-15 green, 16-60 regular, 61-00 veteran; raw: 01-55 green, 56-90 regular, 91-00 veteran), which gives attack/defence/Nerve (green 40/25/35, regular 50/35/50, veteran 60/45/65). No characteristics or skills (50 in each in the roller). The team's followers are in the table below.

Women under arms: a member may be a woman (her own name lists and origins, no beard; the texts say she and her), chosen or rolled d10000 at or under the army's share x 100 before the characteristics, for a career open to women: The Soviet Union (3%): rifleman, machine gunner, sniper or scout, medic or stretcher-bearer, radio operator or signaller, corporal or sergeant, junior officer, tank crewman. Elsewhere these careers were closed to them.

Skills

Career terms (* leaves an old wound)

Career	d100	Skill	Event
Rifleman	01-20	Watch	Stood watch in a frozen foxhole through a long night.
Rifleman	21-40	Fieldcraft	Climbed ridge after ridge with a full pack.
Rifleman	41-55	Dodge	Lay flat while mortar rounds walked across the slope.
Rifleman	56-70	Stealth	Went out on a night patrol into the valley.
Rifleman	71-85	Grenade	Fought off a night attack with grenades. *
Rifleman	86-00	Rifle	Held a hilltop through a night of attacks. *
Machine gunner or BAR man	01-20	Craft	Kept the gun firing in the bitter cold.
Machine gunner or BAR man	21-40	Fieldcraft	Carried the gun and its ammunition up a steep ridge.
Machine gunner or BAR man	41-55	Watch	Laid the gun on a fixed line across a draw at dusk.
Machine gunner or BAR man	56-70	Dodge	Moved the gun before the enemy's mortars found it. *
Machine gunner or BAR man	71-85	Stealth	Sited the gun to sweep the saddle between two hills.
Machine gunner or BAR man	86-00	Machine gun	Fired until the barrel glowed to break up an attack. *
Rocket or recoilless gunner	01-20	Craft	Learned to load and aim the rocket launcher.
Rocket or recoilless gunner	21-40	Stealth	Stalked a tank along a paddy dike.
Rocket or recoilless gunner	41-55	Fieldcraft	Hauled the rounds up to the line on his back.
Rocket or recoilless gunner	56-70	Dodge	Was caught in the open by a tank's machine gun. *
Rocket or recoilless gunner	71-85	Gunnery	Knocked out a tank or a bunker at close range. *
Rocket or recoilless gunner	86-00	Grenade	Held off infantry closing on the team.
Mortarman	01-20	Letters	Learned to work out the firing data by hand.
Mortarman	21-40	Craft	Dug the mortar pit into frozen ground.
Mortarman	41-55	Fieldcraft	Carried the baseplate up a mountain trail.
Mortarman	56-70	Signals	Took fire orders over the field telephone.
Mortarman	71-85	Dodge	Was caught by counter-battery fire. *
Mortarman	86-00	Gunnery	Dropped rounds on an attack forming in a valley.
Sniper or scout	01-20	Watch	Watched the enemy's hill through field glasses for a day.
Sniper or scout	21-40	Fieldcraft	Scouted a way through the hills for the company.
Sniper or scout	41-55	Stealth	Lay in a hide in no man's land until dark.
Sniper or scout	56-70	Letters	Sketched the enemy's trenches for the intelligence officer.

Career	d100	Skill	Event
Sniper or scout	71-85	Craft	Kept a scoped rifle zeroed through a Korean winter.
Sniper or scout	86-00	Rifle	Duelled with an enemy sniper across a valley. *
Combat engineer	01-20	Craft	Cut a road up a hillside.
Combat engineer	21-40	Watch	Swept a track for mines by hand. *
Combat engineer	41-55	Drive	Drove a bulldozer under fire.
Combat engineer	56-70	Letters	Laid a minefield in front of the outpost line.
Combat engineer	71-85	Grenade	Blew a bridge as the enemy came on. *
Combat engineer	86-00	Fieldcraft	Strung wire in front of a hill at night.
Aidman, corpsman or medic	01-20	Craft	Worked at a battalion aid station.
Aidman, corpsman or medic	21-40	Leechcraft	Kept the morphine from freezing inside his clothes.
Aidman, corpsman or medic	41-55	Drive	Loaded litters onto an evacuation helicopter.
Aidman, corpsman or medic	56-70	Persuade	Talked a shocked man back to his senses.
Aidman, corpsman or medic	71-85	Dodge	Ran out to a wounded man under fire. *
Aidman, corpsman or medic	86-00	Leechcraft	Kept men alive through a night of shelling. *
Radio operator or wireman	01-20	Letters	Learned the codes and the call signs.
Radio operator or wireman	21-40	Craft	Kept the radio's batteries warm enough to work.
Radio operator or wireman	41-55	Fieldcraft	Laid telephone wire up to an outpost.
Radio operator or wireman	56-70	Watch	Spliced a cut line in the dark.
Radio operator or wireman	71-85	Dodge	Was spotted by his aerial and shelled. *
Radio operator or wireman	86-00	Signals	Called in the artillery as an outpost was overrun.
Squad leader or sergeant	01-20	Letters	Kept the squad's roll and its ammunition count.
Squad leader or sergeant	21-40	Persuade	Kept a frightened man in his hole.
Squad leader or sergeant	41-55	Rifle	Trained replacements behind the line.
Squad leader or sergeant	56-70	Watch	Set the night's listening posts.
Squad leader or sergeant	71-85	Grenade	Led the squad into an enemy trench. *
Squad leader or sergeant	86-00	Command	Took over the platoon when its officer fell. *
Platoon leader	01-20	Letters	Read the maps and wrote the orders.
Platoon leader	21-40	Signals	Called down fire on the radio.
Platoon leader	41-55	Stealth	Led a raid on an enemy outpost. *
Platoon leader	56-70	Persuade	Wrote to the families of the dead.
Platoon leader	71-85	SMG and pistol	Led a counter-attack up a lost hill. *
Platoon leader	86-00	Command	Held the company together in a winter retreat. *
Tank crewman	01-20	Craft	Kept the engine running through a Korean winter.
Tank crewman	21-40	Drive	Drove along a narrow valley road under fire.
Tank crewman	41-55	Signals	Worked the tank's radio with the infantry.
Tank crewman	56-70	Watch	Watched for anti-tank teams from the turret.
Tank crewman	71-85	Dodge	Bailed out of a burning tank. *
Tank crewman	86-00	Gunnery	Fired the main gun for an attack on a hill.

Vietnam War (1965-1973)

Vietnam War (1965-1973): made exactly as the medieval era's, in the same five steps, from the tables below. Fighting skills: Rifle, SMG and pistol, Machine gun, Grenade and rocket, Gunnery, Bayonet, Close combat, Brawl, Parry, Dodge. Each region takes its war's wound table, for old wounds and for the roller.

Followers: a big team's other men get one line each: a career (for kit and weapon), a name, and a quality on d100 (default: 01-30 green, 31-80 regular, 81-00 veteran; hardened: 01-15 green, 16-60 regular, 61-00 veteran; raw: 01-55 green, 56-90 regular, 91-00 veteran), which gives attack/defence/Nerve (green 40/25/35, regular 50/35/50, veteran 60/45/65). No characteristics or skills (50 in each in the roller). The team's followers are in the table below.

Women under arms: a member may be a woman (her own name lists and origins, no beard; the texts say she and her), chosen or rolled d10000 at or under the army's share x 100 before the characteristics, for a career open to women: Army of the Republic of Vietnam (no reliable share: chosen, never rolled): medic or corpsman; People's Army of Vietnam (North Vietnamese) (no reliable share: chosen, never rolled): rifleman, point man, scout or sniper, combat engineer or sapper, medic or corpsman; National Liberation Front (Viet Cong) (no reliable share: chosen, never rolled): rifleman, point man, scout or sniper, combat engineer or sapper, medic or corpsman, radio operator, squad leader or sergeant, platoon leader. Elsewhere these careers were closed to them.

Skills

Skill	Starts at	Weapons
Rifle	Agility / 2	assault rifle
SMG and pistol	Agility / 2	pistol/smg
Machine gun	Wits / 2	mg
Grenade and rocket	Strength / 2	grenade, rpg
Gunnery	Wits / 2	mortar, frags, recoilless
Bayonet	Strength / 2	bayonet
Close combat	Strength / 2	spade, dagger
Brawl	Strength / 2	punch, kick, elbow/knee
Parry	Agility / 2	
Dodge	Agility / 3

Career	d100	Skill	Event
Point man, scout or sniper	21-40	Fieldcraft	Walked point through the jungle.
Point man, scout or sniper	41-55	Stealth	Lay hidden while an enemy column passed.
Point man, scout or sniper	56-70	Letters	Reported the enemy's trails and camps.
Point man, scout or sniper	71-85	Craft	Kept a scoped rifle zeroed in the wet.
Point man, scout or sniper	86-00	Rifle	Duelled with an enemy sniper in the trees. *
Combat engineer or sapper	01-20	Craft	Built a fire base on a hilltop.
Combat engineer or sapper	21-40	Watch	Found a tripwire on a trail. *
Combat engineer or sapper	41-55	Stealth	Cut a way through the wire at night.
Combat engineer or sapper	56-70	Letters	Laid mines and booby traps to a plan.
Combat engineer or sapper	71-85	Grenade and rocket	Blew up a bunker with a satchel charge. *
Combat engineer or sapper	86-00	Fieldcraft	Cleared booby traps from a village.
Tunnel rat or tunnel fighter	01-20	Craft	Dug and shored a tunnel by hand.
Tunnel rat or tunnel fighter	21-40	Watch	Listened in the dark for a sound ahead.
Tunnel rat or tunnel fighter	41-55	Fieldcraft	Mapped a tunnel system by touch.
Tunnel rat or tunnel fighter	56-70	Dodge	Set off a booby trap underground. *
Tunnel rat or tunnel fighter	71-85	SMG and pistol	Fought in a tunnel by torchlight. *
Tunnel rat or tunnel fighter	86-00	Stealth	Lived for weeks in the tunnels.
Mortarman	01-20	Letters	Worked out the firing data by hand.
Mortarman	21-40	Craft	Dug the mortar pit on a hilltop.
Mortarman	41-55	Fieldcraft	Carried the tube and baseplate through the hills.
Mortarman	56-70	Signals	Took fire orders over the radio.
Mortarman	71-85	Dodge	Was caught by counter-mortar fire. *
Mortarman	86-00	Gunnery	Fired flares and high explosive all night for the perimeter.
Medic or corpsman	01-20	Craft	Worked at an aid station.
Medic or corpsman	21-40	Leechcraft	Fought infection in a wound from a punji stake.
Medic or corpsman	41-55	Signals	Called in a medical evacuation helicopter under fire.
Medic or corpsman	56-70	Persuade	Talked a shocked man back to his senses.
Medic or corpsman	71-85	Dodge	Ran out to a wounded man under fire. *
Medic or corpsman	86-00	Leechcraft	Kept men alive through a night attack. *
Radio operator	01-20	Letters	Learned the codes and the call signs.
Radio operator	21-40	Craft	Kept the radio dry through the monsoon.
Radio operator	41-55	Fieldcraft	Carried the radio's weight on a long patrol.
Radio operator	56-70	Watch	Listened in on the enemy's radio net.
Radio operator	71-85	Dodge	Was singled out by his aerial. *
Radio operator	86-00	Signals	Called in artillery and air strikes in a close fight.
Squad leader or sergeant	01-20	Letters	Kept the squad's roll and its ammunition count.
Squad leader or sergeant	21-40	Persuade	Kept a frightened man in his hole.
Squad leader or sergeant	41-55	Rifle	Trained new men in the field.
Squad leader or sergeant	56-70	Watch	Set the night's ambush positions.
Squad leader or sergeant	71-85	Grenade and rocket	Led the squad into a bunker line. *
Squad leader or sergeant	86-00	Command	Took over the platoon when its leader fell. *
Platoon leader	01-20	Letters	Read the maps and wrote the orders.
Platoon leader	21-40	Signals	Called down fire on the radio.
Platoon leader	41-55	Stealth	Led a night ambush. *
Platoon leader	56-70	Persuade	Wrote to the families of the dead.
Platoon leader	71-85	Rifle	Led an assault on a fortified village. *
Platoon leader	86-00	Command	Held the company together when it was surrounded. *

The Falklands to Afghanistan (1982-2014)

The Falklands to Afghanistan (1982-2014): made exactly as the medieval era's, in the same five steps, from the tables below. Fighting skills: Rifle, Pistol, Machine gun, Grenade and rocket, Gunnery, Bayonet, Close combat, Brawl, Parry, Dodge. Each region takes its war's wound table, for old wounds and for the roller.

Followers: a big team's other men get one line each: a career (for kit and weapon), a name, and a quality on d100 (default: 01-30 green, 31-80 regular, 81-00 veteran; hardened: 01-15 green, 16-60 regular, 61-00 veteran; raw: 01-55 green, 56-90 regular, 91-00 veteran), which gives attack/defence/Nerve (green 40/25/35, regular 50/35/50, veteran 60/45/65). No characteristics or skills (50 in each in the roller). The team's followers are in the table below.

Women under arms: a member may be a woman (her own name lists and origins, no beard; the texts say she and her), chosen or rolled d10000 at or under the army's share x 100 before the characteristics, for a career open to women: US forces in the Gulf, 1991 (7%): combat medic or corpsman, signaller or radio operator, military police or convoy gunner; Russian forces in Chechnya, 1994-96 (10%): combat medic or corpsman; US forces in Iraq and Afghanistan, 2003-14 (11.4%): combat medic or corpsman, signaller or radio operator, military police or convoy gunner, team or section leader, platoon leader; British forces in Iraq and Afghanistan, 2003-14 (8.3%): combat medic or corpsman, signaller or radio operator, military police or convoy gunner, team or section leader, platoon leader. Elsewhere these careers were closed to them.

Skills

Skill	Starts at	Weapons
Rifle	Agility / 2	assault rifle, ap rifle
Pistol	Agility / 2	pistol/smg
Machine gun	Wits / 2	mg
Grenade and rocket	Strength / 2	grenade, rpg
Gunnery	Wits / 2	atgm, mortar, frags
Bayonet	Strength / 2	bayonet
Close combat	Strength / 2	dagger
Brawl	Strength / 2	punch, kick, elbow/knee
Parry	Agility / 2	
Dodge	Agility / 3	
Fieldcraft	Wits / 3	
Watch	Wits / 2	
Stealth	Agility / 3	
Leechcraft	Wits / 4	
Craft	Wits / 3	
Signals	Wits / 3	
Drive	Agility / 3	
Letters	Wits / 5	
Persuade	Presence / 2	
Command	Presence / 3	

Origins

d100	Origin	Skill	Trait	Drawback
01-04	Small-town kid	Fieldcraft	Strong back (Strength +10)	Never been far from home (Persuade -15)
05-08	Factory worker	Craft	Used to long shifts (Endurance +10)	Half deaf from the machines (Watch -15)
09-12	College student	Letters	Quick to learn (Wits +10)	Never done a day's labour (Strength -10)
13-16	Hunter	Rifle	A steady aim (Rifle +15)	Hates drill (Presence -10)
17-20	Mechanic	Drive	Can fix any engine (Craft +15)	Never walked far (Endurance -10)
21-24	Paramedic or nursing student	Leechcraft	Steady at the sight of blood (Leechcraft +15)	Never stops talking (Stealth -15)
25-28	Athlete	Dodge	Fast on his feet (Agility +10)	Bad knee (Endurance -10)
29-32	Street kid from a big city	Brawl	Takes a punch (Endurance +10)	Known to the police (Persuade -15)

d100	Origin	Skill	Trait	Drawback
33-36	From a military family	Command	Raised to command (Command +15)	Proud and touchy (Persuade -15)
37-40	Grew up in a war	Stealth	Moves at night (Stealth +15)	Trusts no one (Presence -10)
41-44	Truck driver	Drive	Knows every road (Drive +15)	Bad back (Agility -10)
45-48	Electronics hobbyist	Signals	Fixes any radio (Signals +15)	Short-sighted (Watch -15)
49-52	Shepherd from the hills	Fieldcraft	Climbs all day (Endurance +10)	Never learned to read (Letters -15)
53-56	Shop worker	Persuade	A ready smile (Presence +10)	Never slept rough (Fieldcraft -15)
57-60	Builder	Craft	Strong arms (Strength +10)	Slow afoot (Agility -10)
61-64	Reservist	Rifle	Has done it before (Nerve +10)	Worries about home (Wits -10)
65-68	Police officer	Watch	Reads a crowd (Watch +15)	Wedded to the rules (Stealth -15)
69-72	Gym regular	Brawl	Lifts heavy (Strength +10)	Stiff joints (Agility -10)
73-76	Boxer	Brawl	Hard to frighten (Nerve +10)	Hot-tempered (Persuade -15)
77-80	Peacetime regular	Rifle	Knows the drill (Rifle +15)	Set in his ways (Wits -10)
81-84	Fought for her place	Command	Hard to discourage (Nerve +10)	Tired of proving herself (Presence -10)
85-88	Rugby player	Brawl	Takes a hit (Endurance +10)	An old shoulder injury (Strength -10)

Careers

Career	Main skill	Second	Old wound	Hurt by
Rifleman	Rifle	Grenade and rocket	25%	assault rifle
Machine gunner	Machine gun	Craft	25%	assault rifle
Grenadier or anti-tank gunner	Grenade and rocket	Rifle	30%	mortar
Marksman or sniper	Rifle	Stealth	15%	assault rifle
Combat engineer or bomb searcher	Craft	Grenade and rocket	25%	mine/ied
Combat medic or corpsman	Leechcraft	Fieldcraft	20%	mortar
Signaller or radio operator	Signals	Fieldcraft	20%	mortar
Military police or convoy gunner	Machine gun	Drive	25%	mine/ied
Armoured vehicle crewman	Gunnery	Drive	20%	rpg
Team or section leader	Command	Rifle	25%	assault rifle
Platoon leader	Command	Rifle	30%	assault rifle

Career terms (* leaves an old wound)

Career	d100	Skill	Event
Rifleman	01-20	Watch	Stood sentry on a wall through a long night.
Rifleman	21-40	Fieldcraft	Patrolled on foot through villages and fields.
Rifleman	41-55	Dodge	Went to ground as a burst cracked overhead.
Rifleman	56-70	Stealth	Moved into an overwatch position before dawn.
Rifleman	71-85	Grenade and rocket	Cleared rooms in a street fight. *
Rifleman	86-00	Rifle	Held a position through a long firefight. *
Machine gunner	01-20	Craft	Kept the gun running in dust or mud.
Machine gunner	21-40	Fieldcraft	Carried the gun and its belts on a long march.
Machine gunner	41-55	Watch	Covered a road from a rooftop.
Machine gunner	56-70	Dodge	Moved the gun as rounds found its position. *
Machine gunner	71-85	Stealth	Sited the gun to cover the team's move.
Machine gunner	86-00	Machine gun	Kept an enemy position down while the assault went in. *
Grenadier or anti-tank gunner	01-20	Craft	Trained on the grenade launcher and the rocket launcher.
Grenadier or anti-tank gunner	21-40	Stealth	Crept forward to a firing point.
Grenadier or anti-tank gunner	41-55	Fieldcraft	Carried the rockets on a night march.
Grenadier or anti-tank gunner	56-70	Dodge	Was caught in the open by return fire. *
Grenadier or anti-tank gunner	71-85	Grenade and rocket	Knocked out a bunker or a vehicle. *
Grenadier or anti-tank gunner	86-00	Close combat	Fought hand to hand in a trench or a room.
Marksman or sniper	01-20	Watch	Watched a crossroads through a scope for a day.
Marksman or sniper	21-40	Fieldcraft	Found a hide overlooking the enemy's route.
Marksman or sniper	41-55	Stealth	Lay hidden until dark.

 © 2026 Scott Wares. All rights reserved.

Career	d100	Skill	Event
Marksman or sniper	56-70	Letters	Logged every movement for the intelligence cell.
Marksman or sniper	71-85	Craft	Kept the rifle zeroed through heat and cold.
Marksman or sniper	86-00	Rifle	Made a long shot that broke up an ambush. *
Combat engineer or bomb searcher	01-20	Craft	Built the defences around a patrol base.
Combat engineer or bomb searcher	21-40	Watch	Searched a culvert for a hidden bomb. *
Combat engineer or bomb searcher	41-55	Drive	Drove a bulldozer to raise a berm.
Combat engineer or bomb searcher	56-70	Letters	Laid or mapped a minefield.
Combat engineer or bomb searcher	71-85	Grenade and rocket	Breached a wall with an explosive charge. *
Combat engineer or bomb searcher	86-00	Fieldcraft	Cleared a compound of booby traps.
Combat medic or corpsman	01-20	Craft	Worked at an aid post.
Combat medic or corpsman	21-40	Leechcraft	Put a tourniquet on a casualty in the first minutes.
Combat medic or corpsman	41-55	Signals	Called in a casualty evacuation by helicopter.
Combat medic or corpsman	56-70	Persuade	Talked a shocked soldier through the worst of it.
Combat medic or corpsman	71-85	Dodge	Ran out to a casualty under fire. *
Combat medic or corpsman	86-00	Leechcraft	Kept a badly wounded soldier alive until the helicopter came. *
Signaller or radio operator	01-20	Letters	Learned the codes, frequencies and call signs.
Signaller or radio operator	21-40	Craft	Kept the radio and its batteries working in the field.
Signaller or radio operator	41-55	Fieldcraft	Carried the radio's weight on a long patrol.
Signaller or radio operator	56-70	Watch	Listened to the enemy's chatter on a scanner.
Signaller or radio operator	71-85	Dodge	Was singled out by his antenna. *
Signaller or radio operator	86-00	Signals	Called in air support in a close fight.
Military police or convoy gunner	01-20	Persuade	Ran a checkpoint on a busy road.
Military police or convoy gunner	21-40	Drive	Drove in a supply convoy through hostile country.
Military police or convoy gunner	41-55	Watch	Watched the roadside for signs of a bomb.
Military police or convoy gunner	56-70	Dodge	Was in a vehicle struck by a roadside bomb. *
Military police or convoy gunner	71-85	Craft	Kept the turret gun working on the road.
Military police or convoy gunner	86-00	Machine gun	Fought off an ambush from a vehicle's turret. *
Armoured vehicle crewman	01-20	Craft	Kept the vehicle running in the field.
Armoured vehicle crewman	21-40	Drive	Drove through a town at night.
Armoured vehicle crewman	41-55	Signals	Worked the vehicle's radio with the infantry.
Armoured vehicle crewman	56-70	Watch	Watched for anti-tank teams from the hatch.
Armoured vehicle crewman	71-85	Dodge	Bailed out of a burning vehicle. *
Armoured vehicle crewman	86-00	Gunnery	Fired the main gun in support of an assault.
Team or section leader	01-20	Letters	Kept the section's roll and its ammunition count.
Team or section leader	21-40	Persuade	Kept a frightened soldier in cover.
Team or section leader	41-55	Rifle	Trained new soldiers before a tour.
Team or section leader	56-70	Watch	Set the sentries around a patrol base.
Team or section leader	71-85	Grenade and rocket	Led the section into a building. *
Team or section leader	86-00	Command	Took command when the platoon leader fell. *
Platoon leader	01-20	Letters	Planned the patrol and wrote the orders.
Platoon leader	21-40	Signals	Called in fire on the radio.
Platoon leader	41-55	Stealth	Led a night raid on a compound. *
Platoon leader	56-70	Persuade	Wrote to the families of the dead.
Platoon leader	71-85	Rifle	Led an assault on a defended position. *
Platoon leader	86-00	Command	Held the platoon together when it was cut off. *

Camp disease

Camp disease (forces on the travel map): each force counts its sick, by disease and by step on the track (mending, serious, grave, deadly). Once a week each well man may catch each disease: his chance is the outbreak chance below, with the week's modifiers, times the chance he fails to resist (half, at Endurance 50). A man carries one disease at a time.

A case shows after its incubation at mending, climbs a step a day to the peak rolled below, then makes a recovery check each day: d100 against Endurance, plus care (no camp -20, a camp +0, quarters +10), activity (marched -20, rested +10), a cold wet night beyond the shelter -10, poor hygiene -10, less the disease's virulence. Success by 30 or more: two steps better; success: one; failure: no change; failure by 30 or more: one worse. At deadly, any failure kills. Typhus and plague leave survivors immune; ague relapses in marsh country; flux can turn chronic.

Men at serious or worse do not dig or fight. Grave and deadly cases go on litters: the force marches at 90%, or 50% with fewer than 2 fit men a litter, and cannot march with none. Hygiene comes from the camp (bivouac poor, quarters good, others fair) unless the GM sets it. Plague needs the GM's "plague in the region".

A leech: the best Leechcraft among the named men with a force (alive, not too sick to work) adds Leechcraft / 10 to every recovery check of its sick and wounded, and takes as much off each wound's chance of turning septic.

Scurvy: each force counts its days without fresh food. A day ends it in farmland, a village or a town, or in open country, forest or hills if the force camped there all day and foraged, or on a march day there if a named man's Fieldcraft roll finds it, or when the GM issues fresh food. After 42 days without it, each week every well man may fall ill: 10% the first week, 10 more each week after, times the chance he fails to resist. It shows at once at mending and is checked once a week: with fresh food in the past week, 2 steps better; without it, the recovery check at virulence -3: success holds, failure is one step worse, and failure at deadly kills. A named character's old wounds and scars reopen at mending and cannot heal until the scurvy has. Records: 1.6% of cases died in the Union army; far more with no fresh food at all.

Frostbite: on a night whose low is 5 °F (-15 °C) or colder, each well man may be frostbitten: 1% plus 0.15% a degree colder, less 25% of that for each point of the camp's shelter, times the chance he fails to resist. It shows at once (d100: mending, serious or grave) and is checked every 3 days at virulence -5. **Cold in battle:** hard frost (low at or under 5 °F (-15 °C)): automatic weapons misfire 10% more; bitter cold (low at or under -13 °F (-25 °C)): automatic weapons misfire 25% more, +1 movement a hex.

The wounded (from the field map): a wounded man starts at mending (light), serious (serious) or grave (critical), and at grave if the wound would kill in hours. He makes the same recovery check, but once every 7 days, at virulence -20. 3-5 days after the battle the wound turns septic on d100: low infection risk 5%, medium 15%, high 30% (no camp +5, quarters -5). Wound fever is one step worse and checks every day at virulence 25.

Disease	Caught from	Shows after	Outbreak chance a week	Peak (d100)	Deaths per case
Bloody flux	Dirty water or food, latrines too near the water	1-3 days	3%; poor +22, good -5, staying +4, marsh +5, upland -5, hot +10	01-03 deadly, 04-15 grave, 16-00 serious	2.6% (virulence 5)
Camp fever (typhus)	Lice in crowded, unwashed camps	7-14 days	0%; poor +4, good -5, staying +0.3, crowded +14, cold wet +10	01-30 deadly, 31-70 grave, 71-00 serious	40% (virulence 16)
Typhoid	Dirty water or food, often from a carrier in camp	7-21 days	0.3%; poor +5, good -5, town +5, hot +5	01-30 deadly, 31-60 grave, 61-00 serious	36% (virulence 15)
Ague (malaria)	Mosquitoes in marshes and low wetlands	7-28 days	15% (only with marsh and warm)	01-02 deadly, 03-30 grave, 31-00 serious	0.8% (virulence -9)
Plague	Flea bites; worst in sieges and towns full of rats	2-6 days	5% (only with plague); staying +5, town +5	01-50 deadly, 51-80 grave, 81-00 serious	45% (virulence 15)

Travel

Travel map: hexes are usually 0.6 mi (1 km). A force marches 8 hours a day from 08:00 at its type's road speed. Crossing from one hex to the next takes the average of the two terrains' time multipliers; rivers and lakes are crossed only at a ford or bridge.

A force stops for the night rather than start a hex it cannot finish that day. Wagons cannot enter forest, marsh, mountains or heath.

Speeds are for a small, fit band. A large army's column made less ground a day; cut its hours or speed to suit.

One clock: every force on a map keeps the same time. Each has orders (march on its route, or halt); the GM moves the clock on an hour, to nightfall, or until something happens (an arrival, a camp finished, or forces of different sides within fighting reach, when both halt). A force making camp or fighting is busy until it is done. A march stopped mid-hex keeps the time spent on it.

Marching together: forces on one side within a hex can march as a column behind a leader. The column keeps out of ground any of them cannot enter, moves at its slowest and most tired force's pace, keeps one clock, and makes one camp sized for all its men, with every man digging.

Terrain

Km a day across whole hexes of each terrain; a road day is the type's speed times its marching hours.

Terrain	Time	On foot mi (km) a day	Mounted mi (km) a day	Baggage wagons mi (km) a day
Road	x1	20 (32)	30 (48)	15 (24)
Open ground	x1.5	13 (21)	20 (32)	10 (16)
Farmland	x1.5	13 (21)	20 (32)	10 (16)
Heath	x1.75	11 (18)	17 (27)	-
Forest	x2.5	8 (13)	12 (19)	-
Hills	x2	10 (16)	15 (24)	7 (12)
Mountains	x4	5 (8)	7 (12)	-
Marsh	x3	7 (11)	10 (16)	-
River	impassable	-	-	-
Ford	x2	10 (16)	15 (24)	7 (12)
Bridge	x1	20 (32)	30 (48)	15 (24)
Lake or sea	impassable	-	-	-
Village	x1	20 (32)	30 (48)	15 (24)
Town	x1	20 (32)	30 (48)	15 (24)

Armour

1. Use armour only on tables marked **armour allowed** (all-hits, baseline, knife and unarmed tables). The other tables already show the effect of what their soldiers wore.

2. Find the hit location's **armour slot** in the target's kit. Empty slot: no protection.

3. If the slot shows d100 bands (e.g. *Rifle plate 01-65 / Soft Kevlar 66-00*), roll d100 to see which layer the hit meets. A roll above the last band is a gap: no protection.

4. Protection = the material's steps against the wound mechanism. For gunfire use the weapon's **threat** column (fragment, pistol, rifle, AP rifle). Subtract the weapon's armour defeat, if any.

5. Lower the severity that many steps: Critical > Serious > Light > Stopped. Stopped is a bruise, no wound.

6. **Shields.** The Visby tables assume the target carries a shield. If the target's kit has none (every modern kit, and full plate), use the **No shield** column or situation.

Protection (severity steps)

Material	vs Cut	vs Pierce	vs Crush	Gunfire: fragment	Gunfire: pistol	Gunfire: rifle	Gunfire: rifle ap
Padded (gambeson)	1	0	1	0	0	0	0
Hardened leather	1	0	0	0	0	0	0
Mail	2	1	0	1	0	0	0
Mail over padding	2	1	1	1	0	0	0
Coat of plates / brigandine	2	2	1	1	1	0	0
Plate	3	2	1	2	1	0	0
Jack (many layers of linen)	2	1	1	1	0	0	0
Buff coat (thick oiled leather)	1	1	1	1	0	0	0
Steel cuirass (cuirassier, carabinier)	3	2	1	1	2	1	0
Cavalry helmet (brass or steel, with crest)	2	1	1	1	1	0	0
Thin steel vest (private purchase)	2	1	1	1	1	0	0
Heavy steel plate (Sappenpanzer)	3	2	1	2	2	1	0
Steel plates in fabric (aircrew flak vest)	2	1	1	2	1	0	0
Steel helmet (M1, Brodie)	2	1	1	1	1	0	0
Nylon flak vest (M1952, M69)	1	0	0	2	1	0	0
Doron fibreglass plates (M1955)	2	1	1	2	2	0	0
Soft Kevlar (PASGT, IIIA vest)	1	0	0	2	2	0	0
Kevlar helmet (PASGT, ACH)	2	2	1	2	2	0	0
Rifle plate (SAPI)	3	3	1	3	3	2	0
AP rifle plate (ESAPI)	3	3	1	3	3	2	2

Weapon	Armour defeat
Axe (hand or long-hafted)	ignores 1 step vs cut
Spiked club / morning star (knout)	ignores 1 step vs pierce
Poleaxe (axe, hammer and spike)	ignores 1 step vs crush, ignores 1 step vs pierce
Longbow (English war bow, bodkin and broadhead arrows)	ignores 1 step vs pierce
Crossbow (bolts)	ignores 1 step vs pierce

Sources. Visby kit contents follow the finds summarised in Thordeman (1939): mail coifs, coats of plates, gauntlets. Not yet checked against the text. Vietnam vests: M1952/M69 nylon stopped fragments and low-velocity pistol rounds but not rifle rounds; M1955 Doron plates stopped .45 ACP at the muzzle (Wikipedia, 'Flak jacket'). Protection steps and coverage percentages are design estimates.

greave (Lower legs)	-	-	Plate 01-50
sabaton (Feet)	-	-	Mail
shield (Visby tables)	Yes	Yes	Yes

Gotland levy: mail coif, padded coat: Many Visby dead were buried wearing mail coifs.

Gotland, better equipped: coif, coat of plates: Coats of plates and plate gauntlets were recovered from the Visby graves.

Danish man-at-arms (1361): Professional kit of the period; face left open (visors uncertain for 1361).

leg (Thighs, knees)	-	Mail over padding 01-40
greave (Lower legs)	-	-
sabaton (Feet)	-	-
shield (Visby tables)	No	No

Jack and sallet (archer or billman, c.1460): Padded jack of many linen layers and an open sallet; legs and hands mostly bare. Jack protection is a design estimate.

Brigandine, sallet and arm splints (c.1460): Better-equipped retainer: brigandine (plates riveted inside cloth), sallet, splints on the arms, some plate on the hands.

greave (Lower legs)	-	-	-	-	-
sabaton (Feet)	-	-	-	-	-
shield (Visby tables)	No	No	No	No	No

Cuirassier, three-quarter armour (1630s): Closed helmet, proofed breastplate, arm defences and tassets to the knee; one gauntlet (the bridle hand). Heavy, and going out of use by the 1640s.

Harquebusier: buff coat, breastplate, pot helmet: Lighter cavalry of the Thirty Years' War and the English Civil War: 'lobster-tail' pot helmet, breast and back plate over a buff coat, a gauntlet on the bridle arm.

Pikeman: morion and corslet: Open helmet, breast and back plates and short tassets. Many pikemen left the armour behind on campaign.

Cuirassier: steel cuirass and helmet: French cuirassiers and carabiniers; breast and back plates were proofed against musket balls at range (1 step), better against pistols. The skirt of the cuirass left the belly partly open.

Dragoon or light dragoon helmet: Brass, steel or leather helmet with a crest, worn by dragoons on both sides; turned sabre cuts.

sabaton (Feet)	-	-	-	-	-	-	-	-	-	-	-
shield (Visby tables)	No	No	No	No	No	No	No	No	No	No	No

Private steel vest (Civil War, 1862): Atwater and G&D; Cook vests, sold by the thousand in 1862; about 8 lb, most were thrown away on the march.

Steel helmet and Sappenpanzer (WWI German sentry): Heavy plate issued to sentries and machine gunners in static positions; too heavy for the attack.

Aircrew flak vest and helmet (WWII bomber crew): Steel plates sewn into fabric against flak fragments; worn by US bomber crews from 1943.

Steel helmet only (1915-1950s rifleman): Most infantry from 1915 to the early 1950s wore a steel helmet and no body armour.

M1 helmet, nylon flak vest (US Army M1952/M69, 1952-75): M69 nylon vest stopped fragments and low-velocity pistol rounds, not an AK-47 round.

M1 helmet, Doron vest (USMC M1951/M1955, 1951-75): Doron fibreglass plates over the chest, sides and back; nylon over the upper torso. Stopped .45 ACP at the muzzle, not rifle rounds.

PASGT vest and helmet (1980s-90s): Kevlar against fragments and handgun rounds; no rifle plates.

Ranger Body Armor, front plate only (Mogadishu 1993): IIIA soft vest with a single ceramic plate in front; the first version had no back plate, so only about half the usual plate coverage.

Interceptor vest, SAPI plates, ACH (2000s): Plates cover the centre of the chest and back (about 65% of upper-torso hits); soft Kevlar elsewhere on the vest. Neck, groin and shoulder pieces were not always worn.

Plate carrier, ESAPI plates, helmet (2010s-): Lighter than a full vest: plates over the vital area, soft side panels only. Outside the plates is a gap.

Concealable soft vest (police IIIA): Stops handgun rounds, not rifles. Soft Kevlar gives little protection against a knife (pierce 0).

Key

Term	Meaning
B0	None
B1	Slow - seeping; lose 1 Blood per minute
B2	Heavy - lose 1 Blood per round; bind within minutes
B3	Arterial - lose 3 Blood per round; tourniquet or pressure now
P0	None
P1	-10% to all actions
P2	-20% to all actions
P3	-30% to all actions
dazed	Stunned: lose next action, then -20% for 1d6 rounds
unconscious	Knocked out (check each minute to wake)
vision	Vision impaired: -30% to sight-based actions; blinded if both eyes
speech	Cannot speak clearly
breath	Winded: no sustained exertion; fatigue doubled
collapse	Collapses; can only crawl or crouch
grip	Drops anything held in that hand; cannot grip with it
arm	That arm -20%; no two-handed use
arm useless	That arm useless
hand useless	That hand useless
leg	Movement halved; -20% to footwork and dodging
stand	Falls and cannot stand unaided
move	Movement halved
Stop check	Stop check: d100 against Nerve, or defend only, stunned or out of the fight
Fracture	Bone broken: no use of the part until set; pain +1 when used
Severed	Part severed: arterial bleeding until cauterised or tourniqueted
Lethal: none	Not life-threatening by itself
Lethal: days	Fatal in days without care (infection, internal damage)
Lethal: hours	Fatal in hours without care
Lethal: minutes	Fatal in minutes without care
Lethal: rounds	Fatal within a few rounds
Lethal: instant	Killed outright

Survival Tracking (optional)

Each character has **20 Blood**. Bleed drains it; total Pain above 3 calls for a stop check each round.

Blood	Effect
75%	Pale and weak: -10% to all actions
50%	Faint check each minute; -20% to all actions
25%	Barely conscious: -40% to all actions, can only crawl
0%	Unconscious and dying

Treatment	Effect
Bind	Bandage / pressure: reduce bleed by 1 (min 0)
Tourniquet	Limb only: stops bleeding; limb lost if left on for hours
Cauterise	Stops bleeding; pain +1
